What are Campaigns For? The Role of Persuasion in Electoral Law and Politics James A Gardner, 2009-06-19 Election campaigns ought to be serious occasions in the life of a democratic polity For citizens of a democracy an election is a time to take stock to reexamine our beliefs to review our understanding of our own interests to ponder the place of those interests in the larger social order and to contemplate and if necessary to revise our understanding of how our commitments are best translated into governmental policy or so we profess to believe Americans however are haunted by the fear that our election campaigns fall far short of the ideal to which we aspire The typical modern American election campaign seems crass shallow and unengaging The arena of our democratic politics seems to lie in an uncomfortable chasm between our political ideals and everyday reality What Are Campaigns For is a multidisciplinary work of legal scholarship that examines the role of legal institutions in constituting the disjunction between political ideal and reality The book explores the contemporary American ideal of democratic citizenship in election campaigns by tracing it to its historical sources documenting its thorough infiltration of legal norms evaluating its feasibility in light of the findings of empirical social science and testing it against the requirements of democratic theory

Civic Education in the Twenty-First Century Donald M. Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville s analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising

developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters [Close to Home](#) Jennifer Fitzgerald,2018-09-20 Argues that radical right voting in Europe is rooted in people s feelings of attachment to and defensiveness of their local communities *Immigration and the American Ethos* Morris Levy,Matthew Wright,2020-01-02 Above and beyond the influence of prejudice and ethno nationalism perceptions of civic fairness shape how most Americans navigate immigration controversies [CeDEM11](#) , **Seeing Us in Them** Cigdem V. Sirin,Nicholas A. Valentino,José D. Villalobos,2021-03-18 What causes some people to stand in solidarity with those from other races religions or nationalities even when that solidarity does not seem to benefit the individual or their group Seeing Us in Them examines outgroup empathy as a powerful predisposition in politics that pushes individuals to see past social divisions and work together in complex multicultural societies It also reveals racial ethnic intergroup differences in this predisposition rooted in early patterns of socialization and collective memory Outgroup empathy explains why African Americans vehemently oppose the border wall and profiling of Arabs why Latinos are welcoming of Syrian refugees and support humanitarian assistance why some white Americans march in support of Black Lives Matter through a pandemic and even why many British citizens oppose Brexit Outgroup empathy is not na ve rather it is a rational and necessary force that helps build trust and maintain stable democratic norms of compromise and reciprocity *In Defense of Pluralism* Éric Montpetit,2016-04-07 The work of early pluralist thinkers from Arthur Bentley to Robert Dahl inspired much optimism about democracy They argued that democracy was functioning well despite disagreements arising among the diversity of interests represented in policy making processes Yet it is unlikely that anyone paying attention to news coverage today would share such optimism The media portray current policy making processes as intractably polarized devoid of any opportunity to move forward and adopt essential policy changes This book

aims to revive our long lost sense of optimism about policy making and democracy Through original research into biotechnology policy making in North America and Europe ric Montpetit shows that the depiction of policy making offered by early pluralist thinkers is not so far off the present reality Today s policy decision making process complete with disagreement among the participants is consistent with what might be expected in a pluralist society in sharp contrast with the negative image projected by the media

Schools of Democracy Julien Talpin, 2024-10-31 Schools of Democracy offers a vivid analysis of the long term impact of engagement in participatory budgeting institutions in Europe While democratic innovations flourish around the world there have been great hopes for their potential to revitalize representative government and solve the increasing apathy of the public Based on a rich ethnographic study in France Italy and Spain this book shows how participatory institutions can encourage personal involvement by creating the procedural and social conditions conducive to the formation of a competent and involved citizenry Rather than deliberation itself it seems that informal discussions and interactions between a diverse public allow mutual learning and the beginning of a political trajectory for people at the margins of the public sphere However this book also shows that citizens can become disappointed by the little decision making power they are granted as they leave the process often more cynical than before Contains A unique study on the long term individual impact of engagement in participatory institutions While most research deal with short term impact Schools of democracy addresses impact of participation after two years of engagement Unique access to the black box of participatory institutions While research on democratic innovations generally opt for an externalist perspective Schools of democracy details the routine of deliberative interactions showing how ordinary citizens speak up in public assemblies From this perspective the book offers incredibly rich empirical material coming from ethnographic research on how participatory democracy works An original theoretical framework to the study of the individual impacts of participatory engagement While most research are based on an implicit rational choice perspective the pragmatist perspective adopted here sheds a different light on the studied phenomenon stressing the co construction of actors and their
