The Political Economy of Latin America Peter Kingstone, 2011-01-28 Neoliberalism has been at the centre of enormous controversy since its first appearance in Latin America in the early 1970s Even neoliberalism's strongest supporters concede that it has not lived up to its promises and that growth poverty and inequality all have performed considerably worse than hoped This brief text offers an unbiased reflection on the neoliberal debate in Latin America and the institutional puzzle that underlies the region's difficulties with democratization and development In addition to providing an overview of this key element of the Latin American political economy Peter Kingstone also advances an important but under explored argument about political institutions Kingstone offers a unique contribution by mapping out the problem of how to understand institutions why they are created and why Latin American ones function the way they do

Handbook on International Political Economy Ralph Pettman, 2012 International political economy IPE is a highly complex discipline drawing not only from the fields of politics and economics but also those as varied as philosophy history and anthropology Now widely accepted as a key dimension to contemporary world affairs it is no longer possible to talk about international relations without talking about production and distribution finance and investment as well as consumption and trade To ensure that our understanding of these topics is relevant to today's world there is a constant need to revisit and challenge what is known about these topics Besides being a comprehensive account of international political economy for academic study this extensive collection also highlights salient issues that scholars analysts and state leaders are most concerned with in today's world Amongst these are

issues concerning the rise of China and India as new economic superpowers stability in the EU's political economy the viability of the existing multilateral system of global trade recent financial crises as well as the impact of globalisation and marketisation on the world's workers and our physical environment With contributions from prominent academics such as Susan K Sell George Washington University D C and Geoffrey Blainey Professor Emeritus University of Melbourne this volume makes for both a stimulating and thought provoking read

Institutions, Partisanship and Credibility in Global Financial Markets Hye Jee Cho, 2017-07-28 Increasingly integrated global financial markets have been shaken by a series of severe shocks in recent decades from Mexico's Tequila crisis to the upheavals in the Eurozone These crises have demonstrated that signs of uncertain local economic and political conditions can result in market fluctuations which in turn cause economic social and political instability Such instability is particularly severe for developing countries that rely heavily on international financial markets for their financial needs Building credibility in these markets is therefore important for national governments who wish to prevent market panic and capital flight and ultimately to achieve stable economic growth Earlier studies have argued that institutional arrangements that constrain governments and commit them to protecting private property rights and market friendly policies can send a strong positive signal to the markets about a given country's sovereign credibility This book argues however that the market perception of such credibility building institutions is significantly contingent on which party governs the country Formal institutions confer significant credibility building effects on left wing governments whereas less or no significant effects are enjoyed by right wing governments And beyond that any significant changes in a country's institutional landscape such as a breakdown of democracy or joining an international organization that can influence domestic politics have particularly strong impact on the credibility of left wing governments This argument is supported by a quantitative analysis of sovereign credit ratings data collected from around 90 developing countries from 1980 to 2007 by case studies from South Asia Eastern Europe and Latin America and by face to face interviews with 24 financial market experts based in Hong Kong Seoul and Paris

Democracies at War against Terrorism S. Cohen, 2016-03-28 Numerous democratic nations have been singled out by NGOs for brutality in their modus operandi for paying inadequate attention to civilian protection or for torture of prisoners This book deals with the difficulties

faced when conducting asymmetric warfare in populated areas without violating humanitarian law *The G20* K. Postel-Vinay, 2016-01-12 This book argues that the G20 is neither a global executive board for a new world order nor is it just a crisis unit for failing economies It is a laboratory for the observation experimentation and invention of new forms of international cooperation that are redefining global politics **The Gamble of War** A. Colonomos, 2013-02-05 This book analyzes the justification of preventive war in contemporary asymmetrical international relations It focuses on the most crucial aspect of prevention uncertainty It builds a new framework where the role of luck whether military political moral or normative is a corrective to the traditional approaches of the just war tradition The RAND Corporation (1989-2009) J. Samaan, 2012-06-18 Based on a case study of the RAND Corporation this shows how the uncertainties of US defense policies since the fall of the USSR can be understood and illustrated through an analysis of the evolution of the think tank community and more particularly through a sociological study of the so called defense intellectuals such as the RAND Corporation **In the Name of the Nation** M. Laruelle, 2009-10-26 This book deconstructs the equation of nationalism with the extreme right in Russia Nationalism now extends throughout all of the country and can not be seen as a phenomenon confined to the margins of society This study rejects the interpretation that understands Kremlin backed patriotism as simply part of a fascist trend in Russia and as a rapprochement between the political authorities and the extreme right A simplistic analysis of such a paradoxical phenomenon addresses neither the basic issue of social consensus nor that of the inherent relationship between national identity and citizenship *Limited Achievements* Z. Laïdi, 2012-08-16 Through an analysis of the general principles of Obama's foreign policy Laïdi shows how Obama has charted a realist course in the Middle East in Europe in diplomacy and in war Regime Transition and the Judicial Politics of Enmity Justine Guichard, 2016-04-08 Among the societies that experienced a political transition away from authoritarianism in the 1980s South Korea is known as a paragon of successful democratization This achievement is considered to be intimately tied to a new institution introduced with the 1987 change of regime intended to safeguard fundamental norms and rights the Constitutional Court of Korea While constitutional justice is largely celebrated for having achieved both purposes this book proposes an innovative and critical account of the court's role Relying on an interpretive analysis of jurisprudence it uncovers the ambivalence with which the court has intervened in the major dispute opposing the state and parts of civil society after the transition redefining enmity In response to this challenge constitutional justice has produced both liberal and illiberal outcomes promoting the rule of law and basic rights while reinforcing the mechanisms of exclusion bounding South Korean democracy in the name of national security **Democracy at Large** B. Petric, 2012-10-22 An analysis of the transnationalization of politics in several societies concerned by programs of democracy promotion the contributors to this book seek to understand how these new global norms and programs create forms of appropriation and resistance at the local level *The Bureaucratization of the World in the Neoliberal Era* B. Hibou, 2015-05-06 Contemporary bureaucracy is a set of norms rules procedures and formalities which includes

administration business and NGOs Where Max Weber meets Michel Foucault B atrice Hibou analyzes the political dynamics underlying this process Neoliberal bureaucracy is a vector of discipline and control producing social and political indifference Egypt's Revolutions Bernard Rougier,Stéphane Lacroix,2016-04-29 Where is Egypt headed Did the people bring down the government Has the country become the first front in a regional counter revolution backed by the Gulf monarchies These are only some of the questions that this volume the first to describe the ongoing dynamics in Egypt since the outbreak of revolution explores **Building Constitutionalism in China** S.
