Point to the labels and title to make sure the students understand what each is. Tell them that the title and labels allow other people to understand what is being graphed.

Tell the students that the first thing they need to do is draw a circle using the compass. Now, looking at the given information, they need to make fractions in order for them to know how the circle will be split (do these together). After finding fractions for the data set as a class, put the fraction pieces (tenths) on the overhead for them to see how they cut the circle and if they agree with their decisions. The students should notice that the pie graph will be cut into tenths. Tell the students to now draw the pieces on their pie graphs using their fraction circles and label the correct value in each slice. They may lay the fraction pieces on their paper and trace them so they will have accurate angles. The teacher should walk around the room while the students are working to make sure they
