Andrew J. Pierre

Nuclear Forces In Europe:

Nuclear Forces in Europe Leon V. Sigal, 1984 En analyse af den omfattende debat NATO's 1979 beslutning om opstilling af Cruise og Pershing II missiler medførte NATO's begrundelse med de strategiske og tekniske fordele og reaktioner hos de europaiske NATO lande samt nedrustningsforhandlingerne

Tactical Nuclear Weapons Stockholm International Peace Research Institute, 2020-11-19 In the 1970s tactical nuclear warfare was a topical issue The introduction of the new generation of tactical nuclear weapons into Europe could have had disastrous consequences These new weapons had already been developed by nuclear weapon laboratories and pressures were growing for their deployment On first sight smaller and more accurate nuclear weapons may seem more humane and militarily preferable to the relatively high yield tactical nuclear weapons currently deployed But some of these new types of weapons would blur the distinction between nuclear and conventional weapons and their use would make escalation to strategic nuclear war extremely likely Indeed the argument for these new weapons is that their use in wartime is more credible and therefore acceptable than current types of tactical nuclear weapons This perception could easily lead to the exceedingly dangerous idea that some types of tactical nuclear war were winnable The fact has to be faced that any use of nuclear weapons is almost certain to escalate until all available weapons are used To believe otherwise is to believe that one side will surrender before it has used all the weapons in its arsenal History shows that this is most unlikely to happen Because of its importance SIPRI organized a meeting to discuss the whole question Originally published in 1978 this book is the outcome of that meeting

Alternative Conventional Defense Postures In The European Theater Hans G. Brauch, Robert F. Jr. Kennedy, 2018-10-24 First published in 1993 This volume edited jointly by the American strategic expert Robert Kennedy and the German peace researcher Hans Giinter Brauch takes up conceptual ideas developed by Horst Afheldt and Carl Friedrich von Weizsacker as well as others on both sides of the Atlantic since the 1960s Our aim has been to contribute to the development of concepts that would reduce the danger of a third world war by the creation of more stable structures in the context of a defensively oriented conventional defense posture In this volume a variety of alternative approaches to European conventional defense driven for the most part by similar strategic considerations are presented by German and American experts to a larger international audience

Between Scylla and Charybdis Carl William Dossel, 1985 This thesis which examines the issue of nuclear weapons in Europe is divided into two major parts The first traces the history of nuclear weapons and doctrine associated with NATO and the Warsaw Pact from 1945 through 1985 Drawing on this historical perspective the second part critically examines current conventional and nuclear force structure and doctrine Briefly it concludes that NATO's approach to nuclear force structure and doctrine might be charitably labeled ad hoc In view of present and projected Warsaw Pact conventional and nuclear capabilities the credibility of flexible response suffers accordingly To remedy this situation a series of recommendations are

made the gist of which are adoption of a mobile conventional defense removal of battlefield nuclear weapons from Europe and the enhancement of the survivability of theater strategic systems while seeking the ultimate elimination of theater nuclear weapons on both sides through arms control talks

The Control of NATO Nuclear Forces in Europe During the Cold War Marco Carnovale, 2018-12-09 This book examines the development of command and control systems for nuclear weapons in NATO Europe during the Cold War This is a reprint of his book originally published in 1993 The United States and Europe had for a long time stressed different aspects of their common concern for the control of nuclear forces The US mostly feared a failure of negative control ie the possibility of accidental or inadvertent use The Europeans shared this concern but emphasized the need for reliable positive control of the deterrent ie the assurance that it would function as planned in an emergency Unsurprisingly American views prevailed and

moved the UK and France to develop their own national deterrent Written at the end of the cold war this book argued for the creation of a European deterrent integrated with NATO on the basis of the French and UK forces Since then these two countries have repeatedly discussed this issue and that is why twenty five years after it was written the conclusions of this book are still relevant for current policy Renewed US unilateralism after the election of president Trump reinforces the notion that in the nuclear weapons domain as in others the Europeans should take more responsibility The author holds a PhD in Defense Studies from the Massachusetts Institute of Technology and is a retired member of the international staff at NATO Headquarters Current Policy United States. Department of State. Bureau of Public Affairs,1981 *The Nuclear Confrontation in Europe* Jeffrey H. Boutwell,Paul Doty,Gregory F. Treverton,2020-11-19 Originally published in 1985 this book explores the nuclear confrontation between East and West in Europe where we stand how we got there and what the future may hold Its concluding chapter outlines the prospects for nuclear arms control in Europe and it frames the debate over NATO strategy and the role of nuclear weapons in the years ahead Can NATO reduce its reliance on nuclear weapons Can it cope with the issues at all The chapters on NATO theatre nuclear forces and doctrine provide a rich background to current policy issues The public debate over NATO s 1979 decision to deploy new American cruise and Pershing nuclear missiles in Europe was hardly unprecedented in NATO s history similar controversy surrounded NATO deliberations in the late 1950s and early 1960s That debate however subsided in the mid 1960s the nuclear question in Europe was relegated to the wilderness though efforts largely unavailing continued within official circles to define more clearly the role of nuclear weapons in NATO s defense Against this backdrop the nuclear debate emerged again in the 1970s This title unravels the military and political considerations at play in that debate and maps the European politics surrounding it Today it can be read in its historical context National Security, Military Power & the Role of Force in International Relations Army Library (U.S.),1976 **Intermediate-range Nuclear Forces in Europe** ,1982 **The Department of State Bulletin** ,1982 The official monthly record of United States foreign policy
