Night Duty Social Worker:

Social and Family Issues in Shift Work and Non Standard Working Hours Irena Iskra-Golec, Janet Barnes-Farrell, Philip Bohle, 2016-07-13 This book explores the effects of shift work and non standard working hours on family and social life. It features analysis and case studies from an international body of researchers from Europe, the Americas and Australia. It includes contributions from Germany, the United States, the Netherlands, Croatia, Italy, Poland, Australia and Brazil that fully examine this increasingly prevalent and global issue. The book starts by introducing the problems of work family linkages, shift work and non standard work hours. Next, it details the consequences of specific features of shift schedules such as decreased opportunities for social participation, family problems and negative effects on partners and children, as well as the impact of working time arrangements on work family conflict over time. The book then looks at the consequences of shift work and non standard work hours on family members and the workers themselves, including the sleep and daytime functioning of adolescent family members and the ways that non standard work schedules intersect with the particular challenges and stresses of family responsibilities and strategies that workers use to manage these challenges in sectors where non standard schedules are the norm. Last, the book considers the role of individual differences in understanding problems of work family relationships, including a consideration of safety and health at work from the perspective of gender and an examination of the moderating role of chronotype and circadian type characteristics on work family conflict and work family facilitation among male shift workers.

Social Work as Narrative Christopher Hall, 2019-05-23 First published in 1997, this volume presents a critical analysis of how social work is formulated in everyday practice. Christopher Hall sets the task of exploring how social workers make their work visible and justifiable through their talk and writing. The analysis examines conversations and documents in which social workers describe and justify their work in research interviews, reports and case notes. Social workers construct convincing occupational stories to convince judges, supervisors and other critical readers and listeners. Drawing on narrative analysis, Hall explores how such language practices create characters, plots and address audiences. At the time of publication, the use of reflexive writing was seen as controversial; however, this study was a forerunner to what has become a flourishing scholarship in narrative and reflexivity in social work writing and practice.

Helping in Social Work Bill Jordan, 2022-01-29 First published in 1979, *Helping in Social Work* elaborates on the personal processes of influence in social work between clients and social workers. Shifting focus from the organizational structure of social work to face-to-face interactions, the author expounds on the personal and qualitative components in social work. The aim of this book is to present a simple, practical and positive account of the elements that make up good practice in the sort of work which statutory social workers do without relying on excessive jargon. These experiences of helping and being helped will be of importance to students of social work and social policy as well as any reader trying to gain an insight into the everyday realities of social workers.
