

**You wouldn't plant a seed
and then dig it up
every few minutes
to see if it has grown.**

So why do you keep
questioning yourself,
your hard work and
your decisions?

Have patience,
stop overthinking
and keep watering
your seeds.

Cassandra Gorman,2021 An investigation into the remarkable poetics of the atom in English literary texts from the mid to late seventeenth century The early modern atom understood as an indivisible particle of matter captured the poetic imagination in ways that extended far beyond the reception of Lucretius and Epicurean atomism Contrarily to fears of atomisation and materialist threat many poets and philosophers of the period sought positive spiritual motivation in the concept of material indivisibility This book traces the metaphysical import of these poetic atoms teasing out an affinity between poetic and atomic forms in seventeenth century texts In the writings of Henry More Thomas Traherne Margaret Cavendish Hester Pulter and Lucy Hutchinson both atoms and poems were instrumental in acts of creating ordering and reconstructing knowledge Their poems emerge as exquisitely self conscious atomic forms producing intimate reflections on the creative power and indivisibility of self soul and God The book begins with a survey of the imaginative possibilities surrounding the early modern atom before considering the indivisible centres of the Cambridge Platonist Henry More s cosmic Spenserian poetics The focus then turns to the lyrical bond formed between atom and soul in the writings of Thomas Traherne and from there to the experimental sequences of Margaret Cavendish and Hester Pulter whose poetic spaces create new worlds and imagine alternative lives The book concludes with a study of Lucy Hutchinson s creation poem Order and Disorder which anticipates the regeneration of fallen being in atomic and alchemical terms **Nevada Poets 2009**

Moe distills his methodology as follows My work I point asserted the aphorism That s what I do To point the project integrates a wide range of interdisciplinary ideas including biosemiotics fractals phi trauma theory the Mandelbrot Set hyperobjects meditative chants Goethe s morphology Ramanujan s summation a spiderweb s sonic properties and Thoreau s sense of the plant like burgeoning force of an Atom in order to open up multiple trajectories In this context the volume foregrounds the insights of poets storytellers including Hillman Snyder Anzald a EEC okpik Whitman Dickinson Gladding Melville Morrison and Toomer for they are most attentive to that liminal moment when the vibratory hum in language and in the cosmos turns kinetic As this volume draws on a wide range of writers from many backgrounds it allows the myriad voices to engage with one another across differences in race gender and ethnicity These writers show us how to echo Dickinson the Freight Of a delivered Syllable can split and how the energy unleashed came from and points us back toward the energy un making the forms of Gaia The starting point for discussing the energy of a poem can no longer begin with the human rather Holding on explores how the poem s energy is but a sliver of a hyperobject massively distributed throughout the cosmos a sage energy that brings forth form
