Richard J. Long

Planning Now For An Information Society Tomorrow Is Too Late:

Planning Now for an Information Society Science Council of Canada, 1982 Examines how and in what ways the new information technologies are transforming Canadian society The roles of government educational institutions and industry and the business community in this transition are examined **Information Technology** Raymond Plant, Francis Edward Coulton Gregory, Alan Brier, 1988 This volume records the processings of the Fulbright Colloquium on Information Technology The Public Issues which was held at the University of Southampton from Tuesday 16 September to Friday 29 September 1986 The Fulbright Commission in London felt that an Anglo American conference on this subject was particularly appropriate at this time Information technology IT has been at the forefront of informed debate on both sides of the Atlantic for a number of years and has been recognised as an issue of major importance in both countries affecting all strands of society **International Education as Public Policy in Canada** Merli Tamtik, Roopa Desai Trilokekar, Glen A. Jones, 2020-10-07 In the early twenty first century international education emerged as an almost ubiquitous concept within discussions of educational curriculum the objectives of schools universities and colleges and government policies for K 12 and higher education Although far from a new phenomenon many jurisdictions now view international education as a highly competitive global industry This book provides a comprehensive analysis of international education policy in Canada tracing the complex history of when how and why it emerged as a policy area of strategic importance Illuminating a uniquely Canadian perspective influenced by regional interests and federal provincial tensions International Education as Public Policy in Canada addresses challenging questions Why was Canada a latecomer in addressing this policy issue What is the relationship between international education and Canadian immigration policy How did international education develop as a major Canadian industry The resulting essays from leading scholars contribute not only to the growing Canadian literature on international education policy but also to a critical global conversation Contemplating where the Canadian story of international education is headed International Education as Public Policy in Canada calls for a broader debate on ethical practices in internationalization focusing on inclusion equity compassion and reciprocity *Media, Structures, and Power* Robert E. Babe, 2011-01-01 Containing introductions and contributions by other prominent scholars this volume situates Babe's work within contemporary scholarship and underscores the extent to which he is one of Canada's most prescient thinkers

Computer Technology and Employment Stephen G. Peitchinis, 1983-12-15 **Canadian Science, Technology, and Innovation Policy** G. Bruce Doern, David Castle, Peter W.B. Phillips, 2016-06-01 Canadian Science Technology and Innovation Policy presents new critical analysis about related developments in the field such as significantly changed concepts of peer review merit review the emergence of big data in the digital age and the rise of an economy and society dominated by the internet and information The authors scrutinize the different ways in which federal and provincial policies have impacted both levels of government including how such policies impact on Canada's natural resources They also study key government

departments and agencies involved with science technology and innovation to show how these organizations function increasingly in networks and partnerships as Canada seeks to keep up and lead in a highly competitive global system The book also looks at numerous realms of technology across Canada in universities business and government and various efforts to analyze biotechnology genomics and the Internet as well as earlier technologies such as nuclear reactors and satellite technology The authors assess whether a science and technology centred innovation economy and society has been established in Canada one that achieves a balance between commercial and social objectives including the delivery of public goods and supporting values related to redistribution fairness and community and citizen empowerment Probing the nature of science advice across prime ministerial eras including recent concerns over the Harper government's claimed muzzling of scientists in an age of attack politics Canadian Science Technology and Innovation Policy provides essential information for academics and practitioners in business and government in this crucial and complex field *New Office Information Technology* Richard J. Long, 2018-03-26 This book originally published in 1987 evaluates the human and managerial implications of new office information technology based on the actual experiences of organisations using the new technology A variety of issues are examined including those centred on the role of the manager productivity unemployment physical and mental health Major emphasis is placed on describing and discussing the implementation of new technology and ways of utilization which maximise benefits *Resources in Education*, 1984

Browsing Science Research at the Federal Level in Canada Brian B. Wilks, 2004-01-01 Wilks provides a historical background list of publications and description of activities for most of the major science initiatives undertaken at the federal level He surveys a wide range of government documents and monographic and serial science collections used by both faculty and students *Continentalizing Canadian Telecommunications* Vanda Rideout, 2003 In *Continentalizing Canadian Telecommunications* Vanda Rideout examines active political resistance to the radical neo liberal transformation of Canadian telecommunications that has been orchestrated by the federal government big business and their powerful lobbyists over the last two decades Rideout focuses on the protection of the public interest a crucial element neglected by most recent studies and shows that although alliances have been formed between labour consumers and public interest activists significant disagreements over issues such as free trade long distance and local competition and a targeted subsidy program for very low income Canadians have meant that this united front has not been able to counter the forces of the new neo liberal telecommunication policy regime *Continentalizing Canadian Telecommunications* details the complex relationships between the various corporate and government interests shows how the changes they brought about have locked Canada's telecommunications system into the orbit of the US system and discusses the implications this has for Canadians *The Social Significance of Telematics* Lars Qvortrup, 1984-01-01 The assumption underlying this book is that we are facing a societal transformation a silent revolution in fact with consequences at least as far reaching as those of the Industrial Revolution The author of this book wants to intervene in the current

discussion about this revolution a discussion which is normally colored by a resigned determinism maintaining that the transformation will come about all by itself as an automatic consequence of the development of technology As opposed to this the author wants to politicize the debate by insisting on the fact that this silent revolution is not inextricably tied to the automatically whirring computer discs of technological development but is dependent on a number of political choices

The Information Society Robin Mansell,2009 The information society refers to a constellation of developments arising from the growing use of communication technologies in the acquisition storage and processing of information and the role of information in supporting the creation and exchange of knowledge Research on information societies really began to take off in the 1970s when Daniel Bell wrote about the information age While there were earlier works that focused on the growing importance of information in the economy it was not until the mid 1990s and the spread of the Internet that this field of study experienced a huge expansion across a broad range of disciplines in the social sciences and beyond A critical mass of scholarship has now accumulated establishing the information society and information societies as a terrain of substance and complexity the exploration and understanding of which requires increasingly sophisticated navigation skills As research in and around the area continues to flourish as never before this new title in Routledge s Major Works series Critical Concepts in Sociology meets the need for an authoritative reference work to make sense of a rapidly growing and ever more complex corpus of literature and to provide a map of the area as it has emerged and developed over the last thirty years or so The Information Society is fully indexed and has a comprehensive introduction newly written by the editor which places the material in its historical and intellectual context It is an essential work of reference and is destined to be valued by scholars and students as well as policy makers and practitioners in the field as a vital one stop research resource Publisher s website
