Planning Support Systems In Practice:

Planning Support Systems in Practice Stan Geertman (géographe)., John Stillwell, 2003 Planning Support Systems Technologies that are Driving Planning Michael Batty Centre for Advanced Spatial Analysis CASA University College London 1 19 Torrington Place London WC 1 E 6BT United Kingdom I had always thought the term Planning Support Systems abbreviated to PSS had been coined by the father of land use modelling Britton Harris in his article Beyond Geographic Information Systems computers and the planning professional published in the Journal of the American Planning Association in 1989 Harris 1989 Until I asked him that is In a response to a paper he gave to the Urban and Regional Information Systems Association URISA in the summer of 1987 he told me that someone in the audience who he cannot quite remember actually coined the term referring to planning support systems as that constellation of digital techniques such as GIS which were emerging to support the planning process In fact the predecessor term decision support systems DSS from which this unknown originator obviously defined PSS by analogy was coined as far back as the late 1970s in the management literature for a loose assemblage of techniques usually computer based which aided management decisions The term slowly entered the geographical lexicon as spatial decision support systems SDSS and this is probably first attributable to Lew Hopkins and Mark Armstrong who used it in a paper published in AutoCarto 7 in 1985 Hopkins and Armstrong 1985 **Planning**

Support Systems in Practice Stan Geertman, John Stillwell, 2002-10-07 The first worldwide overview of Planning Support Systems PSS and their application in practice PSS are geo technology related instruments consisting of theories information methods tools et cetera for support of unique professional public or private planning tasks at any spatial scale The aim is to advance progress in the development of PSS which are far from being effectively integrated into the planning practice The text provides an Internet based worldwide inventory of innovative examples and successful applications of PSS in a number of different planning contexts In depth insights into the purposes content workings and applications of a very wide diversity of PSS are given **Planning Support Systems Best Practice and New Methods** Stan Geertman, John

Stillwell, 2009-05-01 Planning Support Systems Retrospect and Prospect It has been nearly twenty years since the term planning support systems PSS first appeared in an article by Britton Harris Harris 1989 and more than ten years since the concept was more broadly introduced in the academic literature Harris and Batty 1993 Batty 1995 Klosterman 1997 As a result the publication of a new book on PSS provides an excellent opportunity to assess past progress in the field and speculate on future developments PSS have clearly become very popular in the academic world This is the fourth edited book devoted to the topic following Brail and Klosterman 2001 Geertman and Stillwell 2003 and a third by Brail 2008 Papers devoted to PSS have been published in the leading planning journals and the topic has become a regular theme at academic conferences around the world it has even spawned intellectual offspring such as spatial planning and decision support systems SPDSS and public participation planning support systems PP PSS However as Geertman and Stillwell point out in

their introductory chapter the experience with PSS in the world of professional practice has been disappointing A substantial number of PSS have been developed but most of them are academic prototypes or one off professional applications that have not been adopted elsewhere **Encyclopedia of GIS** Shashi Shekhar,Hui Xiong,2007-12-12 The Encyclopedia of GIS provides a comprehensive and authoritative guide contributed by experts and peer reviewed for accuracy and alphabetically arranged for convenient access The entries explain key software and processes used by geographers and computational scientists Major overviews are provided for nearly 200 topics Geoinformatics Spatial Cognition and Location Based Services and more Shorter entries define specific terms and concepts The reference will be published as a print volume with abundant black and white art and simultaneously as an XML online reference with hyperlinked citations cross references four color art links to web based maps and other interactive features *Planning Support Systems Best Practice and New Methods* ,2009
