

There are several annoyances. All the tables are in an appendix. There are several misspellings and typos (turnnover, p. 8; pesonalized, p. 60; imediate, p. 79; etc.) and incorrect references—Fishel is Fischel; Wilensky is Wilonsky; Kovenock is Kovenoc; Musolf becomes Muloff.

Despite the limitations noted, the book is an important one. Fox and Hammond have provided an up-to-date, in-depth description of the professional staffs in Congress. These staffs have grown considerably in recent years; some would argue that they have become a force almost as powerful as the elected Congress. The authors have contributed to increased understanding of the legislative process and shed light on the roles and impact of the professional staff. Further research is necessary before we can determine what difference these staffs have made, but it will have to speak to the agenda generated by this work.

ALAN P. BALUTIS

Department of Health, Education, and Welfare

Policing a Free Society. By Herman Goldstein. (Cambridge, Mass.: Ballinger Publishing Company, 1977. Pp. xi + 371. \$16.50, cloth; \$7.95, paper.)

Rare is the book which presents both a balanced assessment of developments in a field and a comprehensive new framework for understanding that field. Herman Goldstein has achieved both for police in America. His thorough examination of fundamental issues begins with the observation that "police, by the very nature of their function, are an anomaly in a free society. They are invested with a great deal of authority under a system of government in which authority is reluctantly granted, and when granted, sharply curtailed" (p. 1). Goldstein shows that the nature of police tasks requires that this authority be exercised by individuals at the operating level. Further, police authority is ambiguous and surrounded by a jumble of contradictory expectations. Statutes usually require police to enforce all the laws all the time, yet the public will not tolerate full enforcement of many laws. The public holds police responsible for preventing crime, yet police have no influence on the social factors which promote the many varieties of unlawful behavior. The book elucidates these and myriad similarly complex discrepancies. The question guiding this work is: how can policing be restructured so that police power more adequately serves the public good as defined by constitutional safeguards and democratic processes?

Chapter by chapter Goldstein builds the framework that provides answers. He analyzes in the first four chapters what police actually do and sympathetically explains their problems in doing it. A pervasive problem is that the present structuring of the job requires duplicity. The next four chapters weigh the issues of power—the structuring of discretion, the political direction of police, the control of police misbehavior, and the handling of corruption. The last four chapters not only explain the minimal impact of recent attempts to improve police organization through developing leadership, upgrading personnel and increasing education, but also suggest realistic alternatives.

Goldstein brings to his task the mature reflections of 20 years' experience with police. His perspective is that of an administrator steeped in constitutional law and conversant with social science research. He suffers no illusions concerning the entrenched nature of police abuses and the difficulty of police reform, having worked four years in the Chicago police department as right hand to the most influential police manager of the mid-century, O. W. Wilson. Since 1965 he has served at the University of Wisconsin law school.

Goldstein discourses fluently upon the whole literature of police, the uneven nature of current practices, and relevant court decisions. The prolific citations to empirical studies, primary documents, and reflective essays provide a comprehensive summation of the literature of the police field.

The book is socratic; reasoned argument carefully examines the complexities of each issue and then leads inexorably to conclusions that refute prevailing opinion. The doctrines which Goldstein destroys are those derived from the major police reformers of this century: that crime is the paramount responsibility of the police, that organizational upgrading is a sufficient goal for reform, and that police power can be properly controlled through a centralized structure that is insulated from politics.

The new framework by which Goldstein addresses the enduring problems of policing rests on a view of police as an agency of municipal government housing a multitude of functions. In listing the appropriate objectives, he draws upon the American Bar Association standards adopted in 1973, of which he was the original draftsman. They are: to prevent and control conduct threatening to life and property, to aid individuals in danger; to protect constitutional rights; to facilitate traffic; to assist those who cannot care for themselves; to resolve conflict; to identify incipient problems;

Zero Tolerance Policing Maurice Punch, 2007-11-28 AGREED WITH AUTHOR What is policing about and who defines it This report examines these key issues by exploring the notion of zero tolerance and its application in different settings Following its introduction in New York and the seemingly dramatic reduction in crime zero tolerance policing was taken up in a number of other countries including the UK and the Netherlands This report examines that process It argues that this policy was in fact nothing more than a return to old style crime control policing While it did foster the swift analysis of crime patterns and more assertive policing of public places it could lean towards repression and demonising of certain groups Examining the negative responses of leading police officers and the policy s debatable impact on crime the author concludes that zero tolerance in the UK and the Netherlands was more of a populist political and media creation than a coherent policy This report is far more than an authoritative analysis of zero tolerance It is a valuable source for entering the debate about the big picture in policing that many stakeholders now wish to see The approachable style of Zero tolerance policing makes it ideal for students academics police practitioners and the lay reader to enter that debate Maurice Punch is Visiting Professor at the Mannheim Centre for Criminology London School of Economics and Political Science and also teaches on criminological programmes at King s

Harry W. More, 2008 Through the years the police have performed the time honored functions of controlling crime maintaining law and order and providing services This comprehensive book redefines the police role in many communities especially as police departments have moved toward the creation of a partnership with citizens private agencies and other community service departments Major topics include 1 an added major development in the external review of police conduct with anticipation that police review boards will become more prevalent 2 the fact that internal review will still be an important process of the organizational response to police misconduct acknowledging Internal Affairs is here to stay 3 the trend for the courts at the federal level to intervene with Consent Decrees Memorandums of Understanding and Technical Assistance letters in cities from coast to coast and 4 the use of deadly force that has reached the point where it is viewed as a recurrent police problem Major cases such as the Rodney King beating the Louima case the James Bryd case and the Mathew Shepard case are examined to see how these issues impacted our operational and legal system The book also addresses the issues of profiling and vehicular pursuit that remain a major issue in many communities and while remedies have cured some of these problems it still remains a major issue The text also focuses on the inroads that women in policing are making as more females enter law enforcement and ascend to positions of higher power Law enforcement professionals policymakers investigators attorneys and the general public will find the book to be of special interest

Two Cultures of Policing John Leo, 2017-09-08 The emergence and functioning of two competing and sometimes conflicting cultures within police departments demonstrates how competition between street cops and bosses is at the heart of the organizational dilemma of modern urban policing Unlike other works in this field that focus on the monolithic culture or familial quality of policing this study demonstrates that which might look cohesive from the point of view of outsiders has its own internal dynamics and conflicts The book shows that police departments are not immune to the conflict inherent in any large scale bureaucracy when externally imposed management schemes for increasing efficiency and effectiveness are imposed on an existing social organization Based upon two years of extensive field work in

which the author covered every major aspect of policing at the precinct level in the New York City police department from manning the complaint desk to riding in squad cars Ianni shows how the organized structure of the police department is disintegrating The new Management Cop Culture is bureaucratically juxtaposed to the precinct level Street Cop Culture and bosses loyalties to the social and political networks of management cops rather than to the men on the street causes a sharp division with grave consequences for the departments The study concentrates on a series of dramatic events such as the suicide of a police officer charged with corruption a major riot and the trial of an officer accused of killing a prisoner while in police custody Ianni traces how these events affected relationships among fellow officers and between officers and bosses
