*Ethnobotany* Hans Dieter Neuwinger, 1996 **Poison Arrows** David E. Jones, 2022-02-24 A comprehensive survey of organic compounds used as poisons on arrows and spears in food and even as insecticides by numerous Native American tribes Biological warfare is a menacing twenty first century issue but its origins extend to antiquity While the recorded use of toxins in warfare in some ancient populations is rarely disputed the use of arsenical smoke in China which dates to at least 1000 BC for example the use of poison arrows and other deadly substances by Native American groups has been fraught with contradiction At last revealing clear documentation to support these theories anthropologist David Jones transforms the realm of ethnobotany in *Poison Arrows* Examining evidence within the few extant descriptive accounts of Native American warfare along with grooved arrowheads and clues from botanical knowledge Jones builds a solid case to indicate widespread and very effective use of many types of toxins He argues that various groups applied them to not only warfare but also to hunting and even as an early form of insect extermination Culling extensive ethnological historical and archaeological data Jones provides a thoroughly comprehensive survey of the use of ethnobotanical and entomological compounds applied in wide ranging ways including homicide and suicide Although many narratives from the contact period in North America deny such uses Jones now offers conclusive documentation to prove otherwise A groundbreaking study of a subject that has been long overlooked *Poison Arrows* imparts an extraordinary new perspective to the history of warfare weaponry and deadly human ingenuity A unique contribution to the field of American Indian ethnology This information has never been compiled before and I doubt that many ethnologists in the field have ever suspected the extent to which poison was used among North

**Empire of the Beetle** Andrew Nikiforuk,2011 Beginning in the late 1980s a series of improbable bark beetle outbreaks unsettled iconic forests and communities across western North America An insect the size of a rice kernel eventually killed more than 30 billion pine and spruce trees from Alaska to New Mexico Often appearing in masses larger than schools of killer whales the beetles engineered one of the world s greatest forest die offs since the deforestation of Europe by peasants

between the eleventh and thirteenth centuries The beetle didn't act alone Misguided science out of control logging bad public policy and a hundred years of fire suppression created a volatile geography that released the world's oldest forest manager from all natural constraints Like most human empires the beetles exploded wildly and then crashed leaving in their wake grieving landowners humbled scientists hungry animals and altered watersheds Although climate change triggered this complex event human arrogance assuredly set the table With little warning an ancient insect pointedly exposed the frailty of seemingly stable manmade landscapes And despite the billions of public dollars spent on control efforts the beetles burn away like a fire that can't be put out Drawing on first hand accounts from entomologists botanists foresters and rural residents award winning journalist Andrew Nikiforuk investigates this unprecedented beetle plague its startling implications and the lessons it holds [Burn My Heart](#) Beverley Naidoo,2007-07-05 The Mau Mau the name of a secret society that once struck terror into the hearts of British settlers in Kenya An episode in history that ended in a State of Emergency with violent and brutal acts dividing a nation This is an intensely personal and vivid story of two boys one black one white Once they were friends even though their circumstances are very different But in a country driven by fear and prejudice even the best of friends can betray one another Internationally acclaimed and award winning author Beverley Naidoo explores new territory in this beautifully realized and moving story set in Britain's colonial past **White Bone** Ridley Pearson,2017-06-27 John Knox and Grace Chu the incomparable duo of the Risk Agent novels team up again in the latest international thrill ride from New York Times bestselling author Ridley Pearson When ex military contractor John Knox receives a text from partner Grace Chu warning that she fears her cover may have been blown while on assignment he jumps into action Knox must locate her overseas handlers convince them of the threat and then attempt to retrace the well hidden steps of a woman who had been attempting to determine how one million euros worth of AIDS vaccine disappeared all while eluding angry poachers on a parallel trail Corruption isn't a problem in Kenya it's the way of doing business The poaching of ivory from African elephants driven by insatiable demand from mainland China fuels constant blood and slaughter Knox faces police national rangers journalists and safari companies who are each in their own symbiotic relationship with elephants both good and bad As the threat from Al Shaabab militants interferes with his pursuit of Grace Knox finds himself pitted against the most savage and suicidal fighters in the world And there's this woman Grace always in his head His gut As Grace watches as her civilized self slips away while abandoned in the bush Knox races against the clock to find her **Green Saviours of the Earth V.** Sundararaju,2024-09-05 Heritage trees that have withstood the test of time play a major role in preserving the environment and promoting sustainability These arboreal treasures act as Green Saviours of the Earth contributing to ecological balance biodiversity conservation and climate mitigation In this book the multifaceted ways in which heritage trees fulfill their role as guardians of the environment have been analyzed emphasizing their significance in sustaining life on earth Recognizing the importance of these ancient giants is crucial for the well being of the planet As stewards of the Earth it is our responsibility
