Polikarpov I15bis:

Polikarpov I-15, I-16 and I-153 Aces Mikhail Maslov, 2013-02-20 From the heat of Spain to the frozen wastelands of Finland this book reveals the combat stories of the pilots who flew the Polikarpov fighters from 1936 until the end of World War II The I 15 I 16 and I 153 fighters were the world s first mass produced fighters Some 17 000 Polikarpovs had been manufactured by the time production ceased in 1941 They served with the Republicans in the Spain the Chinese against Japan in 1937 38 and the Soviets against both Japan in the Nomonhan Incident and Finland during the Winter War By 1941 more than 20 Soviet pilots had made ace in Polikarpovs and many more attained that status during the first months of the German invasion Though thoroughly outclassed this book shows how the Polikarpov was the backbone of the Soviet air force during the early months of the war in the east and continued to serve as training aircraft and as frontline fighters some right through to 1945 **Soviet Fighters of the Second World War** Jason Nicholas Moore, 2021-07-30 The Red Air Force had just started to re equip with modern monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters the Soviets then settled on two main lines of development the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7 and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters Not only are these aircraft accurately described but experimental fighters are also dealt with In addition colour profiles illustrate these aircraft in terms of design camouflage and markings From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war all Red Air Force fighters are covered in this comprehensive volume **Spanish Republican Aces** Rafael A López Permuy, 2013-03-20 The first book published in English to focus exclusively on the exploits of the fighter aces of the Aviación Militar in their fight against the elite pilots of the better armed Nationalist force At the start of the Spanish Civil War most young fighter pilot officers joined the rebels while the high ranking officers grupo or escuadrilla commanders and the NCOs sergeants and corporals remained loyal to the government Mostly flying the obsolete Nieuport Ni 52s these loyalists were soon outpaced by the more modern Fiat CR 32s and Heinkel He 51s However at this early stage of the war there were several Republican airmen who became aces and famous in the process despite the small numbers of enemy aircraft shot down Widely speaking the Republican military aviation did not keep an exhaustive record of individual shooting claims However sufficient documentation exists to make a reasonable assumption as to which pilots fall into the ace category This volume details the exploits of those pilots ideal for fans of previous works in the Osprey Aircraft of the Aces series on Nationalist CR 32 Aces and Polikarpov I 15 I 16 and I 152 Aces **Allied Fighters of World War II** Bill Gunston, 1992 *Sino-Japanese Air War 1937-1945* Hakan Gustavsson, 2017-01-20 **Monino Museum Moscow** Ken Duffey, 2013-06-19

Aces of the Republic of China Air Force Raymond Cheung,2015-05-20 The ace pilots of the Republic of China Air Force have long been shrouded in mystery and obscurity as their retreat to Taiwan in 1949 and blanket martial law made records of the RoCAF all but impossible to access Now for the first time the colourful story of these aces can finally be told Using the latest research based on released archival information and full colour illustrations this book charts the history of the top scoring pilots of the RoCAF from the beginning of the gruelling eight year Sino Japanese War to the conclusion of the Civil War against the Chinese Communists Beginning as a ragged and very disparate group of planes and pilots drawn from various provincial air forces the RoCAF gradually became standardised and was brought under American tutelage Altogether it produced 17 aces who scored kills whilst flying a startling variety of aircraft from biplanes to F 86 Sabres

Combat Biplanes of World War II Peter C. Smith,2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in Combat Biplanes of World War II The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still

retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini's Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on Combat Biplanes of World War II describes many of these gallant old warriors representing the author's own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well

Messerschmitt Bf 109 Jan Forsgren ,2017-06-29 F4F Wildcat vs A6M Zero-sen Edward M. Young,2013-08-20 The Grumman F4F Wildcat and the Mitsubishi A6M Zero sen were contemporaries although designed to very different requirements The Wildcat ruggedly built to survive the rigors of carrier operations was the best carrier fighter the US Navy had available when the USA entered World War II and it remained the principal fighter for the US Navy and the US Marine Corps until 1942 43 With a speed greater than 300mph exceptional manoeuvrability long range and an impressive armament the slick Zero sen could out perform any Allied fighter in 1941 42 The battles between the Wildcat and the Zero sen during 1942 represent a classic duel in which pilots flying a nominally inferior fighter successfully developed air combat tactics that negated the strengths of their opponent

Air Combat ,2019-01-24 This book brings together the best and most iconic fighters of World War II pitted against one another in desperate aerial combat The battle for the skies in World War II fuelled a race between rival air forces to develop ever faster and more capable fighter aircraft and the struggle for air superiority was never over until the war itself ended This volume explores four clashes of some of the finest planes and pilots in key theatres of the war Spitfires duelling the formidable Bf 109 over the Channel the Fw 190 battling the Soviet La 5 and 7 on the Eastern Front the F4F Wildcat in a desperate clash with the legendary A6M Zero sen and the F4U Corsair in combat with the second generation Japanese Ki 84 in the closing days of the war Fully illustrated with contemporary photographs maps and colour artwork Air Combat conveys the full story behind these dramatic aviation duels

Stalin's Falcons Dmitry Zubov,2024-05-31 In this stunning expos Dmitry Zubov reveals the dark truth of the terrible losses suffered by Soviet flyers the inferiority of the Russian aircraft on World War II s Eastern Front and the almost slave like conditions in which those aircraft were made The Soviet history of the Second World War written under the conditions of a totalitarian regime reflected all its features with the result that it includes solid sets of patriotic fables that have no connection with reality Many of the events of the war were distorted beyond recognition or even made up from beginning to end Archives containing original documents were available only to selected specially verified KGB historians who presented

only the version of the war that was acceptable to the Soviet regime After the collapse of the Soviet Union the process of declassifying archives and gaining wide access to information gradually began to reveal the terrible truth of the crimes of the Soviet regime One of which of course was the incompetent leadership of the Red Army which led to massive loss of life across the military and civilians alike However the consequences of decades of Soviet propaganda had a strong impact on both Russian and world historical science Because of this not only Russian but unfortunately many European and American historians found themselves repeating the Soviet myths they had been fed The history of Soviet fighter aircraft did not escape this fate The tale of Stalin s so called Falcons who allegedly shot down dozens and even hundreds of Luftwaffe aircraft was persistently drummed into the heads of many generations of Russian people These heroes supposedly flew Soviet fighters whose technical characteristics were many times superior to their German counterparts with the result that Luftwaffe aces were reportedly afraid of meeting them in the air These primitive propaganda clich s became a model for describing the actions of Stalin s fighter aircraft In this stunning expos Stalin s Falcons reveals the stark and dark truth of the terrible losses suffered by Soviet flyers the inferiority of the Russian aircraft and the almost slave like conditions in which those aircraft were made
