The Principles and Practice of Surveying Charles Blaney Breed, George Leonard Hosmer, 1908

The Oxford Handbook of Science Fiction Rob Latham, 2014

The Oxford Handbook of Science Fiction attempts to describe the historical and cultural contours of SF in the wake of technoculture studies. Rather than treating the genre as an isolated aesthetic formation, it examines SF's many lines of cross-pollination with technocultural realities since its inception in the nineteenth century, showing how SF's unique history and subcultural identity has been constructed in ongoing dialogue with popular discourses of science and technology. The volume consists of four broadly themed sections, each divided into eleven chapters.

Section I: Science Fiction as Genre considers the internal history of SF literature, examining its characteristic aesthetic and ideological modalities, its animating social and commercial institutions, and its relationship to other fantastic genres.

Section II: Science Fiction as Medium presents a more diverse and ramified understanding of what constitutes the field as a mode of artistic and pop cultural expression, canvassing extra-literary manifestations of SF ranging from film and television to videogames and hypertext to music and theme parks.

Section III: Science Fiction as Culture examines the genre in relation to cultural issues and contexts that have influenced it and been influenced by it in turn, the goal being to see how SF has helped to constitute and define important sub-cultural groupings, social movements, and historical developments during the nineteenth, twentieth, and twenty-first centuries.

Finally, Section IV: Science Fiction as Worldview explores SF as a mode of thought and its intersection with other philosophies and large-scale perspectives on the world from the Enlightenment to the present day.

The President's Parasite Jim Musgrave, 2006-06-06

In *The President's Parasite*, Jim Musgrave resurrects all that has gone missing in today's literature: originality. The title story is a Kafkaesque piece from the point of view of an intellectual tapeworm trapped inside a moronic president, and the satirical impact is worthy of Swift. The other stories range from a widower trapped inside the Clock Tower in Baghdad that he constructed to a baseball pitcher who becomes a living vegetable after a batted ball strikes his head. All in all, there is something for everyone in this collection of 30 eye-popping stories from a truly gifted author.

Saving The Planet By Design Ken Yeang, 2019-10-08

Can we save the Planet? For a resilient, durable, and sustainable future for human society, we need to repurpose, reinvent, redesign, remake, and recover our human-made world so that our built environment is benignly and seamlessly biointegrated with Nature to function synergistically with it. These are the multiple tasks that humanity must carry out imminently if there is to be a future for human society and all lifeforms and their environments on the Planet. Addressing this is the most compelling question for those whose daily work impacts on Nature, such as architects, engineers, landscape architects, town planners, environmental policy makers, builders, and others, but it is a question that all of humanity needs to urgently address. Presented here are two key principles as the means to carry out these tasks: ecocentricity.

being guided by the science of ecology and ecomimesis as designing and making the built environment including all artefacts based on the emulation and replication of the ecosystem concept Designing with ecology is contended here as the authentic approach to green design from which the next generation of green design will emerge going beyond current use of accreditation systems For those who subscribe to this principle this is articulated here showing how it can be implemented by design Adopting these principles is fundamental in our endeavour to save our Planet Earth and changes profoundly and in entirety the way we design make manage and operate our built environment

Hyperobject Reading, Scale Variance, and American Fiction in the Anthropocene Chingshun J. Sheu, 2023-03-25 This book proposes a model of reading called hyperobject reading that bridges the Anthropocene scale variance between humans and humanity by focusing on the large scale problems and phenomena themselves Hyperobject reading draws on narratology and reader response theory as well as newer developments such as the postcritical turn and object oriented ontology The theoretical introduction sets out the building blocks of hyperobject reading Chapter 2 intervenes in critical disability studies and debates about the ecosomatic paradigm Chapter 3 intervenes in debates about technological evolution analogue vs digital subjectivity and affect theory and Chapter 4 intervenes in debates about autofiction contemporary metafiction and the position and role of the narrator in first person narratives where the narrator and protagonist can be distinguished The analytical conclusion sketches the conceptual anatomy of the hyperobject and three possible responses No part of the Earth today is free from human influence but literary success suggests effective real world strategies
