Literaturangaben Durchsuchbare elektronische Faksimileausgabe als PDF Digitalisiert im Rahmen des DFG Projektes Digi20 in Kooperation mit der BSB München OCR Bearbeitung durch den Verlag Otto Sagner *Backwardness and Modernization: Poland and Eastern Europe in the 16th-20th Centuries* Jacek Kochanowicz, 2018-01-31 The subject of this book is the economic backwardness of Poland and Eastern Europe in the modern era The studies in the first part analyse various aspects of the region's economic and social history in the period from the 16th to the 20th centuries such as the nature of peasant economics the character of economic evolution and the ambiguity of social and economic relations between Poland and the West The second part deals with the change following the fall of state socialism Papers in this part argue that for understanding the present it is necessary to take into consideration historical legacies It is also important to look at the process of this recent change comparatively both within Eastern Europe and comparing this region with other parts of the world Professor Kochanowicz's contention in these essays is that the so called transformation has had to cope not only with the effects of state socialism but also with a much longer legacy of backwardness **Central and Eastern Europe, 1944-1993** Tibor Iván Berend, 1996 An ambitious comparative analysis of Eastern Bloc economies during a period of revolutionary change **Global Trends in Eastern Europe** Nikolai Genov, 2016-04-22 Eastern Europe was once clearly defined by the centralized political and economic organization of the societies in the region They shared the same official ideology and were members of the same alliances After 1989 the region collapsed in an economic political and cultural implosion What were the moving forces of this profound change What are its consequences Could we try to reasonably foresee any future developments In this thought provoking book Nikolai Genov presents a systematic description and explanation of Eastern European societal transformations after 1989 They are interpreted as adaptations to four global trends upgrading the rationality of organizations individualization spreading of instrumental activism and universalization of value normative systems Adaptations to these trends have generally been successful However Genov notes that the process is marked by many failures as well They are mostly caused by path dependency in the societal development and by the varying quality of relevant decisions other destructive developments are due to contradictions in the global trends themselves Guided by the assumption that the societal and supranational integration mechanisms in Eastern Europe before 1989 could not resist the overwhelming power of global trends Genov's controversial findings question visions about the end of history and simultaneously strengthen the confidence that most complex macro social processes can be rationally managed A timely book allowing for a much needed engagement in contemporary debates on the controversial processes in Eastern European transitions **Developments in Central and East European Politics 3** Stephen White, Judy Batt, Paul G. Lewis, 2003

*Transformation of Cities in Central and Eastern Europe* F. E. Ian Hamilton, Kaliopa Dimitrovska Andrews, Nataša

Nakagawa, 2012 Globalization in the 1990s provided both opportunities and challenges for developing and transition economies Though for some it offered the chance to achieve economic growth through active involvement in the integrated and liberalized world economy it also increased their vulnerability to external shocks and volatility As a consequence stakeholders at every level of the development and transition process international organizations national governments and the private sector had to review their strategies in order to adjust to the new world economic environment As the Mexican peso crisis of 1994 1995 and the Asian financial crisis of 1997 1998 showed dramatically the cost of maladjustment was not only very high but it also affected many more stakeholders than before due to the contagious effects of crises This revealing book analyzes the different methods employed to manage globalization and development Bringing together an international team of contributors including Barbara Stallings Alicia Giron and J C Ferraz it will prove to be a valuable resource for those involved in the fields of development economics and political economy **From the Soviet Bloc to the European Union**

Ivan T. Turnock,2024-11-01 Since 1898 the former communist countries of Eastern Europe have gained international prominence The continuing socio economic transition and the instability evident in areas like the Caucasus and Former Yugoslavia have drawn the western world into uneasy interactions with the region At the same time closer commercial and cultural contacts are providing opportunities for rewarding relationships which have now resulted in many of these countries joining the EU This book provides detailed coverage of the transition from communism to a market economy Covering the whole range of East Central European and former Soviet Union countries it charts the diversity within the region offering in depth coverage of specific areas as well as a broad view of development across the region The book is organised into three comprehensive sections the historical socio economic and environmental The socio economic section considers the critical issues of restructuring to effect the transition from central planning to a market economy while the historical material provides an essential context for the constraints and opportunities affecting the region The environmental section places emphasis on results of environmental neglect inherited from communism as well as looking to the future implications of EU directives on the problems of biodiversity and pollution in the region      *The Legacy of Rosa Luxemburg, Oskar Lange and Micha? Kalecki* R. Bellofiore,E. Karwowski,J. Toporowski,2013-12-13 Rosa Luxemburg Oskar Lange and Michal Kalecki made important contributions to twentieth century political economy that guided the thinking of their student Tadeusz Kowalik These contributions are re examined by renowned economists highlighting the common themes in their political economy and the neglected aspects of their work      Transformation and Crisis in Central and Eastern Europe Bruno Dallago,Steven Rosefielde,2016-05-05 The global financial crisis has provided an important opportunity to revisit debates about post socialist transition and the relative success of different reform paths Post communist Central and Eastern Europe CEECs in particular show resilience in the wake of the international crisis with a diverse range of economic transformations Transformation and Crisis in Central and Eastern Europe offers an in depth analysis of a diverse range of countries including Poland Hungary Russia Ukraine Czech Republic and Slovakia This volume assesses each country s institutional transformations geopolitical policies and local adaptations that have led them down divergent post communist paths Chapters take the reader systematically through the evolution of former communist national economic systems before ending with lessons and conclusions for the future Subsequent chapters demonstrate that economic performance crucially depends on achieving a sustainable balance between sound institutional design and policies on one hand and localization on the other This new volume from a prestigious group of academics offers a fascinating and timely study which will be of interest to all scholars and policy makers with an interest in European Economics Russian and East European Studies Transition Economies Political Economy and the post 2008 world more generally      **Recent Social Trends in Bulgaria, 1960-1995** Nikolai Genov,Anna Krasteva,2001-01-01 The introduction by Nikolai Genov looks at the challenges posed by two transformations the experiment with communism which ended in failure and the current transition to a market economy and pluralist politics Genov

concludes that the major reason for Bulgaria's critical situation is the powerlessness of its state institutions. Considering life style, fertility, leisure, and consumption inequality, religion, economic institutions, ethnicity, norms of conduct, and family, as well as other trends. Recent Social Trends in Bulgaria 1960-1995 is the first comprehensive presentation of the major transformations that characterize Bulgaria at the turn of the century. The contributors not only consider a broad range of social phenomena but provide an in-depth analysis of social change. This national profile provides more data supporting the hypothesis of diversification rather than convergence in modern societies, a hypothesis proposed by the Comparative Charting of Social Change group after documenting social change in many countries.

**Leviathan Transformed** Theodore Caplow, 2002-01-16. The authors, using these goals as a checklist, found that each of the seven states performs well in some areas and badly in others. They discovered that all states approached these goals in a style shaped by their own history and in particular by how they have been affected by the troubles of the twentieth century. Their investigations offer a new, informative way of looking at these nation-states and detail the social and political conditions in each state. Contributors include Theodore Caplow, Salustiano Del Campo, Royal Academy of Political and Social Science, Madrid; Nikolai Genov, Bulgaria Academy of Sciences; Karl Otto Hondrich, Goethe University; Simon Langlois, Université de Laval; Alberto Martinelli, University of Milan; and Henri Mendras, OFCE, Paris.

In the course of the tremendous political and economic upheaval starting in 1989-1990, many industrial cities and regions in Central and Eastern Europe have been confronted with profound problems. This book presents eleven detailed national reports which describe the situation in such cities and regions as well as the strategies which have been employed to cope with structural change. The country reports are complemented by short case studies of selected cities and regions. An introduction gives background to such topics as structural change and the ramifications of EU enlargement. Finally, some conclusions are drawn and recommendations offered for future policy.

**Transformation of Agriculture in Central Eastern Europe and the Former USSR** Csaba Csáki, 1992. The former USSR could become self-sufficient in food but in the medium term will probably remain a net agricultural importer if it can persuade exporters to extend credit. But Central Eastern European agricultural exports are likely to expand. Central Eastern Europe could become a tougher, more aggressive player in agriculture, principally in the markets for more demanding food products, especially pork, poultry, and fruits and vegetables.
