Norton,2014-07-14 For all persons seriously concerned about the destruction of natural environments in the contemporary world this book presents a comprehensive rationale for preserving wild species and ecosystems Bryan G Norton appeals most centrally to transformative value the power of human contacts with wild species to transform and uplift the human spirit Until now species preservationists have found a theoretical basis for their policies in the demand value of wild species for fulfilling certain narrowly defined human needs or in controversial and badly understood proposals about the intrinsic values of species This work examines such rationales and diverges from them by pointing to new sources of value for wild species they have worth because they can transform human values Because of the central role of biological diversity in environmental concerns the book also provides a fresh perspective on environmental ethics more generally Why Preserve Natural Variety is sponsored by the Center for Philosophy and Public Policy at the University of Maryland as was The Preservation of Species The Value of Biological Diversity which was edited by Professor Norton Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905      **The Great Reshuffling** Jeffrey A. McNeely,2001 While the issue of invasive alien species IAS has important biological components the human dimensions deserve much greater attention Humans with all their diversity of quirks strengths and weaknesses are at the heart of the problem of IAS and paradoxically also at the

heart of the solution This compilation of papers delivered during a workshop on the human dimensions of the IAS problem held in Cape Town South Africa on 15 17 September 2000 covers some of the many causes consequences and responses to this problem Progress in Botany H.-Dietmar Behnke,Karl Esser,Klaus Kubitzki,Michael Runge,Hubert Ziegler,2012-12-06

Elie,2020-06-22 This two volume book offers a panoramic explanatory narrative of Soqotra Island s rediscovery based on the global significance of its endemic biodiversity The first volume A Post Exotic Anthropology of Soqotra A Mesography of an Indigenous Polity in Yemen initiated the analytical inventory of the four key vectors of Soqotra s transition process through a discussion of the first two economic disarticulation and political incorporation This volume A Post Exotic Anthropology of Soqotra Cultural Environmental Annexation of an Indigenous Community completes the analytical inventory by exploring the other two pivotal vectors of transition cultural modernization and environmental annexation These two vectors encompass the critical sociocultural spheres and environmental domains in which Soqotra s transformation process is unfolding The origin of these vectors is situated within Soqotra s long history of exogenous mediations by external actors and their symbolic appropriation of the island into an imaginative geography The legacy is a symbolic curse which has made Soqotra into an ideal playground for fantasist cultural or environmental experiments Accordingly this volume undertakes first a systematic inventory of the communal effects engendered within the domains of cultural modernization dissonant linguistic attitudes alienating consumption practices divergent religious affiliations and differentiating economic aspirations Second it anatomizes the process of environmental annexation through the reconstruction of the formulation and implementation process of a biodiversity conservation and sustainable development experiment in which the island and its residents are appropriated into an anachronistic paradigm a pastoral ecotopia as a blueprint of their future
