Pitanguy, 2012-12-06 My aim in writing this book is to present the truth regarding the methods of aesthetic plastic surgery of the head and body the truth as I have come to perceive it in the course of more than 20 years experience in the field After this long period of quiet sedimentation and elaboration of gradual accumulation of thoughts and ideas I feel the urge to share with my colleagues especially the younger surgeons amongst them the fruits of my experience Although the procedures used in aesthetic plastic surgery when I entered the specialty two decades ago have since evolved the basic principles have remained the same Time has given me the opportunity to improve my own techniques as well as to benefit from the work of many others who have also contributed to the progress of the specialty This long process of maturation endangers the contemporariness of a work such as this but I have taken great pains to create a detailed up to date presentation enhanced by step by step illustrations of the surgical procedures that in my hands have been of value With regard to the accomplishment which this work represents I would first like to acknowledge the help of my former teachers Dr

Path-Breaking Work in Plastic and Reconstructive Microsurgery Doina Dumitrescu-Ionescu, 2020-02-25

Path Breaking Work in Plastic and Reconstructive Microsurgery by Dr Doina Dumitrescu Ionescu was reviewed by David Soutar for The Royal College of Surgeons of England This is a refreshingly original and unusual text It is a testament to the life work of the author and her struggle to develop clinical microsurgery in Rumania It takes the reader on a journey starting with learning the basic techniques of microsurgery laboratory and experimental research teaching and training It then progresses to the building of an infrastructure for development and clinical practice the maintenance of meticulous records and the evaluation of results As such the book is a very personal account written in an informal style so that the reader can follow the author's own development and experience The format is unusual beginning with the author's philosophy for developing reconstructive microsurgery It then covers personal techniques developed for peripheral techniques developed for peripheral nerve repairs and microvascular anastomosis It is clear from early on in this book that the author's main interest lies in the management of peripheral nerves particularly in the limbs There is a section on reconstructive microsurgery of the brachial plexus following trauma and a section on limb replantation Says the author The reconstructive microsurgery experience helped me to modernize reparative plastic surgery in Romania in reconstructive plastic surgery and reconstructive microsurgery by radically changing the surgical approach This allowed also for new procedures in Dupuytren's Disease Volkmann and post burn contractures approach revolutionizing everything that was repair surgery of any extremity cephalic superior inferior but also the extension of reconstructions in the large defects of supraskeletal soft parts
