Political Ideology And Class Formation A Study Of The Middle Class:

Political Ideology and Class Formation Carolyn Howe, 1992-11-24 In *Political Ideology and Class Formation* Carolyn Howe presents an analysis of theories of the middle class focusing on the class location and political ideology of three strata referred to as managers knowledge controllers and semi professionals Five theories of the middle class are systematically examined new class new working class new petit bourgeoisie new labor aristocracy and contradictory class locations Using these five theories the author offers an accessible analysis of recent debates within class analysis and stratification studies The first chapter situates these debates within traditional sociological studies of social class from Marx and Weber to contemporary scholars working within the traditions of Marx and Weber Using data from the Class Structure and Class Consciousness Study initiated by Erik Olin Wright at the University of Wisconsin Howe develops a comparative study of the United States and Sweden She concludes with a new model of the class structure of advanced capitalist countries In the final chapters Howe develops an analysis of political ideological cleavages within classes and looks at the potential for interclass political coalitions and alliances She states that class analysis must also include an analysis of race and gender as capitalist societies are also fundamentally structured by race and gender inequalities Recommended for sociologists political scientists and other scholars of class analysis stratification political theory and social movements

The Making of the Chinese Middle Class Jean-Louis Rocca, 2016-11-07 This book analyses the making of the Chinese middle class that started in the 1990s using a constructivist approach With the development of the Chinese economy a new group of middle wage earners appeared Chinese social scientists and state institutions promoted the idea that China needs a middle class to achieve modernization Middle class members are defined and define themselves as good consumers educated people politically engaged but reasonable citizens As such the making of the middle class is the result of three convergent phenomena an attempt to define the middle class a process of civilization and the development of protest movements The making of the Chinese middle class Rocca argues is a way to end the stalemate that modern Chinese society is facing in particular the necessity to democratize without introducing an election system

To Govern China Vivienne Shue, Patricia M. Thornton, 2017-10-26 How practically speaking is the Chinese polity as immense and fissured as it has now become actually being governed today Some analysts highlight signs of progress in the direction of more liberal open and responsive rule Others dwell instead on the many remaining obstacles to a hoped for democratic transition Drawing together cutting edge research from an international panel of experts this volume argues that both those approaches rest upon too starkly drawn distinctions between democratic and non democratic regime types and concentrate too narrowly on institutions as opposed to practices The prevailing analytical focus on adaptive and resilient authoritarianism a neo institutionalist concept fails to capture what are often cross cutting currents in ongoing processes of political change Illuminating a vibrant repertoire of power practices employed in governing China today these authors advance instead a more fluid open ended

conceptual approach that privileges nimbleness mutability and receptivity to institutional and procedural invention and evolution *International Bibliography of the Social Sciences*, 1994 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences [Uplifting the Race](#) Kevin K. Gaines, 2012-12-01 Amidst the violent racism prevalent at the turn of the twentieth century African American cultural elites struggling to articulate a positive black identity developed a middle class ideology of racial uplift Insisting that they were truly representative of the race s potential black elites espoused an ethos of self help and service to the black masses and distinguished themselves from the black majority as agents of civilization hence the phrase uplifting the race A central assumption of racial uplift ideology was that African Americans material and moral progress would diminish white racism But Kevin Gaines argues that in its emphasis on class distinctions and patriarchal authority racial uplift ideology was tied to pejorative notions of racial pathology and thus was limited as a force against white prejudice Drawing on the work of W E B Du Bois Anna Julia Cooper Alice Dunbar Nelson Hubert H Harrison and others Gaines focuses on the intersections between race and gender in both racial uplift ideology and black nationalist thought showing that the meaning of uplift was intensely contested even among those who shared its aims Ultimately elite conceptions of the ideology retreated from more democratic visions of uplift as social advancement leaving a legacy that narrows our conceptions of rights citizenship and social justice **Fascism and Political Theory** Daniel Woodley, 2009-09-17 Fascism and Political Theory offers both students and researchers a thematic analysis of fascism focusing on the structural and ideological links between fascism capitalism and modernity Intended as a critical discussion of the origins and development of fascist ideology each chapter deals with a core substantive issue in political theory relevant to the study of fascism and totalitarianism beginning with an assessment of the current state of debate The emphasis on formal ideology in contemporary Anglo American historiography has increased our awareness of the complexity and eclectic nature of fascist ideologies which challenge liberalism and social democracy Yet in too many recent works a programmatic or essentialist reading of fascist ideology as a secular religion is taken for granted while researchers remain preoccupied with the search for an elusive fascist minimum In this book Woodley emphasizes that many outstanding questions remain including the structural and ideological links between fascism and capitalism the social construction of fascist nationalism and the origins of fascist violence in European colonialism This volume consolidates the reader s theoretical understanding and provides the interdisciplinary skills necessary to understand the concrete social economic and political conditions which generate and sustain fascism A timely critique of culturalist and revisionist approaches in fascism studies which provides a concise overview of theoretical debates between liberalism Marxism and poststructuralism this text will be of great interest to students of politics modern history and sociology [The Political Worlds of Women](#) Sarah Richardson, 2013-03-05 Traditional analyses of nineteenth century politics have assigned women a peripheral role By adopting a broader

interpretation of political participation the author identifies how middle class women were able to contribute to political affairs in the nineteenth century Examining the contribution that women made to British political life in the period 1800 1870 stimulates debates about gender and politics the nature of authority and the definition of political culture This volume examines female engagement in both traditional and unconventional political arenas including female sociability salons child rearing and education health consumption religious reform and nationalism Richardson focuses on middle class women s social cultural intellectual and political authority as implemented by a range of public figures and lesser known campaigners The activists discussed and their varying political economic and religious backgrounds will demonstrate the significance of female interventions in shaping the political culture of the period and beyond **Unity is Strength** Markus

Bierkoch,2024-12-02 Migration has been one of the most pressing societal issues throughout history Immigrant associations play a crucial role in understanding this phenomenon They channel migration streams influence the assimilation of their members and serve as representatives of the entire immigrant group in society However they remain an understudied subject particularly in historical research To address this gap this study examines German immigrant associations in New York from the 1890s to the 1930s Through an innovative combination of statistical and textual analyses it explores the class composition of these associations their intricate system of mutual aid and their political activities This study offers insights into how specific socio economic motivations influenced immigrant organization and collective action including aspects such as long distance nationalism and cross border ethnic identity Ultimately based on these findings this study demonstrates that immigrant associations played a crucial role in helping their members adapt to a new social and economic environment Additionally it shows why and how immigrant associations significantly shaped the image of German immigrants in American social and political life **The Black Professional Middle Class** Eric S. Brown,2013-11-07 Through an in depth case study

of the black professional middle class in Oakland this book provides an analysis of the experiences of black professionals in the workplace community and local politics Brown shows how overlapping dynamics of class formation and racial formation have produced historically powerful processes of what he terms racialized class formation resulting in a distinct and internally differentiated entity not merely a subset of a larger professional middle class **Rethinking Revolutionary**

Bernie Bros Gone Woke Marc James Léger, 2022-03-28 In 2016 and 2020 the Bernie Sanders campaign gave American leftists a path towards social change through electoral politics In order to combat neoliberal and reactionary uses of identity the 2020 Sanders campaign combined a working class agenda of universalist policies with various forms of social movement activism In doing so it compromised on universalist principles and socialist radicalism in order to appeal to distinct demographic groups and win the election Bernie Bros Gone Woke reveals how intersectional politics contributed to the failure of the Sanders campaign a lesson that the organized left must learn if it is to challenge progressive neoliberalism and move beyond postmodern post politics Middle Class Identities and Social Crisis Alejandro Grimson, Menara Guizardi, Silvina Merenson, 2022-12-16 This book explores the dynamics of the middle class global rebellion born of the frustration at declining living standards Addressing narratives constructed by different social and political agents and groups it examines contexts of social crisis in Latin America Europe Africa Asia and Oceania understanding the middle classes as a set of complex and conflicting political relationships With attention to the manner in which people create situated habits consolidating new expectations and desires through a concrete biography it analyzes continuities and changes in classed self perceptions based on performative use With new perspectives including historical and intersectional approaches Middle Class Identities and Social Crisis transcends disciplinary boundaries to explore the hybridity of research methods and techniques and challenge established analytical frameworks It will therefore appeal to scholars across the social sciences with interests in class and questions of class identity *Routledge Handbook of European Sociology* Sokratis

Southern Middle Class, 1800-1861 Jonathan Daniel Wells,2005-11-16 With a fresh take on social dynamics in the antebellum South Jonathan Daniel Wells contests the popular idea that the Old South was a region of essentially two classes planters and slaves until after the Civil War He argues that in fact the region had a burgeoning white middle class including merchants doctors and teachers that had a profound impact on southern culture the debate over slavery and the coming of the Civil War Wells shows that the growth of the periodical press after 1820 helped build a cultural bridge between the North and the South and the emerging southern middle class seized upon northern middle class ideas about gender roles and reform politics and the virtues of modernization Even as it sought to emulate northern progress however the southern middle class never abandoned its attachment to slavery By the 1850s Wells argues the prospect of industrial slavery in the South threatened northern capital and labor causing sectional relations to shift from cooperative to competitive Rather than simply pitting a backward slave labor agrarian South against a progressive free labor industrial North Wells argues that the Civil War reflected a more complex interplay of economic and cultural values *The Political Economy of Middle Class Politics*

and the Global Crisis in Eastern Europe Agnes Gagyi,2021-08-09 Contrary to dominant narratives which portray East European politics as a pendulum swing between democracy and authoritarianism conventionally defined in terms of an ahistorical cultural geography of East vs West this book analyzes post socialist transformation as part of the long downturn of the post WWII global capitalist cycle Based on an empirical comparison of two countries with significantly different political regimes throughout the period Hungary and Romania this study shows how different constellations of successive late socialist and post socialist regimes have managed internal and external class relations throughout the same global crisis process from very similar positions of semi peripheral post socialist systemic integration Within this context the book follows the role of social movements since the 1970s paying attention both to the level of differences between local integration regimes and to the level of structural similarities of global integration The analysis maintains a special focus on movements class composition and inter class relationships and the specific position of middle class politics in movements
