Environmental Law and Contrasting Ideas of Nature Keith H. Hirokawa, 2014-07-17 This book examines how nature is constructed through law building on the constructivist concept that nature is a self-perpetuating self-reinforcing social creation *Automotive Industries*, 1915 Unmoored Yet Unbroken Susan Bodnar, Chrystal L. Dunker, Jean Kayira, 2025-11-04 Unmoored Yet Unbroken is less a final statement than a generative offering. It gathers voices from around the world many early in their careers who are working to articulate what it means to live and practice in an ecologically disoriented age. What emerges is a collective engagement with resilience not as simple endurance but as a relational process a network of care that spans people, cultures and ecologies and leads to the deepening transformation of self. An important contribution to the ecopsychology literature. PETER H. KAHN Jr Professor of Psychology and Environmental and Forest Sciences University of Washington author of *Technological Nature: Adaptation and the Future of Human Life*. A rich tapestry of global narratives that highlights the psychological impact of environmental changes. Unmoored Yet Unbroken explores the intricate relationship between humans and the natural environment. With stories and observations from urban, suburban, rural and wild environments this book challenges ethnocentric perspectives and emphasizes our deep interdependence with the natural world. Protecting and stabilizing this relationship is vital for our mental health and essential in the broader fight against climate change. This book uncovers the psychological challenges arising from our increasing disconnection from the natural world through a blend of diverse personal narratives, clinical insights and cultural analysis. It addresses the urgent need to understand how environmental changes impact mental health in every community. By deepening our understanding of how climate change influences the human psyche Unmoored Yet Unbroken offers an essential perspective for scholars, students, activists and general readers. Explore the clinical implications of ecological change and how they differ globally. Get a well-rounded perspective grounded in clinical evidence, personal stories, interviews and survey results. Understand how ecological changes impact marginalized communities in urban and rural settings. This book addresses gaps in existing literature and offers insights into the unique challenges marginalized groups face in environmental changes. **The Plant-Based Power Plan** TJ Waterfall, 2021-01-07 HOW A PLANT-BASED DIET IMPROVES PERFORMANCE AND HOW TO DO IT YOURSELF. Wood,Jerime L. Kellermann,2015-01-15 Bird migration is a well researched phenological event However few studies in North America have investigated the effects of climate change and extreme weather on the relationships of migratory avian species and their seasonal resources This is a critical gap in knowledge that limits our ability to prioritize management and conservation applicat History of the Earth and Animated Nature Oliver Goldsmith,1859

Ecological Restoration and the U.S. Nature and Environmental Writing Tradition Laura Smith,2022-01-12 This book presents a critical history of the intersections between American environmental literature and ecological restoration policy and practice Through a storying restorying restoring framework this book explores how entanglements between writers and places have produced literary interventions in restoration politics The book considers the ways literary landscapes are politicized by writers themselves and by conservationists activists policymakers and others in defense of U S public lands and the idea of wilderness The book profiles five environmental writers and examines how their writings on nature wildness wilderness conservation preservation and restoration have variously inspired and been translated into ecological restoration programs and campaigns by environmental organizations The featured authors are Henry David Thoreau 1817 1862 at Walden Pond John Muir 1838 1914 in Yosemite National Park Aldo Leopold 1887 1948 at his family s Wisconsin sand farm Marjory Stoneman Douglas 1890 1998 in the Everglades and Edward Abbey 1927 1989 in Glen Canyon This book combines environmental history literature biography philosophy and politics in a commentary on considering and developing environmental literature s place in conversations on restoration ecology ecological restoration and rewilding **Boiling Point** Ross Gelbspan,2008-03-31 In Boiling Point Ross Gelbspan argues that unchecked climate change will swamp every other issue facing us today Indeed what began as an initial response of many institutions denial and delay has now grown into a crime against humanity The fossil fuel industry is directing the Bush administration s energy and climate policies payback for helping Bush get elected But they re not the only ones to blame the media and environmental activists are

unwittingly worsening the crisis In his new introduction Gelbspan reveals that the outlook isn't getting better The climate continues to change with increasing acceleration hurricanes devastated Florida rainfall patterns left two million people starving in Kenya 2004 was the fourth hottest year on record At the same time the coal industry was planning to sabotage an effort in the Senate to begin to regulate carbon dioxide Officials of Switzerland France and Canada said last year that when the Kyoto Protocol takes effect they intend to take the United States to court under the World Trade Organization reasoning that the U S's refusal to lower their carbon emissions amounts to an illegal subsidy a carbon subsidy on its exports With the reelection of George W Bush and a Republican controlled congress Boiling Point is more imperative than ever Both a passionate call to arms and a thoughtful roadmap for change Gelbspan reveals what's at stake for our fragile planet

Sparing Nature Jeffrey K. McKee, 2003-01-03 Are humans too good at adapting to the earth's natural environment Every day there is a net gain of more than 200 000 people on the planet that's 146 a minute Has our explosive population growth led to the mass extinction of countless species in the earth's plant and animal communities Jeffrey K McKee contends yes The more people there are the more we push aside wild plants and animals In Sparing Nature he explores the cause and effect relationship between these two trends demonstrating that nature is too sparing to

accommodate both a richly diverse living world and a rapidly expanding number of people The author probes the past to find that humans and their ancestors have had negative impacts on species biodiversity for nearly two million years and that extinction rates have accelerated since the origins of agriculture Today entire ecosystems are in peril due to the relentless growth of the human population McKee gives a guided tour of the interconnections within the living world to reveal the meaning and value of biodiversity making the maze of technical research and scientific debates accessible to the general reader Because it is clear that conservation cannot be left to the whims of changing human priorities McKee takes the unabashedly neo Malthusian position that the most effective measure to save earth s biodiversity is to slow the growth of human populations By conscientiously becoming more responsible about our reproductive habits and our impact on other living beings we can ensure that nature s services will make our lives not only supportable but also sustainable for this century and beyond
