Muslims Talking Politics Brandon Kendhammer, 2016-06-22 For generations Islamic and Western intellectuals and policymakers have debated Islam's compatibility with democratic government usually with few solid conclusions But where Brandon Kendhammer asks in this book have the voices of ordinary working class Muslims been in this conversation Doesn't the fate of democracy rest in their hands Visiting with community members in northern Nigeria he tells the complex story of the stunning return of democracy to a country that has also embraced Shariah law and endured the radical religious terrorism of Boko Haram Kendhammer argues that despite Nigeria's struggles with jihadist insurgency its recent history is really one of tenuous and fragile reconciliation between mass democratic aspirations and concerted popular efforts to preserve Islamic values in government and law Combining an innovative analysis of Nigeria's Islamic and political history with visits to the living rooms of working families he sketches how this reconciliation has been constructed in the conversations debates and everyday experiences of Nigerian Muslims In doing so he uncovers valuable new lessons ones rooted in the real politics of ordinary life for how democracy might work alongside the legal recognition of Islamic values a question that extends far beyond Nigeria and into the Muslim world at large **Africa** Patrick Chabal, 2013-04-04 The question usually asked about Africa is why is it going wrong Is the continent still suffering from the ravages of colonialism Or is it the victim of postcolonial economic exploitation poor governance and lack of aid Whatever the answer increasingly the result is poverty and violence In *Africa The Politics of Suffering and Smiling* Patrick Chabal approaches this question differently by reconsidering the role of theory in African politics Chabal discusses the limitations of existing political theories of Africa and proposes a different starting point arguing that political thinking ought to be driven by the need to address the immediacy of everyday life and death How do people define who they are Where do they belong What do they believe How do they struggle to survive and improve their lives What is the impact of illness and poverty In doing so Chabal proposes a radically different way of looking at politics in Africa and illuminates the ways ordinary people suffer and smile This is a

highly original addition to Zed's groundbreaking World Political Theories series *The Real Politics of the Horn of Africa* Alex de Waal, 2015-10-19 The Real Politics of the Horn of Africa delves into the business of politics in the turbulent war-torn countries of north-east Africa. It is a contemporary history of how politicians, generals and insurgents bargain over money and power and use of war to achieve their goals. Drawing on a thirty-year career in Sudan, Ethiopia, Eritrea and Somalia including experience as a participant in high-level peace talks, Alex de Waal provides a unique and compelling account of how these countries' leaders run their governments, conduct their business, fight their wars and occasionally make peace. De Waal shows how leaders operate on a business model, securing funds for their political budgets which they use to rent the provisional allegiances of army officers, militia commanders, tribal chiefs and party officials at the going rate. This political marketplace is eroding the institutions of government and reversing statebuilding and it is fuelled in large part by oil exports, aid funds and western military assistance for counter-terrorism and peacekeeping. The Real Politics of the Horn of Africa is a sharp and disturbing book with profound implications for international relations, development and peacemaking in the Horn of Africa and beyond.

Hegemony or Empire? David Grondin, 2016-04-29 American power has been subjected to extensive analysis since September 11, 2001. While there is no consensus on the state of US hegemony or even on the precise meaning of the term, it is clear that under George W. Bush the US has not only remained the lone superpower but has increased its global military supremacy. At the same time, the US has become more dependent on its economic, financial and geopolitical relationships with the rest of the world than at any other time in its history, markedly since the events of 9/11. The distinguished scholars in this volume critically interpret US hegemony from a range of theoretical and topical perspectives. They discuss the idea of empire in the age of globalization, critique the Bush doctrine, analyze the ideologies underpinning a new American imperialism and examine the influence of neo-conservatism on US foreign and domestic policy.

It is without doubt that as the world was preoccupied with combating the Covid-19 pandemic, issues of rights, freedoms and liberties in the context of this struggle increasingly came under close scrutiny.

The Fabric of Peace in Africa Pamela Aall, Chester A. Crocker, 2017-06-05 Africa has experienced dozens of conflicts over a variety of issues during the past two decades. Responding to these conflicts requires concerted action to manage the crises, the violence, the political discord and the humanitarian consequences of prolonged fighting. It is also necessary to address the long-term social and economic impacts of conflict to rebuild communities, societies and states that have been torn apart. To accomplish this requires the involvement of institutions and groups rarely considered

Business, Politics, and the State in Africa Doctor Tim Kelsall, 2013-01-10 In recent years Africa appears to have turned a corner economically It is posting increased growth rates and is no longer the world's slowest growing region Commentators are beginning to ask whether emerging from Africa is a new generation of lion economies to challenge the East Asian tigers This book goes behind the headlines to examine the conditions necessary not just for growth in Africa but for a wider business and economic transformation Contrary to neoliberal economics it argues that governments can play an important role in this through selective interventions to correct market failures and controversially that neo patrimonial governance need not be an obstacle to improved business and economic conditions Drawing on a variety of timely case studies including Rwanda Ethiopia Tanzania and Ghana this provocative book provides a radical new theory of the political and institutional conditions required for pro poor growth in Africa

Civil War and Democracy in West Africa David Harris, 2011-12-13 In the aftermath of explosive civil wars in Africa during the 1990s and 2000s the establishment of multi party elections has often been heralded by the West as signaling the culmination of the conflict and the beginning of a period of democratic rule However the outcomes of these elections are very rarely uniform with just as many countries returning to conflict as not Here David Harris uses the examples of Sierra Leone and Liberia to examine the nexus of international and domestic politics in these post conflict elections In doing so he comes to the conclusion that it is political rather than legal solutions that are more likely to enhance any positive political change that has emerged from the violence This book is thus of significance to Western and African policy makers and also to students and scholars who wish to engage with the critical issues of conflict resolution and reconciliation both in Sierra Leone and Liberia in particular and in the wider region in general

The State and the Paradox of Customary Law in

Africa Olaf Zenker, Markus Virgil Hoehne, 2018-02-02 Customary law and traditional authorities continue to play highly complex and contested roles in contemporary African states Reversing the common preoccupation with studying the impact of the post colonial state on customary regimes this volume analyses how the interactions between state and non state normative orders have shaped the everyday practices of the state It argues that in their daily work local officials are confronted with a paradox of customary law operating under politico legal pluralism and limited state capacity bureaucrats must often paradoxically deal with custom even though the form and logic of customary rule is not easily compatible and frequently incommensurable with the form and logic of the state in order to do their work as a state Given the self contradictory nature of this endeavour officials end up processing rather than solving this paradox in multiple inconsistent and piecemeal ways Assembling inventive case studies on state driven land reforms in South Africa and Tanzania the police in Mozambique witchcraft in southern Sudan constitutional reform in South Sudan Guinea s long dur e of changing state engagements with custom and hybrid political orders in Somaliland this volume offers important insights into the divergent strategies used by African officials in handling this paradox of customary law and somehow getting their work done

Power, Patronage, and the Local State in Ghana Barry Driscoll, 2023-07-11 How have the waves of democracy and decentralization that swept the developing world in recent decades affected states among the most important drivers of poverty and prosperity at national and local levels in Ghana and beyond State actors beneath the national level what Barry Driscoll calls the local state have considerable responsibility for carrying out state functions but they are also forced to compete for these local state offices How does a local state actually work in poor twentieth century countries This book offers a descriptive account as well as a causal explanation of how political competition affects the local state in Ghana Driscoll shows how closely fought elections drive local state institutions to provide patronage The source of these demands for patronage comes not from rent seeking bureaucrats or landed elites but from the government s own party volunteers Driscoll explains how electoral competition affects how local state actors are insulated from such patronage demands Moreover these highly competitive patronage providing local governments actually have relatively better qualified senior civil servants at their disposal Driscoll makes sense of this paradox by introducing the logic of building administrative capacity in order to provide patronage He then abstracts from the case of Ghana to generalize about how the effect of political competition is shaped by the locally salient variety of clientelism which in turn is conditioned by the strength of the party system The book draws on fourteen months of fieldwork in six of Ghana s districts far from the nation s capital city Ethnographic and interview data come from time spent with market traders tax collectors politicians and other figures in local state offices Quantitative data come from a survey covering almost all local governments The result is a detailed account of Ghana s local state power dynamics that has relevant implications for states across the developing world

Phraseology and Culture in English Paul Skandera, 2008-08-22 The proposition that there is a correlation between language and culture or culture specific ways of thinking can be traced back to the views of Herder and von Humboldt in the late 18th and early 19th centuries It is generally accepted today that a language especially its lexicon influences its speakers cultural patterns of thought and perception in various ways for example through a culture specific segmentation of the extralinguistic reality the frequency of occurrence of particular lexical items or the existence of keywords or key word combinations revealing core cultural values The aim of this volume is to explore the cultural dimension of a wide range of preconstructed or semi preconstructed word combinations in English The 17 papers of the volume are divided into four sections focusing on particular lexemes e g enjoy and its collocates types of word combinations e g proverbs and similes use related varieties such as the language of tourism or answering machine messages and user related varieties such as Aboriginal English or African English The sections are preceded by a prologue tracing the development of the study of formulaic language and followed by an epilogue which draws together the threads laid out in the various papers The relation between language and culture in general has been explored in a number of important works over the past ten years However the study of the relation between English phraseology and culture in particular has been largely neglected This volume is the first book length publication devoted entirely to this topic
