Michael Alvarez, Thad E. effects of information and communication technology ICTs upon political action and processes Explores a range of concepts and topics underpinning e government in Europe the degree to which e government translates into genuine reform of government and public administration the dual role of the EU as both a provider of e government through its own internal activities and also as a facilitator or aggregator in the way it seeks to engender change and promote its ethos in member states across the EU cyberterrorism and its use both by terrorists and governments to pursue political agendas Featuring in depth case studies on the progress of e government in the UK France Germany Denmark The Netherlands Portugal Greece Slovenia Hungary and Estonia These case studies address the above issues whilst at the same time highlighting commonality and diversity in practice and the paradox between top down strategies and the effort to engage wider civil participation via e government e Government in Europe will be of interest to students and scholars of public policy politics media and communication studies computing and information and communications technologies and European studies Statecraft and Election Administration T. James, 2012-07-31 The way in which elections are run is changing as radical reforms or experiments have been introduced across the world This book establishes why election administration might be used by political elites to win and maintain power It identifies the role of elite interests in shaping election administration in USA UK and Ireland Handbook of Digital Politics Stephen Coleman, Deen Freelon, 2015-05-29 It would be difficult to imagine how a development as world changing as the emergence of the Internet could have taken place without having some impact upon the ways in which politics is expressed conducted depicted and reflected upon The Handbook o Technology Paul S. Herrnson, Richard G. Niemi, Michael J. Hanmer, 2009-03-19 Voting difficulties hung over America s presidential election in 2000 like a dark cloud Hanging chads a butterfly ballot and the Supreme Court remain the most vivid memories of that political donnybrook Passage of 2002 s Help America Vote Act sparked further interest in the physical process of casting a ballot yet several recent contests still produced confusion at the polls A solution to at least some of those problems may be found in new technology but such innovations carry their own concerns and questions V oting Technology is the first book to investigate in a scientific and authoritative manner how voters respond to the new equipment The authors an interdisciplinary group of experts in American elections political behavior human computer interaction and human factors psychology assess five commercially available voting systems each one representing a specific class based on shared design principles as well as a prototype system not currently available. They evaluate the systems against different criteria including ease of use speed and accuracy using field experiments laboratory experiments and expert reviews The results reveal the good and bad about the new systems including specific features that contribute to clarity confusion or error Going beyond the concern with spoiled ballots they determine whether voters actually cast their ballots for the candidates they intended to support They address fundamental questions of whether voters like and trust the equipment and whether the various systems are equally usable by all voters Their research also opens up an entirely new line of inquiry by asking about the interaction

between ballot format and voter behavior The concluding chapter pulls together best practices that will guide manufacturers of voting systems ballot designers election officials political observers and of course voters In a political system based on free Social Inclusion: Societal and Organizational Implications for Information Systems exercise of personal choice the least w Eileen Trauth, Debra Howcroft, Tom Butler, Brian Fitzgerald, Janice DeGross, 2006-09-13 Changes in society resulting from the pervasiveness of information technology have produced positive and negative intended and unintended consequences Key among them is the exclusion of individuals who lack access to technological resources from various societal processes and services The theme of this book social inclusion explores the many dimensions of this exclusion This issue has been the focus of much debate within the social sciences yet has largely been underresearched in the Information Systems field despite our concerns with the social and organizational aspects of technology To the extent that contemporary debates have identified access to information as a key component of poverty digital exclusion is seen as the problem Thus ICTs are portrayed as either exacerbating exclusion or are presented as the solution for greater inclusion. This conference will provide us with the opportunity to build upon our strong tradition of studying technology design and use in organizations and expand our field of enquiry to consider the processes that engender social exclusion and the issues that derive from it This theme invites consideration of social and organizational constraints that result in the underrepresentation of certain groups and by implication certain issues Likewise it invites consideration of emerging technologies that have the potential to alter social political and economic relations Much is being written about the ubiquitous nature of ICTs to change society for example open source software has recently emerged as a concept with implications far beyond the technology domain This suggests that the role of ICTs in addressing social exclusion is far more complex than often thought For this reason it is timely to expand our focus and progress the study of IS beyond the organizational level of analysis so that we may consider wider concerns affecting all citizens This book contains the proceedings of the Working Conference on the societal and organizational implications for information systems of social inclusion This conference sponsored by the International Federation for Information Processing Working Group 8 2 was held in Limerick Ireland July 12 15 2006 *E-Government:* Towards Electronic Democracy Michael Böhlen, Johann Gamper, Wolfgang Polasek, Maria A.
