Policing Chinese Politics A History:

Policing Chinese Politics Michael Robert Dutton, 2005 Beginning with the bloody communist purges of the Jiangxi era of the late 1920s and early 1930s and moving forward to the wild excesses of the Cultural Revolution *Policing Chinese Politics* explores the question of revolutionary violence and the political passion that propels it Who are our enemies who are our friends that is a question germane to the revolution wrote Mao Zedong in 1926 Michael Dutton shows just how powerful this one line was to become It would establish the binary division of life in revolutionary China and lead to both passionate commitment and revolutionary excess The political history of revolutionary China he argues is largely framed by the attempts of Mao and the Party to harness these passions The economic reform period that followed Mao Zedong's rule contained a hint as to how the magic spell of political faith and commitment could be broken but the cost of such disenchantment was considerable This detailed empirical tale of Chinese socialist policing is therefore more than simply a police story It is a parable that offers a cogent analysis of Chinese politics generally while radically redrafting our understanding of what politics is all about Breaking away from the traditional elite modes of political analysis that focus on personalities factions and betrayals and from rational accounts of politics and government Dutton provides a highly original understanding of the far reaching consequences of acts of faith and commitment in the realm of politics

International Law and the Politics of History Anne Orford, 2021-08-05 As the future of international law has become a growing site of struggle within and between powerful states debates over the history of international law have become increasingly heated *International Law and the Politics of History* explores the ideological political and material stakes of apparently technical disputes over how the legal past should be studied and understood Drawing on a deep knowledge of the history theory and practice of international law Anne Orford argues that there can be no impartial accounts of international law's past and its relation to empire and capitalism Rather than looking to history in a doomed attempt to find a new ground for formalist interpretations of what past legal texts really mean or what international regimes are really for she urges lawyers and historians to embrace the creative role they play in making rather than finding the meaning of international law

Critical Security and Chinese Politics Juha A. Vuori, 2014-10-24 This book examines how critical approaches to security developed in Europe can be used to investigate a Chinese security issue the case of the Falungong The past few decades have produced a rich field of theoretical approaches to security in Europe In this book the security specific notions of securitization the politics of insecurity and emancipation are used as analytical approaches to investigate the anti Falungong campaign in the People's Republic of China This campaign launched in 1999 was the largest security related propaganda campaign since 1989 and was directed against a group of qigong practitioners who were presented as a grave threat to society The campaign had major impacts as new security legislation was established and human rights organizations reported severe mistreatment of practitioners This book approaches one empirical case with three approaches in order to transcend the tendency to pit one approach against another

It shows how they highlight different aspects in investigation and how they can be combined to gain more comprehensive insights and thereby invigorate renewed debate in the field Furthermore this is used as a vehicle to discuss more general philosophical issues of theory development and theory development and will assist students to comprehend the effects research framework selection has on a piece of research Such discussions are necessary in order to apply the frameworks in investigations that go beyond the socio political context they were originally developed in This book will be of interest to students of critical security studies Chinese politics research methods and IR in general

Engaging with Ethics in International Criminological Research Michael Adorjan, Rose Ricciardelli, 2016-06-10. Despite a voluminous literature detailing the procedures of research ethics boards and institutional ethical review processes, there are few texts that explore the realpolitik of conducting criminal research in practice. This book explores the unique lived experiences of scholars engaging with ethics during their criminological research and focuses on the ethical dilemmas that researchers encounter both in the field and while writing up results for publication. Who benefits from criminological research? What are the roles and impacts of ethics review boards? How do methodological and theoretical decisions factor in to questions of ethical conduct and research ethics governance? This book is divided into four parts. Part I: Institutional arrangements and positionality explores the ongoing and expanding process of ethics protocol and procedures, principles of confidentiality and the positionality of the researcher. Part II: Trust and research with vulnerable populations examines the complexity of work involving prisoners, indigenous peoples and victims of extreme violence, power dynamics between researchers and participants and the challenges of informed consent. Part III: Research on and with police reflects on the importance of transparent relations with police, best practices and the consequences of undertaking research in authoritarian contexts. Part IV: Emerging areas scrutinizes the ethics of carceral tours and suggests possible alternatives and offers one of the first sociological and criminological examinations of dark net cryptomarkets. Drawing upon the experiences of international experts, this book aims to provoke further reflection on and discussion of ethics in practice. This book is ideal for students undertaking courses on research methods in criminology as well as a key resource for criminology researchers around the world.

Charismatic Leadership and Social Movements Jan Willem Stutje, 2012-08-01. Much of the writing on charisma focuses on specific traits associated with exceptional leaders, a practice that has broadened the concept of charisma to such an extent that it loses its distinctiveness and therefore its utility. More particularly, the concept's relevance to the study of social movements has not moved beyond generalizations. The contributors to this volume renew the debate on charismatic leadership from a historical perspective and seek to illuminate the concept's relevance to the study of social movements. The case studies here include such leaders as Mahatma Gandhi, the architect of apartheid, Daniel F. Malan, the heroine of the Spanish Civil War, Dolores Ibarruri, la Pasionaria, and Mao Zedong. These charismatic leaders were not just professional politicians or administrators but sustained a strong symbiotic relationship with their followers, one that stimulated devotion to the leader and created a real group identity.

Regime Type and Beyond Weitseng Chen, Hualing Fu, 2023-06-08. Policing is legitimized in different ways in authoritarian and democratic states. In East and Southeast Asia, different regime types to a greater or lesser extent determine the power of the police and their complex relationship with the rule of law. This volume examines the evolution of the police as a key political institution from a historical perspective and offers comparative insights into the potential of democratic policing and conversely the resilience of authoritarian policing in Asia. The case studies focus on eight jurisdictions: Singapore, Thailand, Hong Kong, Vietnam, China, Taiwan, Japan and South Korea. The theoretical chapters analyse and explain the links between policing and society, the politics of policing and recent police reforms. This volume fills a gap in the literature by exploring the nature of authoritarian policing and how it has transformed and developed the rule of law throughout East and Southeast Asia.

Hidden Hands and Divided Landscapes Anoma Pieris,2009-02-26 During the nineteenth century the colonial Straits Settlements of Singapore Penang and Melaka were established as free ports of British trade in Southeast Asia and proved attractive to large numbers of regional migrants Following the abolishment of slavery in 1833 the Straits government transported convicts from the East India Company's Indian presidencies to the settlements as a source of inexpensive labor The prison became the primary experimental site for the colonial plural society and convicts were graduated by race and the labor needed for urban construction *Hidden Hands and Divided Landscapes* investigates how a political system aimed at managing ethnic communities in the larger material context of the colonial urban project was first imagined and tested through the physical segregation of the colonial prison It relates the story of a city Singapore and a contemporary city state whose plural society has its origins in these historical divisions A description of the evolution of the ideal plan for a plural city across the three settlements is followed by a detailed look at Singapore's colonial prison Chapters trace the prison's development and its dissolution across the urban landscape through the penal labor system The author demonstrates the way in which racial politics were inscribed spatially in the division of penal facilities and how the map of the city was reconfigured through convict labor Later chapters describe penal resistance first through intimate stories of penal life and then through a discussion of organized resistance in festival riots Eventually the plural city ideal collapsed into the hegemonic urban form of the citadel where a quite different military vision of the city became evident *Hidden Hands and Divided Landscapes* is a fascinating and thoroughly original study in urban history and the making of multiethnic society in Singapore It will compel readers to rethink the ways in which colonial urban history postcolonial urbanism and governance have been theorized by scholars and represented by governments Legitimacy of China's Counter-Terrorism Approach Chi Zhang,2022-09-12 This

The Red Guard Generation and Political Activism in China Guobin Yang, 2016-05-17 Raised to be flowers of the nation the first generation born after the founding of the People s Republic of China was united in its political outlook and at first embraced the Cultural Revolution of 1966 but then split into warring factions Investigating the

causes of this fracture Guobin Yang argues that Chinese youth engaged in an imaginary revolution from 1966 to 1968 enacting a political mythology that encouraged violence as a way to prove one's revolutionary credentials This same competitive dynamic would later turn the Red Guard against the communist government Throughout the 1970s the majority of Red Guard youth were sent to work in rural villages where they developed an appreciation for the values of ordinary life From this experience an underground cultural movement was born Rejecting idolatry these relocated revolutionaries developed a new form of resistance that signaled a new era of enlightenment culminating in the Democracy Wall movement of the late 1970s and the Tiananmen protest of 1989 Yang's final chapter on the politics of history and memory argues that contemporary memories of the Cultural Revolution are factionalized along these lines of political division formed fifty years before

Words and Their Stories Ban Wang, 2010-10-05 As China joins the capitalist world economy the problems of social disintegration that gave rise to the earlier revolutionary social movements are becoming pressing Instead of viewing the Chinese Revolution as an academic study these essays suggest that the motifs of the Revolution are still alive and relevant The slogan Farewell to Revolution that obscures the revolutionary language is premature In spite of dislocations and ruptures in the revolutionary language to rethink this discourse is to revisit a history in terms of sedimented layers of linguistic meanings and political aspirations Earlier meanings of revolutionary words may persist or coexist with non revolutionary rivals Recovery of the vital uses of key revolutionary words proffers critical alternatives in which contemporary capitalist myths can be contested
