Policing Europe Bill Heberton, Terry Thomas, 1995-03-20 Developments in European police co operation have become sharply focused in the last few years Policing Europe critically examines the historical development of forms of co operation and their traditional justifications terrorism illegal immigration drug trafficking and other cross border crime It is argued that a full understanding of the new policing of Europe needs to take account of the linking of such justifications with the more diffuse debate around removal of border controls and free movement of people The book suggests that a new European policework is emerging and examines the implications of this phenomenon

Policing Cooperation Across Borders Saskia Hufnagel, 2016-04-22 This book provides new insights into police cooperation from a comparative socio legal perspective It presents a broad analysis of comparable police cooperation strategies in two systems the EU and Australia The evolution of regulatory trends and cooperation models is analysed for both systems and possible transferable strategies identified Drawing on interviews with practitioners in the EU and Australia this book highlights a number of areas where the EU can be compared to a federal system and addresses the advantages and disadvantages of being a Union or a federation of states with a view to police cooperation practice Particular topics addressed are the evolution of legal frameworks regulating police cooperation informal cooperation strategies Joint Investigation Teams Europol and regional cooperation These instruments foster police cooperation but could be improved with a view to cooperation practice by learning from regulatory techniques and practitioner experiences of the respective other system

Policing Global Regions Saskia Hufnagel, 2021-01-26 This book provides a stocktake and comparative socio legal analysis of law enforcement cooperation strategies in four different regions of the world the European Union EU North America Greater China and Australasia The work analyses law enforcement cooperation mechanisms within the socio legal framework of global normmaking The strategies addressed range from legal frameworks facilitating cooperation to formal and informal police networks and cooperation practices The study also takes into account crime specific engagement for example campaigns focusing on drug crimes terrorism financial crime kidnappings and other offences It explores challenges in policing practice and human rights protection in each region that could be countered by existing strategies in another As regions usually develop more advanced cooperation mechanisms than exist at a global scale strategies found in the former

could help find solutions for the latter To map existing strategies and assess their impact on both human rights and policing practice this study relies on an assessment of the primary and secondary literature sources in each region as well as interviews with practitioners ranging from senior police officers to prosecutors government officials customs and military staff This book presents a valuable resource for academics and postgraduate students as well as policing and criminal justice practitioners government officials and policy makers

developments and the dearth of academic research which surround them in order hopefully to inspire researchers policymakers and practitioners alike

Democracy, Law and Security Peter Gill, 2017-03-02 In the past decade there have been significant changes in the operations of security and intelligence agencies throughout Europe Those in the former Eastern Europe have undergone the most obvious changes in their targets and the legal context within which they operate but these changes have affected all the agencies to some extent It is these changes that will provide the context of structures and processes through which the agencies will respond to the September 11 2001 attack on New York and Washington This edited collection of papers by an international group of experts in the study of security and intelligence examines recent and current developments in the light of the rule of law and democracy and specifically addresses a number of common themes Firstly security and intelligence agencies are placed within the broader context of their parent state including whether their powers originate in legislation or executive decree and the form of oversight Secondly the types of agency civilian military foreign and domestic are considered in the context of their historical development including the transition from authoritarian to liberal state forms Thirdly the changes in their mandate and targets are discussed in particular towards terrorism transnational organized crime and economic intelligence Finally each author considers the enduring issue of how the impact of security and intelligence agencies is to be assessed in terms both of security and human rights This book represents the first systematic attempt to present a collection of contemporary studies on the shifts in this crucial aspect of the operation of all states and to do so

within a framework of common themes Although significant differences remain in the operation of security intelligence all the authors highlight the common dilemmas that accompany the attempt to provide security but to do so democratically
