*Teaching European Union Politics* Viviane Gravey, Christopher Huggins, 2024-01-18 Why do we teach EU politics What should EU politics students learn What are the practical approaches and techniques to teaching EU politics In response to these questions *Teaching European Union Politics* analyses the interdisciplinary nature of teaching this broad

subject and reflects on a wide range of educational approaches It both advances the pedagogy and practice of teaching EU politics and provides practical support for those looking to adopt innovative and learner oriented techniques

**Simulations of Decision-Making as Active Learning Tools** Peter Bursens,Vincent Donche,David Gijbels,Pieter Spooren,2018-03-05 This volume brings together both political and educational scientists While educational research literature has so far not systematically addressed the tool of simulations of decision making political scientists have hardly used insights from research on assessment or on motivation and interest of students Almost all political science publications on simulations merely discuss how to implement the tool in class and fall short of providing evidence of the effects on student outcomes such as increased interest and performance Combining the two disciplines is mutually enriching Political science benefits from state of the art educational science measuring and testing of the claims made by the proponents of simulations while educational sciences adds the systematic analysis of simulations of decision making to their list of empirical objects which also adds insights to the theories on the affective component of student learning It is the explicit aim of the volume to address how simulating decision making environments fosters learning Implications for research and practice regarding student learning are addressed in all chapters

*The European Union's Africa Policies* Daniela Sicurelli,2016-12-05 The European Union EU is a key partner for African regional organizations and a major promoter of economic and political integration in the region Several studies have interpreted the EU s role in Africa as either a self interested hegemonic actor or as a value oriented normative power In this volume Daniela Sicurelli challenges these views by taking a closer look at Europe s policies towards Sub Saharan Africa in the area of peacekeeping trade and development and environmental protection Using fresh empirical evidence including interviews with both European and African officials she argues that the EU is far from becoming a unitary player in Africa Lacking a clear strategy and coherent normative framework the EU should be considered a multi level actor where national and supranational institutions have different interests and push forward contrasting views of what role Europe should play in Africa The ability of single institutions to frame an issue as requiring either intergovernmental or supranational procedures appears crucial for shaping the content of European Africa policies An original contribution to the growing literature on the EU as an international actor this book is extremely useful to scholars researchers and policy makers demanding critical work in the field of EU Africa policy

**Experiencing the European Union** Marco

Brunazzo, Pierpaolo Settembri, 2013-06-03T00:00:00+02:00 The EU is a complex political and institutional machine with distinct procedures language and codes Its functioning is based on negotiations among a variety of actors at different levels local regional national supranational inter institutional intra institutional etc as well as in informal and non legislative contexts For this reason the EU can be difficult to understand Negotiation roleplaying simulations can shed light on the genuine dynamics of the system and are thus becoming an essential element in teaching and training on EU matters This book is an introduction and a guide to the EU decision making process and its institutional settings an essential tool for effective negotiators in the European arena and an instrument for teachers at any level offering a series of suggestions on how to design successful simulation games

### **Climate Technology Strategies 2** Pantelis Capros, Panagiotis

Georgakopoulos, Denise van Regemorter, Stef Proost, Tobias F.N. Schmidt, Henrike Koschel, Klaus Conrad, E. Lakis

Vouyoukas, 2012-12-06 Climate technology becomes more and more relevant in international environmental policy negotiations At the Kyoto conference binding emission reduction targets have been established for several regions of the world The major challenge is how to realize these reduction goals with minimum costs without generating new distributional and social difficulties The book analyses the macroeconomic structural and distributional impacts of greenhouse gas mitigation strategies for the EU and the member states

### Political Simulation in the Age of AI Robert Beisler, 2024-08-19

In the age of artificial intelligence political decision making processes are facing an unprecedented transformation Policy simulations once used as tools for education and strategy development have evolved into powerful tools that have the potential to profoundly influence realpolitik But while these technologies offer new ways of analysing and forecasting they also raise pressing questions Can simulations truly capture the complexity of real world politics What influence do they have on democratic decision making And above all do they pose a threat to democracy In this book the author sheds light on the fascinating but also worrying development of political simulations in the context of artificial intelligence With a critical eye he examines how these technologies could simplify political processes favour technocratic solutions and place power in the hands of a small group of experts In doing so he highlights the risks for transparency citizen participation and ultimately for democracy itself Political simulation in the age of AI a threat to democracy is a work for anyone who wants to understand and help shape the future of politics It analyses the opportunities and risks associated with the integration of AI into political processes and calls for the responsible use of these technologies in order to preserve democratic values

**Investing in the Middle East** Ashraf Mishrif,2010-07-30 The effect of foreign direct investment FDI on economic development has been widely debated However the real challenge is not only to examine the effect of FDI on economic development but to also investigate the most appropriate economic policies that are conducive to increasing levels of FDI Ashraf Mishrif here addresses this challenge and examines the interplay between external and internal forces to determine whether recent EU Egyptian trade agreements have led to any significant improvement in Egypt's investment environment and in the growth levels of European direct investment in the country This important study makes a key contribution to our understanding of the inward investment strategies and options of the Arab World's most populous and powerful player It will be an essential point of reference for all economists bankers and investment advisors dealing with the Middle East

**Economy—Energy—Environment Simulation** K. Uno,2005-12-08 In the policy arena as well as in the academic world a new challenge is having to deal with the global community We are increasingly aware that the world is linked through economy energy environment interactions We are increasingly aware at the same time that the emergence of the global community does not imply an integrated harmonious world rather it is a community where co tries regions of different interests and values face each other directly Global governance has to be achieved through actions of national governments under different motives and constraints We need to have an analytical tool that is capable of producing a global picture yet with detailed country resolution If the world is a better place now compared to 100 years ago in terms of p capita income this is due to the industrialization that continued throughout the 20th century We entered the 21st century knowing that the human aspiration that translates into ever increasing production may not be tenable in the long run Sustainability of the global community is at stake In contrast to inc mental decision making through the market mechanism that should lead to some optimal state under some assumptions such as perfect knowledge smooth movement of resources no externalities and so forth we need to have an a lytical tool to provide us with details of the future state of the world

**The Energy Security Gains from Strengthening Europe's Climate Action** Geoffroy Dolphin,Mr. Romain A Duval,Romain Duval,Hugo Rojas-Romagosa,Galen Sher,2024-05-30 Following the 2022 energy crisis this paper investigates whether Europe's ongoing efforts to cut greenhouse gas emissions can also enhance its energy security The global computational general equilibrium model analysis finds that individual policy tools including carbon pricing energy efficiency standards and accelerated

permitting procedures for renewables tend to improve energy security Compared to carbon pricing sector specific regulations deliver larger energy security gains and spread those more evenly across countries benefitting also some fossil fuel intensive economies in Central and Eastern Europe This finding strengthens the case for a broad climate policy package which can both achieve Europe's emissions reduction goals and deliver sizeable energy security co benefits An illustrative package which would cut emissions in the EU UK and EFTA by 55 percent with respect to 1990 levels by 2030 is estimated to improve the two energy security metrics used in this paper by close to 8 percent already by 2030 Beyond the policies analyzed in the model the paper also discusses the technology market design and supply chain reforms that Europe needs for an energy secure green transition

Inequality, Growth, and Poverty in an Era of Liberalization and Globalization Giovanni Andrea Cornia, 2004-03-18 Within country income inequality has risen since the early 1980s in most of the OECD all transitional and many developing countries More recently inequality has risen also in India and nations affected by the Asian crisis Altogether over the last twenty years inequality worsened in 70 per cent of the 73 countries analysed in this volume with the Gini index rising by over five points in half of them In several cases the Gini index follows a U shaped pattern with the turn around point located between the late 1970s and early 1990s Where the shift towards liberalization and globalization was concluded the right arm of the U stabilized at the steady state level of inequality typical of the new policy regime as observed in the UK after 1990 Mainstream theory focusing on rises in wage differentials by skill caused by either North South trade migration or technological change poorly explains the recent rise in income inequality Likewise while the traditional causes of income polarization high land concentration unequal access to education the urban bias the curse of natural resources still account for much of cross country variation in income inequality they cannot explain its recent rise This volume suggests that the recent rise in income inequality was caused to a considerable extent by a policy driven worsening in factorial income distribution wage spread and spatial inequality In this regard the volume discusses the distributive impact of reforms in trade and financial liberalization taxation public expenditure safety nets and labour markets The volume thus represents one of the first attempts to analyse systematically the relation between policy changes inspired by liberalization and globalization and income inequality It suggests that capital account liberalization appears to have had on average the strongest disequalizing effect followed by domestic financial liberalization labour market deregulation and tax reform Trade liberalization had unclear effects while public expenditure reform often had positive effects

**Market Effects of Crop Support Measures** OECD, 2001-09-12 This publication compares the market impacts of market price support and several kinds of budgetary direct payments using indicators of economic efficiency and trade distortion
