Nouveau Monde Et Renouveau De L'histoire Naturelle Volume Iii:

Nouveau monde et renouveau de l'histoire naturelle Marie-Cécile Bénassy-Berling, Jean-Pierre Clément, Centre de recherche interuniversitaire sur l'Amérique espagnole coloniale, 1986 *Measuring the New World* Neil Safier, 2024-05-31

Prior to 1735 South America was terra incognita to many Europeans But that year the Paris Academy of Sciences sent a mission to the Spanish American province of Quito in present day Ecuador to study the curvature of the earth at the Equator Equipped with quadrants and telescopes the mission's participants referred to the transfer of scientific knowledge from Europe to the Andes as a sacred fire passing mysteriously through European astronomical instruments to observers in South America By taking an innovative interdisciplinary look at the traces of this expedition *Measuring the New World* examines the transatlantic flow of knowledge from West to East Through ephemeral monuments and geographical maps this book explores how the social and cultural worlds of South America contributed to the production of European scientific knowledge during the Enlightenment Neil Safier uses the notebooks of traveling philosophers as well as specimens from the expedition to place this particular scientific endeavor in the larger context of early modern print culture and the emerging intellectual category of scientist as author

Making Knowledge in Early Modern Europe Pamela H. Smith, Benjamin Schmidt, 2007

Aims to bring together essays that explore how knowledge was obtained and demonstrated in Europe during an intellectually explosive four centuries when standard methods of inquiry took shape across several fields of intellectual pursuit This book looks at production and consumption of knowledge as a social process within different communities

The Rise and Fall of Modern Empires, Volume II Saul Dubow, 2016-12-05 This volume reproduces key historical texts concerning colonial knowledges The use of the adjective colonial indicates that knowledge is shaped by power relationships while the use of the plural form knowledges indicates the emphasis in this collection is on an interplay between different often competing cognitive systems George Balandier's notion of the colonial situation is an organising principle that runs throughout the volume and there are four sub themes language and texts categorical knowledge the circulation of knowledge and indigenous knowledge The volume is designed to introduce students to a range of important interventions which speak to each other today even if they were not intended to do so when first published An introductory essay links the themes together and explains the significance of the individual articles

The Perfection of Nature Mackenzie Cooley, 2022-10-26 A deep history of how Renaissance Italy and the Spanish empire were shaped by a lingering fascination with breeding The Renaissance is celebrated for the belief that individuals could fashion themselves to greatness but there is a dark undercurrent to this fabled era of history The same men and women who offered profound advancements in European understanding of the human condition and laid the foundations of the Scientific Revolution were also obsessed with controlling that condition and the wider natural world Tracing early modern artisanal practice Mackenzie Cooley shows how the idea of race and theories of inheritance developed through animal breeding in the shadow of the Spanish Empire While one strand of the Renaissance

celebrated a liberal view of human potential another limited it by biology reducing man to beast and prince to stud Race Cooley explains first referred to animal stock honed through breeding To those who invented the concept race was not inflexible but the fragile result of reproductive work As the Spanish empire expanded the concept of race moved from nonhuman to human animals Cooley reveals how as the dangerous idea of controlled reproduction was brought to life again and again a rich complex and ever shifting language of race and breeding was born Adding nuance and historical context to discussions of race and human and animal relations The Perfection of Nature provides a close reading of undertheorized notions of generation and its discontents in the more than human world **Myth and Archive** Roberto González

Echevarría,1998 Discusses the theory of the origin and evolution of the Latin American narrative and the emergence of the modern novel **Colonial Botany** Londa Schiebinger,Claudia Swan,2016-03-01 In the early modern world botany was big science and big business critical to Europe s national and trade ambitions Tracing the dynamic relationships among plants peoples states and economies over the course of three centuries this collection of essays offers a lively challenge to a historiography that has emphasized the rise of modern botany as a story of taxonomies and pure systems of classification Charting a new map of botany along colonial coordinates reaching from Europe to the New World India Asia and other points on the globe Colonial Botany explores how the study naming cultivation and marketing of rare and beautiful plants resulted from and shaped European voyages conquests global trade and scientific exploration From the earliest voyages of discovery naturalists sought profitable plants for king and country personal and corporate gain Costly spices and valuable medicinal plants such as nutmeg tobacco sugar Peruvian bark peppers cloves cinnamon and tea ranked prominently among the motivations for European voyages of discovery At the same time colonial profits depended largely on natural historical exploration and the precise identification and effective cultivation of profitable plants This volume breaks new ground by treating the development of the science of botany in its colonial context and situating the early modern exploration of the plant world at the volatile nexus of science commerce and state politics Written by scholars as international as their subjects Colonial Botany uncovers an emerging cultural history of plants and botanical practices in Europe and its possessions

Nature and Empire in the New World Antonio Barrera,1999 *Institutions coloniales et réalités sociales en Amérique espagnole* Centre de recherche interuniversitaire sur l'Amérique espagnole coloniale,1988 Les sept tudes rassemblés dans ce volume rel vent du m me domaine d investigation que celles du pr c dent volume Institutions et vie coloniale en Am rique Espagnole paru en 1985 deux d entre elles constituant la suite directe de sujets d j abord s Sans pr tendre puiser la mati re d finie par l intitul ces travaux devraient contribuer dans leur diversit th matique g ographique et temporelle mieux faire saisir la nature et la complexit des probl mes li s la vie coloniale his *Visible Empire* Daniela Bleichmar,2012-10-08 Between 1777 and 1816 botanical expeditions crisscrossed the vast Spanish empire in an ambitious project to survey the flora of much of the Americas the Caribbean and the Philippines While these voyages produced written texts and compiled

collections of specimens they dedicated an overwhelming proportion of their resources and energy to the creation of visual materials European and American naturalists and artists collaborated to manufacture a staggering total of more than 12 000 botanical illustrations Yet these images have remained largely overlooked until now In this lavishly illustrated volume Daniela Bleichmar gives this archive its due finding in these botanical images a window into the worlds of Enlightenment science visual culture and empire Through innovative interdisciplinary scholarship that bridges the histories of science visual culture and the Hispanic world Bleichmar uses these images to trace two related histories the little known history of scientific expeditions in the Hispanic Enlightenment and the history of visual evidence in both science and administration in the early modern Spanish empire As Bleichmar shows in the Spanish empire visual epistemology operated not only in scientific contexts but also as part of an imperial apparatus that had a long established tradition of deploying visual evidence for administrative purposes
