Plastic Deformation Of Polymers:

Plastic Deformation of Polymers Anton Peterlin, 1971 **Plastic Deformation of Polymers: Selected Papers Presented at the American Chemical Society Symposium... New York, Sept. 10-11 1969** new york Symposium on plastic deformation of polymers, 1971 **Physics and Mechanics of Amorphous Polymers** Jo Perez, 2018-04-27 Topics covered in this text include structural aspects of polymers molecular mobility in amorphous solid polymers non elastic deformation of solid amorphous polymers mechanical experiments interpretation of results physical ageing of amorphous polymers and glass transition **Plastic deformation of polymers** Anton Peterlin, 1971 *Plastic Deformation of Polymers* , 1971 **Plastic Deformation of Polymers** Wen Li Wu, 1972 **The Mechanisms of Plastic Deformation of Polymers and Their Rate Dependence** , 1973 A research program directed toward gaining an understanding of the molecular mechanisms of large strain deformation in glassy and crystalline polymers has been carried out The investigation encompassed two types of experimental procedures deformation experiments on bulk polymers to determine the thermal activation parameters of the rate limiting step of the deformation process and microscopic examination of deformed samples to determine what types of molecular motions had taken place Macroscopic deformation experiments were performed of polycarbonate and polyethylene Activation enthalpies shear activation volumes and dilatation activation volumes were determined for each polymer Microscopic studies were performed on extended chain crystalline polyethylene which had a spherulitic structure Deformation was found to occur on discrete shear bands The spherulitic structure did not seem to strongly affect the deformation Microscopic examination revealed that deformation could take place by intralamellar slip in any direction on any plane parallel to the direction of the molecules by interlamellar shear and by formation of kinks The behavior of shear bands in polycarbonate is also discussed and a technique for producing metallic replicas of polymer surfaces is described **Selected Papers on Plastic Deformation of Polymers** American Chemical Society. Division of Polymer Chemistry, 1970 **Plastic Deformation of Polymers** Anton Peterlin, American Chemical Society, 1971 **Plastic Deformation of Polymers** A. Peterlin, 1971 **Synthesis and Properties of Polymers** Gennadii Efremovich Zaikov, 1996 *Synthesis Properties Of Polymers* *Characterization and Failure Analysis of Plastics* ASM International, Steve Lampman, 2003-01-01 The selection and application of engineered materials is an integrated process that requires an understanding of the interaction between materials properties manufacturing characteristics design considerations and the total life cycle of the product This reference book on engineering plastics provides practical and comprehensive coverage on how the performance of plastics is characterized during design property testing and failure analysis The fundamental structure and properties of plastics are reviewed for general reference and detailed articles describe the important design factors properties and failure mechanisms of plastics The effects of composition processing and structure are detailed in articles on the physical chemical thermal and mechanical properties Other articles cover failure mechanisms such as crazing

and fracture impact loading fatigue failure wear failures moisture related failure organic chemical related failure photolytic degradation and microbial degradation Characterization of plastics in failure analysis is described with additional articles on analysis of structure surface analysis and fractography *Symposium on Plastic Deformation of Polymers* ,1970

PLASTIC DEFORMATION OF POLYMERS- SYMPOSIUM- PAPERS- ACS. , Structure and Properties of Multiphase Polymeric Materials Takeo Araki,Mitsuhiro Shibayama,Qui Tran-Cong,1998-03-03 Offers an overview of recent advances in multiphase polymeric materials ranging from theoretical aspects of polymer miscibility and phase separation kinetics to bulk surface and interface properties in polymeric materials This work considers the possibility of a nondestructive methodology to investigate multiphase polymers based mainly on a scattering technique that is sensitive to changes in the phase behaviour of multicomponent polymer systems *Deformation and Fracture of High Polymers* H. Kausch,2013-06-29 *Progress in Understanding of Polymer Crystallization* Günter Reiter,Gert R. Strobl,2007-02-05 In the context of polymer crystallization there are several still open and often controversially debated questions The present volume addresses issues such as novel general views and concepts It presents new ideas in a connected and accessible way The intention is thus not only to provide a summary of the present state of the art to all active works but to provide an entry point to newcomer and graduate students entering the field *Relaxation in Physical and Mechanical Behavior of Polymers* Maxim Arzhakov,2019-01-30 Explores the nature of relaxation phenomena in polymers on the basis of time temperature equivalence Its role in the physical and mechanical behavior of polymers materials and fundamentals of thermoplastics processing are discussed Four appendixes detail thermo mechanical methods to study relaxation in polymers structure of both amorphous and semi crystalline polymers and unified approach to describe deformation of polymeric materials

Mechanical Properties of Polymers based on Nanostructure and Morphology G. H. Michler,F. J. Balta-Calleja,2016-04-19 The improvement of strength and durability in polymers has implications relevant to industrial medical and household applications Enhanced by the improved knowledge of the interactions between complex hierarchical structures and functional requirements Mechanical Properties of Polymers Based on Nanostructure and Morphology focuses on new polymeric materials Plastic Deformation of Polymers ,1971
