politics behind its privatisation Through an empirically based account of how neoliberalism has worked its way through the higher education sector in the fastest growing economy in the South Asian context it discusses how changes have been characterised by policy reforms massification and a sustained friction between control and autonomy in the university sector The authors take a nuanced approach to their geo political and onto epistemological positionalities as diasporic and hybridised scholars by rejecting epistemological exclusion inherent in the colonial present and research conducted in such contexts This position allows the reinforcement of a colonial present theorising from within Global South decolonial and postcolonial research literature This book contributes to discourses of globalisation from above and globalisation from below and sheds light on the often idiosyncratic ways in which higher education reform has unfolded in South Asia It will be of interest to comparative educators and those researching higher education policy and education developments in Global South nations
