AVIATION IN THE SECOND WORLD WAR Aviation played a pivotal role in the WW2 Controlling the airspace was the first step in the direction of victory for the armies on the ground or the naval forces in all the war scenarios The effective action of German aviation allowed Hitler to successfully launch the Blitzkrieg the Lightning War with its armored divisions in Poland Norway Denmark and the surprising victory in the west over Belgium Holland and France On the other hand it was the aviation that allowed the British to reject the Luftwaffe avoiding the invasion of Great Britain Later aviation enabled the Allied landing on the beaches of Normandy with its full control of air space On the other side of the world without the intervention of air forces the Japanese could not have carried out their attack on Pearl Harbor and American aviation would be responsible for the greatest naval victories in the Pacific imposing the superiority of the aircraft

carriers as the main weapon maritime and displacing forever the hegemony of the old battleships Finally the planes were responsible for the launch of the two atomic bombs that forced the Japanese to capitulate ending the war without the need for a single American soldier to land in enemy territory During the Second World War about 675 000 aircraft were used of which some 475 000 were from the Allied countries The conflict marked the end of biplane aircraft and wooden and canvas aircraft to give rise to metal monoplanes In the same way the war definitively established the heavy strategic bombers and the airplane as an essential part of the Navy the night fighter equipped with radar and the jet plane emerged which revolutionized the world aviation Aviation enabled the air transport of millions of men and goods from one continent to another through the oceans in a massive and rapid manner With the use of nuclear weapons launched from a single plane with the power to annihilate entire cities aviation has changed the global strategy ending forever with the old concepts of front and rear of war transforming conventional forces into secondary actors and replacing the conquest with absolute nuclear destruction In the 2nd World War the Axis Powers Germany Italy Japan Romania Hungary Finland Slovakia Croatia Lithuania Estonia and Bulgaria they faced the allied countries France Great Britain and the countries of the Commonwealth United States Soviet Union China Norway Holland Belgium Greece Yugoslavia Poland and several Latin American countries with little participation of their limited air forces

The Jet Race and the Second World War S. Mike Pavelec, 2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle's engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged throughout the war only rising to technological

prominence on the ashes of the German defeat Pavelec's analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport

Death in the Hills Charles Alan Green, 2023-06-29 1937 dawned over the golden sun kissed lands of Spain upon a divided country and a vicious and bloody Civil War The war had originally begun as a simple military coup back in mid July of the previous year At first it looked as though it would carry the day but due to the early up rising in the Spanish protectorate of Morocco the timing of the revolt on the mainland was thrown into disarray and due to this certain areas didn t commence their planned revolts at the designated time In particular the major cities of Barcelona and Madrid were both critically effected by the timing of these events and the whole of the 18th July was spent in inactivity It was this delay to the originally planned timetable that enabled the republican government but more importantly especially in Barcelona the unions and other forces on the left to organise some sort of resistance It was this fact which meant that they were able to defeat the rebellion in these and several other vital towns and cities By the end of the 20th July after the first two days of the rebellion and bitter fighting throughout the length and breadth of the country the battle lines had been drawn and Spain was a nation split into two basic zones The areas that remained loyal under the control of the government and the rest of Spain which was now under the command of the rebel s or nationalist s as they were to become known
