Empowerment on an Unstable Planet Daniel C. Taylor, Carl E. Taylor, Jesse O. Taylor, 2011-11-17 Since World War II development projects have invested more than two trillion dollars towards health services poverty alleviation education food security and environmental initiatives around the world Despite these efforts 20% of the world still lives on less than 1.50 a day and the environment within which all live declines dramatically There are clear limits to what further investments at this rate can achieve This

book advances the thesis that a more effective and universal foundation for social change and environmental restoration is not money but human energy Using this approach Tibet recovered from being nearly deforested to having over 40% of its land area protected under conservation management Using principles outlined in this book mothers in northeast India implemented a package of life changing actions that halved child mortality They parallel the way New York City has created a citywide conservation program over three and a half centuries Each of these examples is particular to its time and place yet a shared set of principles is at work in all of them Improving the quality of life for a community starts by strengthening successes already operating It involves local knowledge and a relatively simple set of principles tasks and criteria designed to empower communities This highly readable account demonstrates how a comprehensive process for social change harnesses the energy of a community and scales it up with a rising number of participants becoming invested in increasingly high quality work Richly illustrated with photographs and stories of innovative people and programs in communities ranging from Nepal to Afghanistan to the South Bronx it provides practical proven guidelines for creating profound and sustained social change that begins in individual communities and grows to scale

Human Rights Makau Mutua,2013-07-03 In 1948 the United Nations adopted the Universal Declaration of Human Rights and with it a profusion of norms processes and institutions to define promote and protect human rights Today virtually every cause seeks to cloak itself in the righteous language of rights But even so this universal reliance on the rights idiom has not succeeded in creating common ground and deep agreement as to the scope content and philosophical bases for human rights Makau Mutua argues that the human rights enterprise inappropriately presents itself as a guarantor of eternal truths without which human civilization is impossible Mutua contends that in fact the human rights corpus though well meaning is a Eurocentric construct for the reconstitution of non Western societies and peoples with a set

of culturally biased norms and practices Mutua maintains that if the human rights movement is to succeed it must move away from Eurocentrism as a civilizing crusade and attack on non European peoples Only a genuine multicultural approach to human rights can make it truly universal Indigenous non European traditions of Asia Africa the Pacific and the Americas must be deployed to deconstruct and to reconstruct a universal bundle of rights that all human societies can claim as theirs

The Sovereign Psyche Ezra Aharon, 2016-04-30

The Sovereign Psyche is not just the title of the book More importantly The Sovereign Psyche is the motivating consciousness intellect and willpower that is necessary to materialize what the book defines as Self Authentic Freedom as opposed to Chattel Freedom Chattel freedom is when the value of a people is predicated upon the extent to which they serve the interests and institutions of others As such this work asserts that there is no such thing as intellectual or institutional equality and that Black African people have been unknowingly thrust into an intellectual and institutional war where second place finishers either experience varying degrees of chattel freedom or they could end up dead Regardless of the issue genuine solutions entail what we as Black African people intellectually and institutionally do for ourselves If Black Lives Matter we must channel the end uses of our intellect and the resources of our institutions to not only prove and enforce it but also leverage powers to penalize and or

repudiate violators Although this work centers upon Black African people the sovereign functions and frameworks herein are universal in application being that today's world rotates upon systems of sovereignty and power not beliefs in democracy or equality In this context the sovereign concepts and criteria presented are far more rational than radical The central question is to what extent will Black African people harness the willpower and employ the intellect of The Sovereign Psyche to actualize our own systems and institutions of self authentic freedom government and development without apology or permission This work offers the ideological apparatus to make this possible just as others are doing all around the globe
