AN Optimist's Tour of the Future Mark Stevenson, 2011-02-03 In the tradition of Bill Bryson's A Short History of Nearly Everything a smart and entertaining guide to the future of civilization. When unexpectedly confronted with his own mortality Mark Stevenson a writer deep thinker and stand up comedian began to ponder what the future holds for our species. The past is a foreign country writes Stevenson. By my analysis it's a bit like France in that I've been to parts of it and eaten some nice food there. But the future The future is an unknown territory and there isn't a guidebook. Thus his ambition was born. Stevenson set out simply asking What's next and then traveled the globe in pursuit of the answers. Along the way he visited the Australian outback to visit the farmers who can save us from climate change met a robot with mood swings and talked to the Spaniard who's putting a hotel in space. While some might be overwhelmed or even dismayed by the looming realities of genome sequencing synthetic biology a nuclear renaissance and carbon scrubbing Stevenson remains well optimistic. Drawing on his singular humor and storytelling to break down these sometimes complicated discoveries An Optimist's Tour of the Future paints a wonderfully readable and completely enthralling portrait of where we'll be when we grow up and why it's not so scary.
