Nova Scotia Window On The Sea Window On The Sea:

Major Canadian Authors David Stouck, 1988-01-01 Canadian literature in English presents a wealth of imaginative experience that belies the colonial status sometimes accorded the world's second largest country. This revised and expanded edition of *Major Canadian Authors* provides an entrance into that realm. Stouck's carefully integrated essays introduce the life and writings of eighteen foremost Canadian authors including Robertson Davies, Margaret Laurence, Sinclair Ross, and Alice Munro. The second edition adds a new chapter on Margaret Atwood, updates the text, and expands the reference guide to include more than sixty Canadian authors.

Ernest Buckler Marta Dvořák, 2006-01-01 Margaret Atwood called Ernest Buckler one of the pathbreakers for the modern Canadian novel, yet he has slipped into relative obscurity. This new book by Marta Dvořák, *Ernest Buckler: Rediscovery and Reassessment*, breaks new ground in Canadian literary studies by analyzing some of Buckler's works that have remained unknown or unexplored by critics and by addressing the formalistic innovations of these texts. It allows a general readership to discover and an international specialized readership to reassess the wide, even eclectic scope of an author best known for his first novel *The Mountain and the Valley*. Marta Dvořák situates Buckler firmly within his cultural and intellectual environment. She argues the importance of his connections with Emerson and the American transcendental milieu and demonstrates his links with Romantics such as Schopenhauer and Shelley and modernists like Joyce, Faulkner, and Mansfield, as well as intellectuals from Aristotle to Aquinas. She explores his philosophical vision and his complex, adventurous relationship with language. Extracts from Buckler's published and unpublished material juxtaposed with those from a wide range of writers from Henry James to Foucault offer new, illuminating perspectives. The progressive structure of the book will draw readers in to discussions on shared concerns: the nostalgia for a vanished past, the relationship between family and community, the rural and the urban, or the questioning of and coming to terms with ethics and the social fabric of today's rapidly changing technological horizon in which traditional values are eroding.

Folklore of the Sea Margaret Baker, 2025-05-13 Filled with the myths and legends of the deep, this new illustrated edition of the cult classic folklore collection reveals the stories that swirled on the open seas and the customs that remain part of maritime life. The vivid, often eerie superstitions, tales, and rituals of the sea were the sailors' response to danger, immediate and uncontrolled. As a sailing ship beat for weeks across the Southern Ocean, domain of the albatross, meeting no one in the lonely wastes, her crew felt an urgent need to appease the sea gods. Even today, with engines, iron or fiberglass hulls, and less credulous seamen, much traditional sea lore has survived, especially in the fishing fleets. Stories of phantom ships and crews from the Flying Dutchman onwards, of the perennial sea serpent, of lonely lighthouses, rituals such as the crossing the line ceremonies, or blessing the fishing fleet, old weather lore, sailors' chanties, and sea language taboos and talismans, precautions taken at keel laying or launching—all these are recorded and interpreted here. For everyone who enjoys strange stories and the chilly fascination of the unconquered sea, or thrills to watch man pitting himself against merciless elements, this book is a

Water from Heaven Robert S. Kandel, 2003 From where and what does water come How did it become the key to life in the universe Water from Heaven presents a state of the art portrait of the science of water recounting how the oxygen needed to form H₂O originated in the nuclear reactions in the interiors of stars asking whether microcomets may be replenishing our world's oceans and explaining how the Moon and planets set ice age rhythms by way of slight variations in Earth's orbit and rotation The book then takes the measure of water today in all its states solid and gaseous as well as liquid How do the famous El Niño and La Niña events in the Pacific affect our weather What clues can water provide scientists in search of evidence of climate changes of the past and how does it complicate their predictions of future global warming Finally Water from Heaven deals

with the role of water in the rise and fall of civilizations As nations grapple over watershed rights and pollution controls water is poised to supplant oil as the most contested natural resource of the new century The vast majority of water used today is devoted to large scale agriculture and though water is a renewable resource it is not an infinite one Already many parts of the world are running up against the limits of what is readily available Water from Heaven is in short the full story of water and all its remarkable properties It spans from water s beginnings during the formation of stars all the way through the origin of the solar system the evolution of life on Earth the rise of civilization and what will happen in the future Dealing with the physical chemical biological and political importance of water this book transforms our understanding of our most precious and abused resource Robert Kandel shows that water presents us with a series of crucial questions and pivotal choices that will change the way you look at your next glass of water *Nova Scotia: Window on the Sea* Ernest Buckler,Hans Weber,1973-01-01 [National Union Catalog](#) ,1973 Includes entries for maps and atlases [Current Research - Geological Survey of Canada](#) ,1991
