Political Society In Lancastrian England The Greater Gentry In Nottinghamshire:

Political Society in Lancastrian England Simon Payling, 1991 A study of the political and social structure of late medieval England which examines the wealth and political influence of a dozen Nottinghamshire families who dominated their county during the first half of the 15th century *Political Society in Lancastrian England* Simon Payling, 1991 This book is a study of the political and social structure of late medieval England Payling examines the wealth and political influence of a dozen Nottinghamshire families who dominated their county during the first half of the fifteenth century His analysis shifts the historical emphasis from the barons at the head of their affinities to the greater gentry as members of well defined shire establishments Payling's carefully researched study reassesses the nature of baronial gentry relations and establishes the true extent of the influence of the greater gentry *The Making of the Neville Family in England, 1166-1400* Charles R. Young, 1996 A study of power in the middle ages the Nevilles of Raby who included among their members Warwick the Kingmaker was one of the major baronial families in England The story of the Neville family is a fascinating one From their inconspicuous beginnings in Lincolnshire after the Norman Conquest by the fourteenth century the Nevilles of Raby were among the most influential groups in the north of England virtually ruling the area by means of the royal offices they held and their political power reached its zenith in the fifteenth century with Richard de Neville earl of Warwick the so called Kingmaker This new study aims to answer the question of how a family of knightly status but with no special prominence was able to rise to such heights tracing its growth and development through a careful examination of surviving documents it also illustrates how the governance of medieval England worked with the cooperation of baronial families in a pragmatic manner quite apart from any abstract legal or constitutional principles CHARLES R YOUNG is Professor Emeritus of History at Duke University *War, State, and Society in England and the Netherlands 1477-1559* Steven Gunn, David Grummitt, Hans Cools, 2007-11-15 Exploring the effects of war on state power in early modern Europe this book asks if military competition increased rulers power over their subjects and forged more modern states or if the strains of war broke down political and administrative systems Comparing England and the Netherlands in the age of warrior princes such as Henry VIII and Charles V it examines the development of new military and fiscal institutions and asks how mobilization for war changed political relationships throughout society Towns in England such as Norwich York Exeter and Rye are compared with towns in the Netherlands such as Antwerp Leiden's Hertogenbosch and Valenciennes to see how the magistrates relations with central government and the urban populace were modified by war Great noblemen from the Howard and Percy families are set alongside their equivalents from the houses of Cro and Egmond to examine the role of recruitment army command and heroic reputation in maintaining noble power The wider interactions of subjects and rulers in wartime are reviewed to measure how effectively war extended princes claims on their subjects loyalty and service their ambitions to control news and opinion and to promote national identity and their ability to manage the economy and harness religious change to dynastic purposes The

result is a compelling but nuanced picture of societies and politics tested and shaped by the pressures of ever more demanding warfare

The Foremost Man of the Kingdom James Ross, 2015 First book to deal with de Vere's life and extraordinary career during the Wars of the Roses and beyond Earl of Oxford for fifty years and subject of six kings of England during the political strife of the Wars of the Roses John de Vere's career included more changes of fortune than almost any other He recovered his earldom after the execution of his father and brother for treason but his resistance to Edward IV led to a decade in prison He escaped in time to lead Henry Tudor's vanguard at Bosworth in 1485 and subsequently enjoyed twenty five years as perhaps the foremost man of the kingdom virtually ruling East Anglia for the king This is the first full length study of de Vere's life and career Through this lens it also tackles a number of broader themes It reconsiders the role of the nobility under Henry VII challenging the common perception of Henry as an anti aristocratic king It also explores East Anglian political society in the second half of the fifteenth century how the earl came to dominate it how successfully he exercised his power and the personnel including the Paston family he used to run the region JAMES ROSS is Senior Lecturer in Late Medieval History at the University of Winchester

The Fourteenth-century Sheriff Richard Gorski, 2003 A study of the careers of over 1200 sheriffs appointed in England during the fourteenth century

Brought Up Of Nought Lynda J. Pidgeon, 2019-12-08 Described as greedy and grasping and raised from nothing the Woodvilles have had a bad press *Brought Up of Nought* investigates the family origins explains the rise and fall of the senior branch and how the junior branch rose to the highest levels of court society after struggling to establish itself in Northamptonshire The family originally rose to the status of baron but lost land over time as it descended to the gentry however the medieval wheel of fortune was to turn dramatically in favour of the junior branch in Northamptonshire Early in the 15th century Richard the son of Richard Woodville Esq was placed in the service of John Duke of Bedford at his court in Rouen which resulted in his secret marriage to the duke's young widow Jacquetta In 1464 their daughter Elizabeth made an extraordinary marriage to Edward IV which attracted great criticism resulting in a period of slander that continues to this day This book argues that the Woodville's blackened reputation

was the result of a campaign by Richard Earl of Warwick who was jealous and eager to retrieve his position as kingmaker

Rural Society and Economic Change in County Durham A. T. Brown, 2015 In the middle of the fifteenth century the economy of north east England was beset by crises population was low production was stagnant and many landowners faced penury By the end of the sixteenth century however the precocious development of the coal industry and high levels of inflation provided opportunities for investment and profit in the Durham countryside This book examines the development of agrarian capitalism estate management tenure and the land market social mobility the gentrification of merchant wealth and the emergence of the yeomanry during this period in the region It looks at such questions as how the coal industry was affected by the fifteenth century recession and the effects its rapid expansion had upon landed society reassesses debates on the rise of the gentry and the crisis of the aristocracy and considers how the wholesale economic changes of this period affected the social structure of late medieval and early modern England Although this period is often seen as a transitional era this book argues that it needs to be studied as one long agrarian cycle showing the degree to which patterns of landholding fixed during the fifteenth century recession affected the distribution of profits between different types of lords

and tenants in the sixteenth and early seventeenth century A T Brown is an Addison Wheeler Fellow at Durham University

Stolen Women in Medieval England Caroline Dunn,2013 The first comprehensive exploration of women s multifaceted experiences of forced and consensual ravishment in medieval England English Political Culture in the Fifteenth Century Michael Hicks,2003-09-02 A new and original study of how politics worked in late medieval England throwing new light on a much discussed period in English history **Women in Medieval English Society** Mavis E. Mate,1999-08-19 Written primarily for undergraduates this book weighs the evidence for and against the various theories relating to the position of women at different time periods Professor Mate examines the major issues deciding the position of women in medieval English society asking questions such as did women enjoy a rough equality in the Anglo Saxon period that they subsequently lost Did queens at certain periods exercise real political clout or was their power limited to questions of patronage Did women s participation in the economy grant them considerable independence and allow them to postpone or delay marriage Professor Mate also demonstrates that class as well as gender was very important in determining age at marriage and opportunities for power and influence Although some women at certain times did make short term gains Professor Mate challenges the dominant view that major transformations in women s position occurred in the century after the Black Death

The English Parliaments of Henry VII 1485-1504 P. R. Cavill,2009-08-13 P R Cavill offers a major reinterpretation of early Tudor constitutional history In the grand Whig tradition the parliaments of Henry VII were a disappointing retreat from the onward march towards parliamentary democracy The king was at best indifferent and at worst hostile to parliament its meetings were cowed and quiescent subservient to the royal will Yet little research has tested these assumptions Drawing on extensive archival research Cavill challenges existing accounts and revises our understanding of the period Neither to the king nor to his subjects did parliament appear to be a waning institution fading before the waxing power of the crown For a ruler in Henry s vulnerable position parliament helped to restore royal authority by securing the good governance that legitimated his regime For his subjects parliament served as a medium through which to communicate with the government and to shape and on occasion criticize its policies Because of the demands parliament made its impact was felt throughout the kingdom among ordinary people as well as among the elite Cooperation between subjects and the crown rather than conflict characterized these parliaments While for many scholars parliament did not truly come of age until the 1530s when freed from its medieval shackles the modern institution came to embody the sovereign nation state in this study Henry s reign emerges as a constitutionally innovative period Ideas of parliamentary sovereignty were already beginning to be articulated It was here that the foundations of the Tudor revolution in government were being laid **Political culture in later medieval England** Michael J. Braddick,2020-01-03 This is an important collection of pioneering essays penned by the late Simon Walker a highly respected historian of late medieval England One of the finest scholars of his generation Walker s writing is lucid inspirational and has permanently enriched our understanding of the period The eleven essays featured here

The Fifteenth-century Inquisitions Post Mortem Michael Hicks, 2012 Essays offering a guide to a vital source for our knowledge of medieval England The Inquisitions Post Mortem IPMs at the National Archives have been described as the single most important source for the study of landed society in later medieval England Inquisitions were local enquiries into the lands held by people of some status in order to discover whatever income and rights were due to the crown on their death and provide details both of the lands themselves and whoever held them This book explores in detail for the first time the potential of IPMs as sources for economic social and political history over the long fifteenth century the period covered by this Companion It looks at how they were made how they were used and their accuracy and develops our understanding of a source that is too often taken for granted it answers questions such as what they sought to do how they were compiled and how reliable they are while also exploring how they can best be used for economic demographic place name estate and other kinds of study Michael Hicks is Professor of Medieval History University of Winchester Contributors Michael Hicks Christine Carpenter Kate Parkin Christopher Dyer Matthew Holford Margaret Yates L R Poos J Oeppen R M Smith Sean Cunningham Claire Noble Matthew Holford Oliver Padel
