**Networked Politics** Miles Kahler, 2011-02-23 The concept of network has emerged as an intellectual centerpiece for our era. Network analysis also occupies a growing place in many of the social sciences. In international relations, however, network has too often remained a metaphor rather than a powerful theoretical perspective. In *Networked Politics*, a team of political scientists investigates networks in important sectors of international relations including human rights, security, agreements, terrorist and criminal groups, international inequality and governance of the Internet. They treat networks as either structures that shape behavior or important collective actors. In their hands, familiar concepts such as structure, power and governance are awarded new meaning.
