### **The Social World of Children's Learning**

Andrew Pollard,2001-01-01 Do children still matter in education With its focus on children s learning in the initial three years of schooling this book contains the first part of a report of an ethnographic study of individual pupils from the ages of four to 11 in an English primary school

School Leadership Professor Gerald Grace,Gerald Grace,2005-08-31 This text provides a study of the education policy scholarship of leadership It examines the ways in which concepts of educational leadership and management have evolved historically and culturally reviewing contemporary debates about the nature of school leadership

The question of what school leadership could and should be is at the centre of political ideological and educational debate in many societies. These debates involve cultural conservatives, New Right marketeers, democrats and community educators, feminists and critical theorists as well as school governors, headteachers and teachers, parents, community members and school students. These debates are reviewed and the theoretical context is illuminated by fieldwork accounts derived from the research participation of 88 headteachers working in English schools, both primary and secondary. Such accounts provide an insight into the challenges of contemporary school leadership as headteachers face new power relationships, new curriculum responsibilities and management and marketing cultures which generate moral, ethical and professional dilemmas for many of them.

**Improving Children's Learning** Joan Dean, 2003-09-02 How can teachers improve what they do in the primary classroom? Which teaching methods will help you and your pupils to perform effectively? These are the questions that every teacher will be asking him or herself in today's climate of targets and tables. Much research over recent years has focused on the role of the teacher and how effective classroom practice is achieved. The book discusses many areas of topical importance including teaching methods, motivating learners and matching work to children, how to structure children's learning, classroom control and organisation, teaching literacy, teaching children with special education needs, working with parents. It also looks at the increasing role of the teacher as a researcher and how collaborative practices are providing a way for teachers to appraise both their own progress and that of their colleagues. This book should be of particular interest to the classroom teacher who is looking for ways to develop his or her teaching but has limited time to explore the research. It sets out to translate the findings of research into practical terms which teachers can easily use.

Case Studies In Educational Change David Carter, 2012-10-12 This text, the second in a two volume set examining the process of educational reform, describes case studies on the change process of education as it impacts on the individual at work. The authors provide interesting comparisons of similar changes occurring within education in different national settings including Australia, New Zealand, Israel, the USA and the UK. The case studies are based on three themes: systematic change, the transition from policy to practice and curriculum contexts. The effects of governmental control over the curriculum and attempts to reform education by legislation are explained and the similarities are seen as marginalisation of professional educators, corporatisation of education systems, instrumentalisation of curriculum and the inability of those in power to draw from past knowledge on educational change. Written to stand alone, this book can also be read in conjunction with volume 1, *International Perspectives on Educational Reform and Policy Implementation*, which examines the historical, social and economic influences on education policy reform. The authors argue that change takes a predictable format and once understood can be directed and managed. The books are intended to be of interest to all involved in the planning and implementation of change, together pointing the way to effective management of such change processes.
