Lavergne, 2014-05-12 The Political Economy of U S Tariffs An Empirical Analysis provides information pertinent to the political economy of trade barriers This book discusses the cross sectional regression analysis across industries to understand why some industries have been more privileged than others Organized into seven chapters this book begins with an overview of the structure of protection and identifies the primary actors or principles that condition the formation of trade policy more generally This text then evaluates the institutional and theoretical reasons why political leverage should not be expected to play a significant role in explaining tariffs Other chapters consider the notion that the structure of protection at any point in time represents some sort of equilibrium This book discusses as well the distinction between nominal and effective tariffs The final chapter deals with individual regressors and groups of regressors This book is a valuable resource for economists and specialists in quantitative analysis Empowering Exporters Michael J. Gilligan, 1997-10-10 Explores the politics of free trade policies in the United States **Political Economy of U.S.-Taiwan Trade** Robert E. Baldwin, Tain-Jy Chen, Douglas R. Nelson, 1995 Very Good No Highlights or Markup all pages are intact **Politics, Process, and American Trade Policy** Sharyn O'Halloran, 1994 Relying on the New Economics of Organizations NEO or New Institutionalism Politics Process and American Trade Policy shows why conventional models do not adequately describe the formation of American trade policy Rejecting both the pressure group model and the presidential ascendancy model this study s institution based approach emphasizes the influence Congress has in setting trade policy connecting theories of institutional design with the procedural details of regulating trade policy To reach her conclusions Sharyn O Halloran uses time series data and econometric analysis to test a set of propositions concerning trade policy She examines detailed case studies and provides a comprehensive history of the institutions that govern trade policy making Unlike most scholars who see trade policy as disparate and ad hoc O Halloran is able to explain both early and contemporary American trade policy in a consistent and integrated fashion She argues that a single set of procedures may lead to apparently different outcomes under differing initial conditions therefore the key is to identify the common logic derived from constitutional imperatives that underlies all policy outcomes **The Political Economy of the GATT** Peter Moser, 1990 **Trade Policy in a Changing World Economy** Robert E. Baldwin, 1988 Trade policy issues are no longer solely the concern of a few government specialists and academics Manufacturers businesspeople educators and government officials must keep abreast of laws and regulations

relating to trade the economic consequences of various trade measures and current trends in policy but there have been few coherent sources for such information Trade Policy in a Changing World Economy provides a clear introduction to complex trade issues covering theoretical issues of trade policy the changing nature of American trade policy the changing nature of American trade policy since World War II multilateral trade negotiations and trade strategies The volume is particularly timely as the world's nations enter a new round of GATT negotiations for the reduction of trade barriers

International Trade Policies John S. Odell, Thomas D. Willett, 1990 Gives political and economic perspectives on international trade issues

Empowering Exporters Michael J. Gilligan, 2010-08-27 Until the New Deal most groups seeking protection from imports were successful in obtaining relief from Congress In general the cost of paying the tariffs for consumers was less than the cost of mounting collective action to stop the tariffs In 1934 with the passage of the Reciprocal Trade Agreements Act all of this changed The six decades that followed have produced a remarkable liberalization of trade policy in the United States This occurred despite the fact that domestic politics according to some of the best developed theories should have prevented this liberalization Michael Gilligan argues that liberalization has succeeded because it has been reciprocal with liberalization in other countries Our trade barriers have been reduced as an explicit quid pro quo for reduction of trade barriers in other countries Reciprocity Gilligan argues gives exporters the incentive to support free trade policies because it gives them a clear gain from free trade and thus enables the exporters to overcome collective action problems The lobbying by exporters balancing the interests of groups seeking protection changes the preferences of political leaders in favor of more liberalization Gilligan tests his theory in a detailed exploration of the history of American trade policy and in a quantitative analysis showing increases in the demand for liberalization as the result of reciprocity in trade legislation from 1890 to the present This book should appeal to political scientists economists and those who want to understand the political underpinnings of American trade policy Michael J Gilligan is Assistant Professor of Politics New York University

Hiscox, 2002-08-25 Publisher Description

Political Economy of U.S. - Taiwan Trade Robert E. Baldwin, Tain-Jy Chen, Douglas Nelson, 2025-10-01 Two key features of the remarkable economic growth in the newly industrializing countries of East Asia over the last quarter of a century are the role of exports of manufactured goods as the engine of this growth and the importance of the United States as a market for these exports Political Economy of U S Taiwan Trade analyzes the nature of the political and economic interactions both domestic and international which evolved between Taiwan and the United States in a manner that has enabled this growth to occur In analyzing the various cooperative and conflicting trade policies pursued by the two countries over the last fifty years the authors utilize a broad political economy framework They first describe the nature and evolution

of trade between Taiwan and the United States and discuss the major economic and political groups and institutions that shape trade policies in the two countries In doing so the role that trade has played both in Taiwan s development policies and in the international economic and political policies of the United States in the post World War II period is analyzed The various restrictions imposed by each country on the other s exports are examined and the efforts to reduce these trade barriers are then discussed in detail Particular attention is given to the series of bilateral negotiations in which the United States has used its dominant economic and political power to force Taiwan to open a number of its internal markets The book will be of interest to both economists and political scientists specializing in international economics and international political relations Area specialists focusing on the Far East will also find the book helpful Robert E Baldwin is Hildale Professor of Economics University of Wisconsin Tain Jy Chen is Research Fellow Chung Hua Institution for Economic Research Douglas Nelson is Associate Professor of Economics Tulane University This title was formally part of the Studies in International Trade Policy Series now called Studies in International Economics

Power, Protection, and Free Trade David A. Lake, 2018-03-15 Why do nations so frequently abandon unrestricted international commerce in favor of trade protectionism David A Lake contends that the dominant explanation interest group theory does not adequately explain American trade strategy or address the contradictory elements of cooperation and conflict that shape the international economy Power Protection and Free Trade offers an alternative systemic approach to trade strategy that builds on the interaction between domestic and international factors In this innovative book Lake maintains that both protection and free trade are legitimate and effective instruments of national policy the considered responses of nations to varying international structures
