The Battle for Asia Mark T. Berger,2004-03-01 Asia has long been an ideological battleground between capitalism and communism between nationalism and Westernisation and between the nation state and globalization This book is a history of the Asian region from 1945 to the present day which delineates the various ideological battles over Asia s development Subjects covered include theories of development decolonization US political and economic intervention the effects of communism the end of the Cold War the rise of neo liberalism Asia after the crisis Asia in the era of globalisation Broad in sweep and rich in theory and empirical detail this is an essential account of the growth of Asian miracle and its turbulent position in the global economy of the twenty first century **Scientific and Technical Aerospace Reports** ,1980

Democracy When the People Are Thinking James S. Fishkin,2018-06-27 Democracy requires a connection to the will of the people What does that mean in a world of fake news relentless advocacy dialogue mostly among the like minded and massive spending to manipulate public opinion What kind of opinion can the public have under such conditions What would democracy be like if the people were really thinking in depth about the policies they must live with If they really deliberated with good information about their political choices This book argues that deliberative democracy is not utopian It is a practical solution to many of democracy s ills It can supplement existing institutions with practical reforms It can apply at all levels of government and for many different kinds of policy choices This volume speaks to a recurring dilemma listen to the people and get the angry voices of populism or rely on widely distrusted elites and get policies that seem out of touch with the public s concerns Instead there are methods for getting a representative and thoughtful public voice that is really worth listening to Democracy is under siege in most countries where democratic institutions have low approval and face a resurgent threat from authoritarian regimes Deliberative democracy can provide an antidote and can reinvigorate our democratic politics Democracy When the People Are Thinking draws on the author s research with many collaborators on Deliberative Polling a process conducted in 27 countries on six continents It contributes both to political theory and to the empirical study of public opinion and participation It should interest anyone concerned about the future of democracy and how it can be revitalized **Future Survey Annual 1991** Michael Marien,1991-01-01 **U.S. Government Research & Development Reports** ,1971

Ahead Raymond S. Nickerson, 2021-12-16 This volume aims to review some of the recent developments and trends that seem especially relevant to any attempt to understand near term future possibilities to consider what a variety of knowledgeable people are saying about changes and developments that could occur and to relate the possibilities to needs and opportunities for human factors research Human factors in this case includes not only the implications of human capabilities and limitations for the design of equipment and machines intended for human use but also applied psychology in a more general sense In particular it is taken to involve social systems as well as physical ones the interaction of people with the environment as well as with machines the facilitation of communication between people as well as between people and computers and the design of policies and procedures as well as the design of equipment The author's intention is to focus on anticipated problems including opportunities as well as difficulties and ask how human factors research might contribute to solutions It is assumed that there are ways in which such research could be useful in addressing societal problems that the profession has not yet realized and that these are more likely to be recognized in the future if the community is actively seeking to identify them
