**Disability and the Environment in American Literature** Matthew J. C. Cella, 2016-10-12 This book includes a collection of essays that explore the relationship between Disability Studies and literary ecocriticism particularly as this relationship plays out in American literature and culture The contributors to this collection operate from the premise that there is much to be gained for both fields by putting them in conversation and they do so in a variety of ways In this manner the collection contributes to what Joni Adamson and Scott Slovic have referred to as a third wave of ecocriticism Adamson and Slovic attribute the rise of this third wave to the richly diverse contributions to ecocriticism over the past decade by scholars intent on including postmodernism ecofeminism transnationalism globalization and postcolonialism into ecocritical discussions The essays in *Toward an Ecosomatic Paradigm* extend this approach of this third wave by analyzing disability from an environmental point of view while simultaneously examining the environmental imagination from a disability studies perspective More specifically the goal of the collection is to investigate the role that literary narratives play in fostering the ecosomatic paradigm As a theoretical framework the ecosomatic paradigm underscores the dynamic and inter relational process wherein human mind bodies interact with the places both built and wild they inhabit That is the ecosomatic paradigm proceeds from the assumption that nature and culture are meshed in an ongoing and deep relationship that has implications for both the human subject and the natural world An ecosomatic approach highlights the profound overlap between embodiment and emplacement and is therefore enriched by both disability studies and ecocritical insight By drawing on points of confluence between disability studies and ecological criticism the various ecosomatic readings in this collection challenge normative even ableist constructions of the body environment dyad by complicating and expanding our understanding of this relationship as it is represented in American literature and culture Collectively the essays in this book augment the American environmental imagination by highlighting the relationship between disability and the environment as reflected in American literary texts across multiple periods and genres

**The Visionary State** Erik Davis, 2006-06-22 With a rich cultural history and Hollywood stars publicly attesting to a wide range of faiths it s no surprise that California s spiritual landscape is as diverse as its natural surroundings The Visionary State weaves text and image into a compelling narrative of religion architecture and consciousness in California from neopaganism to televangelism UFO cults to austere Zen Buddhism Acclaimed culture critic Erik Davis brings together the immigrant and homegrown religious influences that have been part of the region s character from its earliest days drawing connections between seemingly unlike traditions and celebrating the diversity of California s spiritual composition Michael Rauner s evocative photographs depict the sites and structures where these traditions have taken root and flourished The Visionary State is a landmark look at what is likely the

was drawn indelibly together by a search for truth and spirituality but while yearning to be filled with God's light they were pulled dangerously toward a manipulative cult They eventually disengage themselves from the guru and reclaim control of their lives putting their love for each other before the cult's increasingly strenuous demands Space Between the Stars is a moving account of self discovery rendered in raw beautiful prose by a woman whose heart has remained pure even in times of despair As Deborah Santana talks frankly about her lifelong fight against racial injustice and her deep seated loyalty to her family ultimately it is the struggle to remain a spiritual and artistic force in her own right in the shadow of one of the world's most revered musicians that shines through as her most indomitable pursuit
