Rethinking Policing and Justice Luis Fernandez, Laura Huey, 2014-07-16 It has become somewhat axiomatic to refer to the police as the gatekeepers of the criminal justice system and thus as a mechanism for the provision of justice And yet when we conceptualize the police in this way what is often taken for granted is the exact nature of that role and its larger social meaning Indeed we know that police deliver justice more efficiently to some and injustice to others *Rethinking Policing and Justice* critically examines the role of policing both state and non state forms in the provision of justice and injustice In essence it presents work that highlights how different communities and groups have sought alternatives to policing sometimes taking over the functions of policing It also shows a variety of theoretical methodology and other approaches for the critical evaluation of law enforcement highlighting different insights into alternative modes of policing as we seek to understand and redraft the relationship between policing and justice This book was originally published as a special issue of

Australian law makers set out to regulate one of the most difficult aspects of police undercover investigation. In so doing the Australian experience represents a paradigm model. And yet despite its success it is a system of law and practice that has a dark side: a model of investigation that relies heavily on activities that are unlawful in the absence of authorisation. It is a model that is as much concerned with the surveillance and control of police as it is with suspected criminal conduct. The book aims to locate the Australian experience in comparative perspective with other major common law jurisdictions: the United Kingdom, Canada and New Zealand, with a view to contrast strengths, similarities and weaknesses of these models. It is argued that the Australian model at the pragmatic level offers a highly successful model for regulatory structure and practice, providing a significant model for successful regulation. At the same time the model that has been introduced raises important questions about how and why the Australian experience evolved in the way that it did, and the implications this has for the relationship between citizen and state, the judiciary and the executive, and broader questions about the protections offered by rights discourse and jurisprudence. This book aims to document the law, policy and practices that shape undercover investigations. In so doing it aims to not only articulate the way in which the law regulates these activities but also to move on to consider some of the fundamental questions linked to undercover investigations: how did regulation happen? By what means of regulation? What are the driving policy issues that give this field of law its particular complexion? What are the implications? Who gains and who loses by which means of power? The book offers unique insights into a largely unknown aspect of modern covert policing, identifying a range of practices, the legal framework, controversies and powers. By locating these practices in a rich theoretical context informed by risk and governmentality scholarship, this book offers a legal and theoretical explanation of one of the most controversial forms of policing.

Law Enforcement and Public Health Isabelle Bartkowiak-Théron, James Clover, Denise Martin, Richard F. Southby, Nick Crofts, 2022-03-03 The expanding remit of policing as a fundamental part of the public health continuum is increasingly acknowledged on the international scene. Similarly, the growing role of health professionals as brokers of public safety means that the need for scholarly resources for developing

knowledge and broadening theoretical positioning and questioning is becoming urgent and crucial. The fields of law enforcement and public health are beginning to understand the inextricable links between public safety and public health and the need to shift policies and practices towards more integrated practices. This book comes as a first, an utterly timely scholarly collection that brings together the views of multidisciplinary commentators on a wide range of issues and disciplines within the law enforcement and public health (LEPH) arena. The book addresses the more conceptual aspects of the relationship as well as more applied fields of collaboration, and the authors describe and analyze a range of service delivery examples taken from real life instances of partnerships in action. Among the topics covered: Defund, Dismantle or Define? Law Enforcement, Public Health and Vulnerability; Law Enforcement and Mental Health; The Missing Middle; The Challenges of Sustaining Partnerships and the Diversification of Cultures; Using Public Health Concepts and Metrics to Guide Policing Strategy and Practice; Policing Pandemics; Law Enforcement and Public Health Partners for Community Safety and Wellbeing. This is essential reading for a wide array of professions and areas of expertise in the intersectoral field of LEPH. It is an indispensable resource for public health and law enforcement specialists, practitioners, educators, scholars and researchers and training programs across the world as well as individuals interested in developing their knowledge and capacity to respond to complex LEPH issues in the field, including public prosecutors, coroners and the judiciary. The text also can be used for undergraduate and postgraduate university policing, criminology, sociology, psychology, social work, public health and medicine programs.
