Planetary Interest A New Concept For The Global Age:

The Planetary Interest: The vital planetary interest and legitimate global power, 1999 This text argues that the planet and humanity must be considered as a single entity for political decision making and problem solving planetary rather than national interest is introduced as a tool for solving global problems The Planetary Interest Kennedy Graham, 2003-09-02 This text suggests that contemporary political and institutional arrangements for problem solving based on sovereignty as a principle and the nation state as a decision making unit are not equipped to handle such problems and that concepts and methods of decision making are therefore needed to augment existing ones in dealing with the challenges of the 21st century Kennedy Graham argues that henceforth the planet and humanity must be considered as a single entity for decision making purposes He introduces and develops the idea of the planetary interest as a vital conceptual tool to assist citizens and policy makers in understanding emerging global problems and approaching them with global solutions The book includes contributions from 20 current or former politicians who discuss the particular global problems threatening their countries looking at the ways in which the planetary interest can help them pursue a legitimate national interest *The Sensorium of the Drone and Communities* Kathrin Maurer, 2023-10-03 A comprehensive overview of how civilian drones sense the world and how they build the aesthetic imaginaries of our communities Drone technology has garnered critical attention across many fields from engineering to the humanities While the first wave of drone scholarship was key in initiating the debate on drones it also privileged the idea of the scopic regime a militarized regime of hypervisuality in its analyses of the connection between vision and power The Sensorium of the Drone and Communities broadens the drone s spectrum of perception by acknowledging its creative life affirming possibility with the notion of the sensorium The sensorium of the drone is a multimedia synesthetic sensing assemblage in which the human agent is enmeshed with the drone Drone sensoria can sense in many more ways than the scopic regime with sound touch smell temperature and movement In The Sensorium of the Drone and Communities Kathrin Maurer shows how drone sensoria can change our understanding of human communities by constructing imaginaries of social communities based on decentralized and fluid sensing processes Maurer takes an aesthetic approach to technology working with two understandings of aesthetics One understanding refers to aesthetics as a way of experiencing and it explores how the drone human assemblage perceives the world The other refers to aesthetic mimetic representation and focuses on how aesthetic drone imaginaries in literature popular culture visual arts and films negotiate the sensorial technology of the drone Bringing together key ideas in technology studies studies of aerial views visual and aesthetic studies posthuman sensing machine human interaction and communities The Sensorium of the Drone and Communities sheds a welcome and necessary light on this technology s creative potential as well as its dangers and risks *Reading for the Planet* Christian Moraru, 2015-10-05 A critical methodology for dealing with planetarism s aesthetic and philosophical projections **Regional Security and Global**

Governance Kennedy Graham, Tânia Felício, 2006 A compelling study of the interaction between regional agencies and the UN Security Council that includes a proposal for a regional global security mechanism which should be of interest to policy makers worldwide This ground breaking exploration into how peace and security might best be attained in the 21st century its central message is the importance of realizing UN Secretary General Kofi Annan's vision of a regional global security mechanism within the next decade The book reviews the historical tussle between universalism and regionalism as the cornerstone of international security over the past century culminating in the new regionalism that has characterised international relations in recent decades The complexities of contemporary regional sub regional and other organizations blessed and burdened with overlapping membership evolving mandates and even shifting focal areas are analysed The multidimensional phenomenon of regional security is explored cultural political and legal with a view to understanding how regional organizations work today This book is one of those rare offerings a policy oriented prescription for peace and security that is based on factual analysis and creative reasoning It is a must for national diplomats regional officials and international civil servants

Education and Global Justice Michele Schweisfurth, Clive Harber, 2014-06-11 Education and Global Justice discusses key themes concerning the relationship between education and global justice in a varied series of highly relevant national contexts Major international issues such as war conflict and peace social justice and injustice multicultural education inclusion privatisation and democracy are explored in relation to the Middle East Colombia South Korea India Uganda and Pakistan An interdisciplinary approach is also taken to explore both the nature of global justice and the possibilities for education for global justice in the future Some of the contents of the book may surprise or even shock readers who like to think that education is inherently and solely a force for good in an unjust world Instead in discussing the realities resistances and challenges facing education for global justice the contributors show that education can be harmful to individuals and societies while maintaining a hopeful view of education's potential to contribute to greater global social justice This book was originally published as a special issue of Educational Review

Bromell,2019-10-31 This book identifies six ethical competencies for public leadership in contexts of pluralism While diversity in proximity generates conflict where people want and value different things the right kind of leadership and the right kind of politics can minimise domination humiliation cruelty and violence Written by a public policy advisor for fellow practitioners in politics and public life this book applies political theory and social ethics to identify a set of competencies being civil diplomatic respectful impartial fair and prudent to keep ethics at the centre of a pluralist democratic politics The six competencies are described in behavioural terms as personal resolutions They offer valuable tools for mentoring and professional development This book will appeal to politicians and those who advise them and anyone who engages in or aspires to public leadership whether in the public sector the private sector the community and voluntary sector or academia

Luc Reyhler: A Pioneer in Sustainable Peacebuilding Architecture Luc Reyhler,Arnim Langer,2020-05-07 This book provides a unique personal perspective on the field of peace research It not only highlights Luc Reyhler s significant contributions to the theory and praxis of sustainable peacebuilding but also offers important reflections on the evolution of peace research as an independent discipline The central concept of this book and of Reyhler s academic career for that matter is sustainable peacebuilding architecture Reyhler introduced this concept in order to draw attention to the architectural principles and considerations that have to be addressed in sustainable peacebuilding processes Reyhler s work on sustainable peacebuilding architecture has been groundbreaking and has not lost any of its relevance in the twenty first century By bringing together Reyhler s seminal texts on sustainable peacebuilding architecture the current book aims to offer academics students and policymakers an essential guide to understanding studying and applying this crucial concept Provides a unique personal view of the development of peace research Lists the necessary building blocks for sustainable peacebuilding Offers tools for monitoring and evaluating interventions Discusses the scientific nature and often provocative findings of peace research Discusses ten lessons learned and the future Peace Research III **Water, Peace, and War**

Brahma Chellaney,2013-04-11 This pioneering and authoritative study considers the profound impact of the growing global water crunch on international peace and security as well as possible ways to mitigate the crisis Although water is essential to sustaining life and livelihoods geostrategist Brahma Chellaney argues that it remains the world s most underappreciated and undervalued resource One sobering fact is that the retail price of bottled water is already higher than the international spot price of crude oil But unlike oil water has no substitute raising the specter of water becoming the next flashpoint for conflict Water war as a concept may not mesh with the conventional construct of warfare especially for those who plan with tanks combat planes and attack submarines as weapons Yet armies don t necessarily have to march to battle to seize or defend water resources Water wars in a political diplomatic or economic sense are already being waged between riparian neighbors in many parts of the world fueling cycles of bitter recrimination exacerbating water challenges and fostering mistrust that impedes broader regional cooperation and integration The danger is that these water wars could escalate to armed conflict

or further limit already stretched food and energy production Writing in a direct nontechnical and engaging style Brahma Chellaney draws on a wide range of research from scientific and policy fields to examine the different global linkages between water and peace Offering a holistic picture and integrated solutions his book promises to become the recognized authority on the most precious natural resource of this century and how we can secure humankind's water future **Doing International Research** Christopher Williams, 2015-05-15 This energetic and thought provoking book encourages a reflexive non-nationalistic approach to doing world research and sets out how to understand plan do and use this research Williams introduces a range of frameworks from desk based studies and traditional ethnography to the use of internet satellites robots drones and big data and provides exciting interdisciplinary examples This book is presented in a clear international style and uses creative approaches to researching peoples places and world systems It explains desk based research using international data including documentaries museum objects archives data sets and working with groups such as refugees tourists and migrants distance research using online videos surveys and remote methods such as video conferencing and crowdsourcing fieldwork abroad including ethnography street observation and mapping The book is also accompanied by a website with the following features For Students Weblinks for each chapter Examples summaries templates related to text marked with Additional thinking zones An overview of data capture technologies For Lecturers Copies of all the figures and thinking zones for use in teaching material PowerPoint slides for each chapter Built upon the foundations of the author's 30 years of research experience and including original case studies from international students this is an essential guide for anyone in the social sciences using or doing international and global research **Citizenship in a Global Age** Gerard Delanty, 2000-12-16 What is citizenship Is global citizenship possible Can cosmopolitanism provide an alternative to globalization Citizenship in a Global Age provides a comprehensive and concise overview of the main debates on citizenship and the implications of globalization It argues that citizenship is no longer defined by nationality and the nation state but has become de-territorialized and fragmented into the separate discourses of rights participation responsibility and identity Gerard Delanty claims that cosmopolitanism is increasingly becoming a significant force in the global world due to new expressions of cultural identity civic ties human rights technological innovations ecological sustainability and political mobilization Citizenship is no longer exclusively about the struggle for social equality but has become a major site of battles over cultural identity and demands for the recognition of group difference Delanty argues that globalization both threatens and supports cosmopolitan citizenship Critical of the prospects for a global civil society he defends the alternative idea of a more limited cosmopolitan public sphere as a basis for new kinds of citizenship that have emerged in a global age **A Cultural History of the Sea in the Global Age** Franziska Torma, 2023-02-09 In 1972 an image became an icon Blue Marble a photograph of the Earth as seen from outer space The picture features prominently the globe's water covered surface The ocean connects nature and culture in the modern world Within the time span of 100 years the sea changed its cultural

meaning from a dangerous place to an endangered environment This volume traces diverse processes of oceanic transformation in the Anthropocene it follows scientists seafarers diplomats and filmmakers from ship decks to the arenas of political decision making on land The essays lead from underwater dumping grounds to islands in the south pacific Tiny organisms like plankton and charismatic megafauna like whales accompanied the human voyages The presence of the animals challenges common notions of human culture The global age has to take non human agents into account to fully understand the cultural history of the seas **Making Enemies** R.
