**Child Protection in America** John E. B. Myers, 2006-06-29 In this vivid history of child protection in America John E B Myers analyzes recent reform proposals and introduces innovative policy strategies for reducing abuse and strengthening child protective services Arguing that the history of child protection is largely a success story this provocative new book will challenge all those concerned with children s welfare to move toward real solutions that will make life better for America s most vulnerable children  
**Children**, 1958  
**From Child Welfare to Child Well-Being** Sheila Kamerman, Shelley Phipps, Asher Ben-Arieh, 2009-10-23 This chapter provides a brief overview of the book highlighting the modest progress from child welfare to child well being reflected in these chapters and the parallel movement in Kahn s career and research as his scholarship developed over the years It then moves to explore the relationship between two overarching themes child and family policy stressing a universal approach to children and social protection stressing a more targeted approach to disadvantaged and vulnerable individuals including children and the complementarity of these strategies Introduction To a large extent Alfred J Kahn was at the forefront of the developments in the field of child welfare services protective services foster care adoption and family preservation and support  
Over time his scholarship moved to a focus on the broader policy domain of child and family policy and the outcomes for child well-being His work as is true for this volume progressed from a focus on poor disadvantaged and vulnerable children to a focus on all children He was convinced that children by definition are a vulnerable population group and that targeting all children employing a universal policy as a strategy would do more for poor children than a narrowly focused policy targeted on poor children alone As we first argued more than three decades ago Not for the Poor Alone Universalism and Income Testing in Family Policy one could target the most disadvantaged within a universal framework and this would lead to more successful results than targeting only the poor
