

# TRADITIONAL APPROACH

**TRADITIONAL APPROACH** advocates that there is a right combination of equity and debt in the capital structure, at which the market value of a firm is maximum.

As per this approach, debt should exist in the capital structure only up to a specific point, beyond which, any increase in leverage would result in the reduction in value of the firm.

## **ASSUMPTIONS**

1. The rate of interest on debt remains constant for a certain period
2. The expected rate by equity shareholders remains constant or increase gradually.
3. the WACC first decreases and then increases.

Brennan, 2024-07-30 Can American health insurance survive In The Transformation of American Health Insurance Troyen A Brennan traces the historical evolution of public and private health insurance in the United States from the first Blue Cross plans in the late 1930s to reforms under the Biden administration In analyzing this evolution he finds long term trends that form the basis for his central argument that employer sponsored insurance is becoming unsustainably expensive and Medicare for All will emerge as the sole source of health insurance over the next two decades After thirty years of leadership in health care and academia Brennan argues that Medicare for All could act as a single payer program or become a government regulated program of competing health plans like today s Medicare Advantage The choice between these two options will depend on how private insurers adapt and behave in today s changing health policy environment This
