Plant Closures Gilda Haas,1985 Presents the real causes of plant shutdowns mergers new technologies and worldwide domination of production by multinational corporations The Politics of Plant Closings John Portz,1990 A paper reprint of the 1988 original It is a political history that describes and analyzes the management of organized knowledge Wheatley takes Flexner and the Carnegie Foundation of 1910 as the model Portz political science Northeastern U combines a synthesis of the literature on urban politics and political economy with a close analysis of plant closings in Pittsburgh Pennsylvania Louisville Kentucky and Waterloo Iowa to illuminate the complexity of constraints upon and range of local government efforts to control the economic damage caused by shutdowns Paper edition unseen 12 95 Annotation copyrighted by Book News Inc Portland OR Workers' Response to Plant Closures Myrna Cherkoss Donahoe,1987 **Plant Closings** Dena Targ,2020-04-29

PLANT CLOSED A sign of the times These two words have had profound meaning for workers in every factory and office across the country Millions of workers who have already been displaced by closings have had to pick up the pieces of shattered lives and get on with the business of living Those who are still working are faced with the insecurity of wondering whether they might find the gates closed some morning when they arrive at work The number of plant closings and the threat of future closings have raised many questions What has been happening to the American economy that has resulted in major companies closing their doors What forces within the international and national political economies are converging to reshape the labor force eliminating jobs in manufacturing and expanding employment in the lower wage insecure manufacturing sector What happens to displaced workers their families and the community in which they work In Plant Closings the authors examine the reasons plants close and the social economic and psychological consequences A variety of causes are identified including capital flight decreasing profit rates and the pursuit of lower labor costs Through the analysis of a case study the authors examine the changing health patterns political attitudes and financial stability of displaced workers There is also discussion of the impact on the community at large and on the individual institutions within the community Finally the authors analyze legislation that addresses the human and social costs of unemployment Carolyn C Perrucci is professor of sociology in the Department of Sociology and Anthropology at Purdue University Robert Perrucci is professor of sociology in the Department of Sociology and Anthropology at Purdue University Dena B Targ is professor in the Department of Child Development and Family Studies at Purdue University Harry R Targ is professor in the Department of Political Science at Purdue University *Tyranny of the Bottom Line* Ralph W. Estes,1996 In a thought provoking proposal which maintains that corporations be held responsible to their customers employees and society as well as to their financial investors Estes lays out a plan to reform the corporate system which could result in a savings to society of up to 2.5 trillion

Global Production and Domestic Decay Brian D. Phillips,2021-12-12 First Published in 1942 Phillips has written an important study covering three areas three areas theoretical empirical and public policy This book explores some of the

explanations for and consequences of globalized production by transnational corporations A review of the theoretical underpinnings of the reasons for corporate overseas expansion precedes a discussion of transnational corporation overseas production facilities The literature reviewed supports the position that the exodus of manufacturing capital has been assisted by state policy which has encouraged capital flight and that corporate efforts to downsize manufacturing operations in the United States have added to corporate profitability and championed profits over the strengthening the domestic economy

Story Of Reo Joe Lisa Fine,2008-11-20 A collision of history and memory **Apartheid, Militarism and the U.S. Southeast** Ann Willcox Seidman,1990 **Beyond Survival** Cyrus Bina,Laurie M. Clements,Chuck Davis,2016-09-16 This text uses an innovative approach to the dynamics of labour s decline and proposes policy initiatives necessary for its revitalization The book emphasises the need for restructuring of capitalism on a global scale and challenges traditional economic and industrial relations wisdom **Work in America** Carl E. Van Horn,Herbert A. Schaffner,2003-12-15 The first comprehensive analysis of work and the workforce in the United States from the Industrial Revolution to the era of globalization This comprehensive two volume reference book is the first to analyze the central role of work and the workforce in U S life from the Industrial Revolution through today s information economy Drawing on a variety of disciplines economics public policy law human and civil rights cultural studies and organizational psychology its 256 entries examine key events concepts institutions and individuals in labor history Entries also tackle tough contemporary questions that reflect the conflicts inherent in capitalism What is the impact of work on families and communities On minority and immigrant populations How shall we respond to changing work roles and the growing influence of the transnational corporation Work in America describes and evaluates attempts to address social and class issues affirmative action occupational health and safety corporate management science and trade unionism and organized labor and offers the kind of comprehensive understanding needed to discover workable solutions *Insurgencies: Essays in Planning Theory* John Friedmann,2011-01-10 This collection of Friedmann s most important and influential essays tells a coherent and compelling story about how the evolution of thinking about planning over several decades has helped to shape its practice An ideal text for the study of planning theory and history each of the chapters is introduced by a brief essay to establish its context and importance and is followed by a series of study questions to help focus classroom discussions as well as suggested readings **Routledge Library Editions: Organizations (31 vols)** Various,2021-12-02 Re issuing volumes originally published between 1949 and 1995 this 31 volume set examines the theory and behaviour of organizations Topics covered include the sociology of work leadership and organizations politics at work theory and practice of company organization patterns of business organization company strategy and organizational design Seeking Spatial Justice Edward W. Soja,2013-11-30 In 1996 the Los Angeles Bus Riders Union a grassroots advocacy organization won a historic legal victory against the city s Metropolitan Transit Authority The resulting consent decree forced the MTA for a period of ten years to essentially reorient the mass transit system to

better serve the city's poorest residents. A stunning reversal of conventional governance and planning in urban America which almost always favors wealthier residents, this decision is also for renowned urban theorist Edward W. Soja, a concrete example of spatial justice in action. In *Seeking Spatial Justice*, Soja argues that justice has a geography and that the equitable distribution of resources, services, and access is a basic human right. Building on current concerns in critical geography and the new spatial consciousness, Soja interweaves theory and practice, offering new ways of understanding and changing the unjust geographies in which we live. After tracing the evolution of spatial justice and the closely related notion of the right to the city in the influential work of Henri Lefebvre, David Harvey, and others, he demonstrates how these ideas are now being applied through a series of case studies in Los Angeles, the city at the forefront of this movement. Soja focuses on such innovative labor community coalitions as Justice for Janitors, the Los Angeles Alliance for a New Economy, and the Right to the City Alliance, on struggles for rent control and environmental justice, and on the role that faculty and students in the UCLA Department of Urban Planning have played in both developing the theory of spatial justice and putting it into practice. Effectively locating spatial justice as a theoretical concept, a mode of empirical analysis, and a strategy for social and political action, this book makes a significant contribution to the contemporary debates about justice, space, and the city.

Latino Los Angeles Enrique C. Ochoa, Gilda L. Ochoa, 2005-11-01 As the twentieth-first century begins, Latinas/os represent 45 percent of the residents of Los Angeles County, making them the largest racial/ethnic group in the region. At the same time, the shift from manufacturing to a service-based economy in the area has contributed to a decline in good-paying jobs, significantly impacting working-class families. These transformations have created a backlash that has included state propositions impacting Latinas/os and escalating anti-immigrant rhetoric, and Latinas/os of all backgrounds are making their voices heard. Until recently, most research on Latinas/os in the U.S. has ignored historical and contemporary dynamics in Latin America, just as scholars of Latin America have generally stopped their studies at the border. This volume roots Los Angeles in the larger arena of globalization, exploring the demographic changes that have transformed the Latino presence in LA from primarily Mexican origin to one that now includes peoples from throughout the hemisphere. Bringing together scholars from a range of disciplines, it combines historical perspectives with analyses of power and inequality to consider how Latinas/os are responding to exclusionary immigration, labor, and schooling practices, and actively creating communities. The contributors examine Latinas/os in Los Angeles in the context of historical economic and social factors that have shaped the region. The first section provides contexts for understanding Latinas/o migration, with chapters focusing on such factors as U.S. economic and military domination, labor, and economic integration in the Americas, and Los Angeles economic history. The second section considers how various Latinas/o groups have settled and formed communities and interacted with the existing Mexican-origin populations, showing how Zapotecs, Salvadorans, and other peoples are remaking urban demographics. The final section on labor organizing and political activism examines the role of Latinas/o immigrants in such actions as the janitors strike and also

considers the contemporary role of students in political activism The volume concludes with an up to date compilation of contemporary scholarship on immigration the economy schools neighborhoods gender and activism as they relate to Central American and Mexican immigrants Reflecting a range of methodologies statistical historical ethnographic and participatory research this collection is relevant not only to ethnic studies but also to broader concerns in political science sociology history economics and urban studies In addition some chapters focus explicitly on women and gender issues are interwoven throughout the text Latino Los Angeles is an important work that contributes to contemporary scholarship on transnationalism as it reexamines the changing face of America s largest western metropolis *Fighting For Jobs* Bruce Nissen,1995-08-03 Examines the struggle of the unions and communities to save jobs in plant closing situations in the 1980s and shows why some labor community coalitions were more successful than others *The Church's Public Role* Dieter T. Hessel,2002-01-24 **Beyond the Ruins** Jefferson Cowie,Joseph Heathcott,2003 The immediate impact of deindustrialization the suffering inflicted upon workers their families and their communities has been widely reported by scholars and journalists In this important volume the authors seek to move discussion of America s industrial decline beyond the immediate ramifications of plant shutdowns by placing it into a broader social political and economic context Emphasizing a historical approach the authors explore the multiple meanings of one of the major transformations of the twentieth century The concept of deindustrialization entered the popular and scholarly lexicon in 1982 with the publication of *The Deindustrialization of America* by Barry Bluestone and Bennett Harrison *Beyond the Ruins* both builds upon and departs from the insights presented in that benchmark study In this volume the authors rethink the chronology memory geography culture and politics of industrial change in America Taken together these original essays argue that deindustrialization is not a story of a single emblematic place such as Flint or Youngstown or a specific time period such as the 1980s Nor is it limited to the abandoned factory buildings associated with heavy industry Rather deindustrialization is a complex process that is uneven in its causes timing and consequences The essays in this volume examine this process through a wide range of topics from worker narratives and media imagery to suburban politics environmental activism and commemoration **Reagan, Trilateralism, and the Neoliberals** Holly Sklar,1986 Demystifies U S foreign policy in the 80s and explores the policy options of rollback moderate containment and neoliberal containment Uses the example of Nicaragua to unravel pretexts for U S intervention throughout the Third World *Free Trade--myth Or Reality* United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on International Economic Policy,1984 **Folk Constructions of a Plant Closing** Donald L. Tuski,1998
