Martyn P. Thompson, 2019-05-20 This book is a critique of Cambridge School Historical Contextualism as the currently dominant mode of history of political thought drawing upon Michael Oakeshott's analysis of the logic of historical enquiry While acknowledging that the early Cambridge School work represented a considerable advance towards genuinely historical histories of political thought this work identifies two major historiographical problems that have become increasingly acute The first is general an insufficiently rigorous understanding of the key concept of pastness necessarily presupposed in historical enquiry of all kinds The second is specific to histories of political thought a failure to do justice to the varieties of past political thinking especially differences between ideology and philosophy In addressing these problems the author offers a comprehensive account of the history of political thought that establishes the parameters not just of histories of ideological thinking but also of the much disputed character of histories of political philosophy Since rethinking history of political thought in Oakeshottian terms requires resisting current pressures to turn history into the servant of currently felt needs the book offers a sustained defence of the cultural value of modernist historical enquiry against its opponents An important work for political theorists historians of political thought and those researching intellectual history the philosophy of history and proposed new directions in contemporary historical studies *The National Assessment of College Student Learning* Addison Greenwood, Sal Corrallo, 1994 This report presents the primary papers given at a 1992 workshop to identify specific higher order thinking and communication skills and to develop appropriate indicators of collegiate outcomes as suggested by Goal 5.5 of the National Education Goals formulated in 1990 This goal addressed improvement in college graduates ability to think critically communicate effectively and solve problems Part 1 presents the five papers upon which the working groups built their discussions These papers are 1 Skills for Citizenship Suzanne W Morse 2 A National Assessment of Critical Thinking Skills in Adults Taking Steps Toward the Goal Diane F Halpern 3 Assessing Thinking A Framework for Measuring Critical Thinking and Problem Solving Skills at the College Level David Perkins et al 4 Assessing Speaking and Listening Preliminary Considerations for a National Assessment John A Daly and 5 No Guru No Method No Teacher The Communication Domain and the NACSL National Assessment of College Student Learning by Stephen P Witte Part 2 includes group summary reports reviewers comments a listing of speaking and listening skills and additional information on an ongoing Delphi study at Pennsylvania State University Part 3 presents comments by participants on the conference products and results of a survey of all participants Consensus on next steps included recommending further development of the taxonomy of skills abilities and competencies The five papers contain references DB *History of Western Political Thought* John Morrow, 2019-04-27 The third edition of this highly regarded core textbook offers an accessible and impressively comprehensive account of Western Political Thought over the last two millennia Structured in

Kant, Global Politics and Cosmopolitan Law Claudio Corradetti, 2020-04-08 Why is there so much attention on Kant s global politics in present day law and philosophy This book highlights the potential fruitfulness of Kant s cosmopolitan thought for understanding the complexities of the contemporary political world It adopts a double methodological strategy by reconstructing a genealogical conceptual journey showing the development of international law as well as introducing an interpretation of cosmopolitanism centred on Kant s theory of a metaphysics of freedom The result is a novel focus on Kant s notion of the world republic The hypothesis here defended is that the world republic stands as a way of thinking about international politics where the possibility of progression towards peace results from its use as a regulative idea

The Capitalism Paradox Paul H. Rubin, 2019-07-30 In spite of its numerous obvious failures many presidential candidates and voters are in favor of a socialist

system for the United States Socialism is consistent with our primitive evolved preferences but not with a modern complex economy One reason for the desire for socialism is the misinterpretation of capitalism The standard definition of free market capitalism is that it s a system based on unbridled competition But this oversimplification is incredibly misleading capitalism exists because human beings have organically developed an elaborate system based on trust and collaboration that allows consumers producers distributors financiers and the rest of the players in the capitalist system to thrive Paul Rubin the world s leading expert on cooperative capitalism explains simply and powerfully how we should think about markets economics and business making this book an indispensable tool for understanding and communicating the vast benefits the free market bestows upon societies and individuals
