McCord explores urgent questions about the destruction of species and provides a new framework for appreciating and defending every form of life The book draws insights from philosophy ethics law and biology to arrive at a new way of thinking about the value of each species on earth With meticulous reasoning McCord demonstrates that the inherent value of species to humanity is intellectual individual species are phenomena of such intellectual moment so interesting in their own right that they rise above other values and merit enduring human embrace The author discusses the threats other species confront and delineates the challenges involved in creating any kind of public instrument to protect

species No other scholar has advocated on behalf of biodiversity with such eloquence and passion and none provides greater inspiration to defend nonhuman forms of life Electric Animal Akira Mizuta Lippit, 2000-05-01 Differentiation from animals helped to establish the notion of a human being but the disappearance of animals now threatens that identity This is the argument underlying Electric Animal a probing exploration of the figure of the animal in modern culture Akira Mizuta Lippit shows us the animal as a crucial figure in the definition of modernity essential to developments in the natural sciences and technology radical transformations in modern philosophy and literature and the advent of psychoanalysis and the cinema Moving beyond the dialectical framework that has traditionally bound animal and human being Electric Animal raises a series of questions regarding the idea of animality in Western thought Can animals communicate Do they have consciousness Are they aware of death By tracing questions such as these through a wide range of texts by writers ranging from Friedrich Nietzsche to Jacques Derrida Sigmund Freud to Vicki Hearne Lewis Carroll to Franz Kafka and Sergei Eisenstein to Gilles Deleuze Lippit arrives at a remarkable thesis revealing an extraordinary logical consensus in Western thought animals do not have language and hence cannot die The animal has accordingly haunted thought as a form of spectral and undead being Lippit demonstrates how in the late nineteenth century this phantasmic concept of animal being reached the proportions of an epistemological crisis engendering the disciplines and media of psychoanalysis modern literature and cinema among others Against the prohibitive logic of Western philosophy these fields opened a space for rethinking animality Technology usually thought of in opposition to nature came to serve as the repository for an unmournable animality a kind of vast wildlife museum A highly original work that charts new territory in current debates over language and mortality subjectivity and technology Electric Animal brings to light fundamental questions about the status of representation of the animal and of ourselves in the age of biomechanical reproduction **The Laws Protecting Animals and Ecosystems** Paul A. Rees, 2017-11-29 There is currently no basic text in wildlife law suitable for the wide range of courses in wildlife conservation and animal welfare at both bachelors and masters level or for the large number of people who work in conservation and animal welfare The Laws Protecting Animals and Ecosystems fills the gap in this significant market for a basic law text applicable to students and professionals whose primary training is in biology but who require a basic understanding of the laws relating to the protection of animals and ecosystems The text is applicable to a wide range of subjects including wildlife conservation animal handling animal welfare animal husbandry and veterinary science This foundational text supports those studying animal and ecosystem law by providing an overview of the basic legal principles national and international laws terminology the legal mechanisms used to protect animals and ecosystems and a compendium of the major animal welfare and conservation laws in major English speaking countries Dr Rees has been teaching wildlife law for 20 years and ecology for over 35 years and is ideally placed to write this book *Wildlife Crime* Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2012-10-18 Wildlife legislation has become so complex that prosecutions fail and even

specialist enforcement professionals struggle to implement it effectively Hundreds of birds of prey have been deliberately poisoned with substances such as carbofuran that have no legal use and the Government could easily make possession an offence The lack of sentencing guidelines on wildlife offences means that some offenders are being neither punished nor deterred in the courts The CPS is also failing to train its prosecutors to handle complex wildlife cases Furthermore the inflexible implementation in UK law of international agreements covering the trafficking of endangered species squanders limited resources The Government has maintained funding for specialist wildlife crime investigation and enforcement but this is provided on an ad hoc basis reducing operational effectiveness Funding provided to monitor wildlife crime on the internet was too short term to attract a suitably qualified individual to fill the post In 2004 the Committee called for a new database to record all wildlife crime but this has still not been introduced Internationally this report also examines how the rhino tiger and elephant are being driven to extinction by growing demand for illegal wildlife products in south east Asia and China The Government needs to exert robust diplomatic pressure in favour of the development and enforcement of wildlife law at the next CITES meeting in March 2013 In particular the Government should focus attention on the damaging effect of one off sales of impounded ivory which has been found to actually fuel demand for ivory products and seek an unequivocal international ban on all forms of ivory trade
