Poland's Jump to the Market Economy Jeffrey Sachs, 1993 In Poland's jump to the Market Economy Jeffrey Sachs provides an insider's analysis of the political events and economic strategy behind the country's swift transition to capitalism and democracy The greatest challenges to economic reform Sachs points out have been primarily political in nature rather than social or even economic Sachs reviews Poland's striking progress since the start of the economic reforms three years ago which he helped to design He discusses the gains more than half of employment and GDP is now in the private sector exports to Western Europe have more than doubled and economic growth and confidence are returning as well as the serious problems that remain high unemployment a chronic fiscal deficit the slow pace of privatization of large industrial enterprises and the fragility of multiparty coalition governments Sachs points out that leadership is crucial to economic reform in a newly

democratic setting as is the West's timely economic assistance. In Poland's case the Zloty Stabilization Fund and the two stage debt cancellation have been essential to keeping the reform program on track. Poland's example has had a powerful impact on reforms throughout the region including the former Soviet Union and has done much to dispel the fear that the citizens themselves allegedly made lazy by decades of socialism would reject the competitive rigors of a market economy. Overall Sachs remains firmly convinced of the potential for successful economic reforms in Poland and the rest of the region.

Jeffrey Sachs is Galen L. Stone Professor of International Trade at Harvard University and has been an economic advisor to more than a dozen countries around the world including Bolivia, Mongolia, Poland, and Russia. *IIHF where Countries Come to Play* IIHF (Int'l Ice Hockey Federation), 2011. Local Politics in Communist Countries Daniel N. Nelson, 1980-01-01. There are many reasons why it is important to study local politics: political culture, government, political process in Communist party states. As in all politics, local politics in Communist party states are the political articulation of the local community. This is the political arena where policies concerning local issues are formulated by the officials. This is where the officials are approached by citizens with their particular demands. This is where citizens articulate their preferences, aspirations, and values through political participation. And this is where officials, both elected and appointed, are recruited. In this volume, Daniel N. Nelson has assembled a team of international scholars to consider local politics in Communist party states including the U.S.S.R., China, Poland, Yugoslavia, and Romania. Together they explore how local social and political forces are articulated in the national and party organizations; they also reveal how the study of comparative local politics provides vitality for the study of national politics. Rather than treating local communities as receivers and translators

of national inputs the contributors demonstrate that the local dimension and national politics mutually influence one another and illuminate the social reality in communist societies *International Population Statistics Reports* United States.
