Stanek, 2002-10-04 Lyme borreliosis commonly known as lyme disease is now acknowledged as the most highly prevalent arthropod borne human disease in northern temperate regions of the world This book describes the basic characteristics of the disease the biology of the pathogens in their vectors and vertebrate hosts their ecology in different regions of the world and the global epidemiology of the disease The final chapters address the prevention and control measures that have resulted from this knowledge **Science In Medicine** Ushma S. Neill, American Society for Clinical Investigation, 2007-10-31 Science in Medicine The JCI Textbook of Molecular Medicine is a collection of acclaimed articles published in the Journal of Clinical Investigation during the Journal's tenure at Columbia University The society that publishes the JCI the American Society for Clinical Investigation ASCI is an honor society of physician scientists representing those who are at the forefront of translating findings in the laboratory to the advancement of clinical practice This textbook brings together state of the art reviews written by the world's leading authorities including many ASCI members The reviews examine the molecular mechanisms underlying a wide array of diseases and disorders affecting all major organ systems The fundamentals of the organ or physiological systems in question are present alongside the underlying genetic or physiological abnormalities that result in disease This text illustrates the translation of basic scientific knowledge into the current practice of clinical medicine The reviews provide an authoritative and comprehensive overview by building on known scientific concepts and treatment of human disease while exploring where these advances might take medicine over the next decade The book is a valuable resource for medical students graduate students house staff attending and practicing physicians and biomedical researchers **Ecology and prevention of Lyme borreliosis** Marieta A.H. Braks, Sipke E. van Wieren, Willem Takken, Hein Sprong, 2023-08-07 How can nature be protected and biodiversity be preserved while the threats of zoonotic diseases are minimised Expanding nature areas and creating ecological networks across Europe is not only beneficial for wildlife but also for the pathogens they carry A prominent case is Lyme borreliosis which has risen from relative obscurity to become a major public health problem in Europe The Dutch research program Shooting the messenger took a One Health approach aiming at the development of sustainable measures for the prevention of Lyme borreliosis An interdisciplinary network of researchers public health experts and nature managers gained and shared knowledge in the ecological processes of ticks Lyme spirochaetes and their vertebrate hosts as well as in the human epidemiology of tick bites and Lyme borreliosis These new insights together with new intervention methods and strategies are described in this book Lyme Borreliosis Klaus-Peter Hunfeld, Jeremy Gray, 2022-05-27 This book is a compact clinical introduction to Lyme borreliosis for physicians of all specialties who care for patients with suspected *Burgdorferi* infection whether in hospital or general practice The book provides a great deal of practice oriented information on symptomatology diagnosis treatment and prophylaxis with a special emphasis on the situation in Europe At the same time it describes
