Political Participation in Beijing Tianjian Shi, 1997 In this first scientific survey of political participation in the People's Republic of China Tianjian Shi identifies twenty eight participatory acts and groups them into seven areas voting campaign activities appeals adversarial activities cronyism resistance and boycotts What he finds will surprise many observers Political participation in a closed society is not necessarily characterized by passive citizens driven by regime mobilization aimed at carrying out predetermined goals Beijing citizens acknowledge that they actively engage in various voluntary participatory acts to articulate their interests In a society where communication channels are controlled by the government Shi discovers access to information from unofficial means becomes the single most important determinant for people's engaging in participatory acts Government sponsored channels of appeal are easily accessible to ordinary citizens so socioeconomic resources are unimportant in determining who uses these channels Instead voter turnout is found to be associated with the type of work unit a person belongs to subjective evaluations of one's own economic status and party affiliation Those most likely to engage in campaign activities adversarial activities cronyism resistance and boycotts are the more disadvantaged groups in Beijing While political participation in the West fosters a sense of identification the unconventional modes of participation in Beijing undermine the existing political order **Mass Political Participation in Communist China**

James Roger Townsend, 1965 **Political Culture and Participation in Rural China** Yang Zhong, 2013-06-17 Despite China's rapid urbanisation and industrialisation most Chinese still live in the vast countryside or have rural household registration Although there was significant economic improvement in rural areas in the 1980s the rural economy has been stagnating or deteriorating since then and the book argues that the rural urban income gap is giving rise to the potential for political instability throughout China This book based on extensive original research including interview fieldwork in rural areas examines the nature of political culture and participation in rural China discussing issues such as the support or lack of it for democratic values levels of political interest the ways in which Chinese peasants interact with village and local officials subjective factors that motivate them to vote or not to vote in village elections and rural people's views on market oriented economic reforms local and national government and the Communist Party The book argues that although hitherto peasants riots sit ins and demonstrations have been localised and uncoordinated they are frequent and have the potential to cause serious political crises for China's rulers It concludes by considering the future political development of China's vast countryside *Support for Economic and Political Change in the China Countryside* Samuel James Eldersveld, Mingming Shen, 2001-01-01 Samuel J Eldersveld and Mingming Shen the authors of this important two wave study illuminate a unique and richly contoured view of Chinese attitudes about political and economic reform They base their findings on the responses

of a panel of over 800 mass respondents approximately 1 300 interviews with villagers and 250 interviews with cadres The authors provide extensive analysis of their data and find that the level of popular support for reform and support for democratic values is surprisingly high Of particular interest is the examination of support for political specifically citizen participation contacting officials attending party and village meetings and voting for village committees The authors find significant variance in mass and cadres beliefs but Eldersveld and Shen s findings provide impressive new data for the study of economic and political development in China and the possibility of democracy in the future Political Participation in Communist Systems American Political Science Association,1981

China's Political-Military Evolution Monte R. Bullard,2019-03-08 In recent years the People s Liberation Army PLA has relinquished much of its political power to China s civilian leadership and has turned to the task of professionalizing the military The transition of the PLA into a relatively apolitical force in Chinese society has occurred alongside great progress toward military modernization with the foundation now laid for the PLA to become one of the world s most powerful military forces Dr Bullard traces the PLA s extremely important and almost revolutionary transition examines the structural changes associated with it and assesses current military policies and trends He discusses in detail the political commissar system the key institution for all political military relationships in the Chinese military system *China's Political System* Ning Fang,2020-09-30 This book includes collective research by the Institute of Political Science of the Chinese Academy of Social Sciences which is an important research institution of political science and a think tank in China The book was completed by the expert team of China s Political System headed by Director Fang Ning for several years and after several changes in their manuscripts This book covers the core political systems of China such as the leadership system of the Communist Party of China the decision making system of the Party and government in Chinese politics the system of the people s congress the relationship between the central and local authorities the system of officials training and selection the system of discipline inspection and supervision the system of consultative democracy and the system of community level self governance etc This book aims to build a new paradigm of empirical research and introduction of the contemporary Chinese political system by using the description and research method of materialization and dynamics of the political system Mao's Revolution and the Chinese Political Culture Richard H. Solomon,1971 Political science analysis of the impact of mao s political leadership on politics cultural change and social change in China gives a historical perspective of maoist political doctrine developed in context with traditional values examines the motivational mechanisms for securing political participation and covers social conflict political opposition the political system the dynamics of political education etc Selected bibliography pp 575 to 588 *The Politics of Chinese Communism* Ilpyong J. Kim,2023-07-28 The political system established by the Chinese Communist Party in 1949 had its origins in many respects in the Chinese Soviet Republic of 1931 1934 based in southern Kiangsi province about 400 miles southwest of Shanghai The Kiangsi period was important because it gave the Chinese Communists their first opportunity to

govern an extensive area and a large population and in so doing to develop methods of mass mobilization as well as new techniques for conducting party and government affairs Kim explores the evolution of the Chinese Communist movement during the Kiangsi soviet period especially its organizational concepts behavioral patterns and development techniques of mass line politics He seeks answers to several questions What notions of organization shaped the Kiangsi political system Who formulated the policies How were they implemented at the rice roots level of government By analyzing Mao Tse tung s writings on organization and comparing them with those of other Chinese Communist theoreticians he achieves fresh insights into Mao s approach to administration and bureaucratic organization The distinct contribution of this book lies in its focus on such issues as how the Chinese Communist leaders viewed organizational problems within their movement especially following the failure of the 1947 revolution how they responded to these problems and how they maintained a balance of power among the party the government and the Red Army while administering the expanding territorial base and managing complex organizations This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1973

Why Communism Did Not Collapse Martin K.

Dimitrov,2013-07-31 This volume brings together a distinguished group of scholars working to address the puzzling durability of communist autocracies in Eastern Europe and Asia which are the longest lasting type of non democratic regime to emerge after World War I The volume conceptualizes the communist universe as consisting of the ten regimes in Eastern Europe and Mongolia that eventually collapsed in 1989 91 and the five regimes that survived the fall of the Berlin Wall China Vietnam Laos North Korea and Cuba The essays offer a theoretical argument that emphasizes the importance of institutional adaptations as a foundation of communist resilience In particular the contributors focus on four adaptations of the economy of ideology of the mechanisms for inclusion of potential rivals and of the institutions of vertical and horizontal accountability The volume argues that when regimes are no longer able to implement adaptive change contingent leadership choices and contagion dynamics make collapse more likely

The Politics of Neighborhood Governance in China Jianfeng

Wang,2008-03 For the nearly three decades of coexistence between economic liberalization and political authoritarianism China remains as an anomaly to the liberal mantra of our time This book explores a segment of the China Paradox the state society interaction channeled by the Residents Committee Being the largest urban neighborhood organization the committee deserves study because of its controversial status between ordinary residents it claims to represent and the authoritarian state The committee enters the discourse as a directly congruent example of the same paradox that the whole China displays when it is endowed with important yet tension changed statutory functions ranging from social control to service provision and neighborhood self governance How and under what conditions does the committee carry out its functions What can be

learned about changing state society relations from the dynamics of neighborhood politics in China This book draws its analytical framework on the theoretical models of state penetration civil disobedience corporatism and synergy as well as on the practices of American Cuban and Japanese neighborhood organizations and the Chinese Rural Villagers Committee Four distinctive Residents Committees in Tianjin City are studied in detail and their functions are identified and explained primarily through their structural connections with the lowest state organ in cities the street office and residents including other neighborhood organizations and activists The book reveals multiple possibilities of Chinese social political transformation Among them emerges a promising trend of state society cooperation which is realigning and accommodating political authoritarianism and economic openness into a seemingly sustainable pattern of development at the urban grassroots Referred to as an amphibian organization spanning public private division the committee highlights the limits of the state society antithesis in the study of political transformation The observed patterns of neighborhood politics also raise caution against the universal applicability of the liberal norm of civil society to countries like China with distinctive conditions from which the original norm is present and constructed *Problems of Communism*, 1979 The Cambridge History of China Roderick MacFarquhar, John King Fairbank, 1987 Useful Complaints Jing Chen, 2016-09-09 This book develops an informational theory to account for the coexistence of China's exceptionally resilient authoritarianism and its high decentralization The nuanced information contained in citizens complaints which are filed through the petition system helps to sustain China's decentralized authoritarianism in three important ways First petitions help to alleviate the information asymmetry problem that arises when the central government has less information than lower level governments do When studying citizens petitions higher level governments can obtain valuable and accurate information about local officials performance in policy implementation public goods provision and corruption Higher level governments need this information in order to effectively utilize the cadre management system to reward good performance and punish malpractice The result of this interaction is the PRC's relatively high quality of governance and effective control of local officials There is also a second way in which citizens petitions help the government to overcome the dictator's dilemma that arises when an authoritarian regime is uncertain about how much support it really enjoys among its citizens Citizens specific grievances are revealed in these petitions and are mostly addressed in their beginning stages When citizens complaints are rooted in central policy they set the agenda for policy change in order to maintain social order There is yet a third benefit conferred upon the PRC by the petition system Thanks to the petition system the central government can present itself as the ally of citizens when it addresses the matters raised by their petitions As a result the petition system grants the central government an opportunity to hold local officials accountable scapegoat local authorities divide citizens and local officials and justly claim all the credit when its policies succeed This helps to build citizens trust in their central government and reinforces its legitimacy in their eyes In Huntington's terms the Chinese Communist Party institutionalizes mass support by addressing citizens

grievances expressed through the channel of communication provided by the petition system In this sense the complaints of citizens can be very useful tools for regime maintenance The author substantiates these points with case studies and statistical analysis **Asia: Case Studies in the Social Sciences - A Guide for Teaching** Myron L. Cohen,2016-09-16
