Political Economy Of Privatization:

The Political Economy of Privatization Thomas Clarke, Christos Pitelis, 2005-08-17 This book considers the many facets of the privatization process in advanced industrialised countries along with the marketization of Eastern Europe and the pressures on developing countries to adopt privatization as the route to growth

The Political Economy of Privatization in Rich Democracies Herbert Obinger, Carina Schmitt, Stefan Traub, 2016-01-28 Almost all advanced democracies have launched significant privatization programs over the last three decades However while there was a global run into privatization substantial cross national differences in the divestiture of state owned enterprises can be observed This book focuses on the political economy of privatization and addresses the questions What are the driving forces behind this development and how can the variation be explained which are of both theoretical and empirical interest While the topic itself is not new the existing comparative literature on the political economy of privatization suffers from at least two major shortcomings First recent macro quantitative analysis in political science and economics has only focused on material privatization formal privatization has hitherto been neglected due to an absence of data even though this type of privatization is of eminent relevance in the public utility sectors Second most of the empirical studies in this area treat countries as independent units In reality however policy decisions are likely to be interdependent Policy decisions taken in one country influence the decision making process in others Given these shortcomings in the existing literature the idea of this volume is to supply a fresh and comprehensive overview of the political economy of privatization using a new data set the REST database The empirical analysis covers 20 OECD countries in the period between 1980 and the advent of the global economic crisis in 2008 The recent economic crisis provides a good opportunity to take stock of the changing role of government in economic over the last three decades

The Political Economy of Privatization and Deregulation Elizabeth E. Bailey, Janet Rothenberg Pack, 1995 The collection of articles in this volume reflect the vigorous implementation of privatization in Europe and deregulation in the United States over the last 25 years The evolutions of the movements is discussed both intellectually and politically

The Political Economy Of Public Sector Reform And Privatization Ezra Suleiman, John Waterbury, 2019-07-09 This book suggests some of the ways in which levels of development shape public sector reform and privatization in developed and developing countries showing that conservative as well as socialist governments were committed to increasing the state s guiding role in the political economy

The Privatization of Education Antoni Verger, Clara Fontdevila, Adrián Zancajo, 2016 Education privatization is a global phenomenon that has crystallized in countries with very different cultural political and economic backgrounds In this book the authors examine how privatization policies are being adopted and why so many countries are engaging in this type of education reform The authors explore the contexts key personnel and policy initiatives that explain the worldwide advance of the private sector in education and identify six different paths toward education privatization as a drastic state sector reform e g Chile the U K as an incremental

reform e.g. the U.S.A. in social democratic welfare states as historical public private partnerships e.g. Netherlands Spain as de facto privatization in low income countries and privatization via disaster Book Features The first comprehensive in depth investigation of the political economy of education privatization at a global scale An analysis of the different strategies discourses and agents that have contributed to advancing and resisting education privatization trends An examination of the role of private corporations policy entrepreneurs philanthropic organizations think tanks and teacher unions Rich in examples careful in its analysis important in its conclusions and recommendations for further work this book is a vital rigorous up to date resource for education policy researchers Stephen J Ball University College London Few issues are as significant as is education privatization across the globe few treatments of this issue offer both the breadth and nuanced understanding that this book does Christopher Lubienski Indiana University

The Political Economy of Privatization George R. G. Clarke, Robert J. Cull, 1998 **Privatizing the State** Béatrice Hibou, 2004 In the new global political economy privatization names a transformation of the roles of public and private actors with the goal of reforming government policies and economic aid programs It is an objective a slogan a fetish But what does it signify On the one hand it refers to the process of changing industries businesses and services from governmental or public ownership to private agencies But privatization now also extends to what are normally the prerogatives of national states taxation customs internal security national defense and peace negotiations In much of the literature privatization is associated with the retreat decline or even demise of the state Using Max Weber's concept of delegation or discharge as a point of departure Hibou and the contributors of this volume propose an alternative view interpreting the contemporary restructuring of economic and political relations in much of the world as the privatization of the state This book challenges received ideas about the process of globalization and its presumed homogenization by suggesting that rather than weakening the powers of the state privatization actually strengthens it With examples from Russia Poland China Taiwan Indonesia North Africa and sub Saharan Africa the book questions the supposed inefficiency of states in regulating capitalism and the role economic and financial knowledge play as substitutes for political and social analysis The Political Economy of Privatization in Ukraine David Snelbecker, 1995

Dancing with the Devil Yi-min Lin, 2017-05-01 From 1978 through the turn of the century China was transformed from a state owned economy into a predominantly private economy This fundamental change took place under the Chinese Communist Party CCP which has been ideologically and politically predisposed to suppress private ownership In Dancing with the Devil Yi-min Lin explains how and why such a paradoxical reality came about He shows that private ownership became a necessary evil for the CCP because the public sector was increasingly unable to address two essential concerns for regime survival employment and revenue Focusing on political actors as major change agents Lin examines how their self interested behavior led to the decline of public ownership in the context of China's evolving demographics and fiscal system The constraints and incentives associated with these factors help explain CCP leaders initial decision to allow limited private

economic activities at the outset of reform They also shed light on the ballooning opportunism among lower officials which undermined the vitality of public enterprises Furthermore they hold a key to understanding the timing of the massive privatization in the late 1990s as well as its tempo and spread thereafter *Dancing with the Devil* illustrates how the driving forces developed and played out in these intertwined episodes of the story In so doing it offers new insights into the mechanisms of China's economic transformation and enriches theories of institutional change

Privatization Amidst Poverty Jorge A. Lawton, 1995 This work analyses economic growth and social equity and the role of international financial institutions and state programmes designed to alleviate worker displacement and other costs of transition in the newly adopted economic reforms and privatisation of Latin American countries

Privatization South American Style Luigi Manzetti, 1999 Privatization South American Style focuses on the politics of privatization in Argentina Brazil and Peru It examines both the micro and macroeconomics of achieving privatization the policy measures introduced and factors affecting the implementation of privatization The political dimensions of privatization are analysed in order to explain the variations in national success in formulation and implementing privatization programmes The author argues that evidence suggests that national governments as planned and that rarely implement most divestiture policies from a technical standpoint privatization is a learning process that evolves through trial and error It also examines the apparently unconventional methods used by the governments of Argentina Brazil and Peru to achieve privatization Comparative in its approach the book seeks also to shed light on the nature of privatization in countries throughout the developing world The book more generally argues that poorly designed privatization policies may have future serious implications on issues such as the rule of law and the regulation of public utilities

Rethinking Municipal Privatization Oliver D. Cooke, 2007-12-26 This book examines one of the most high profile municipal privatizations the privatization of New York City's Central Park This fascinating account highlights the immense theoretical and political issues involved in radically rethinking privatization in both the municipal and global contexts

Critical Essays on the Privatisation Experience Philip Arestis, Malcolm Sawyer, 2009 An addition to the International Papers in Political Economy Series this edited work offers new developments in economic policy and theory The experiences of privatisation and private finance initiatives are looked at in detail

Politics and Policy in Greece Kevin Featherstone, 2006 Containing expert overviews and detailed case studies this new volume presents a rare focus on the politics of contemporary Greece with particular emphasis on its processes of public policy making

The Political Economy of Transformation Hans-Jürgen Wagener, 2013-12-11 This book analyzes the political economic implications of system transformation as experienced now in Central and Eastern Europe and in China The whole societal organization being in motion and economic activity being in a deep recession political leaders will find it extremely difficult to secure consensus and support for redesigning institutions and stabilizing and restructuring activity The ensuing process is certainly not one of optimal control but has rather evolutionary characteristics leading constantly to paradoxes and dilemmas The first part of the

book discusses different paradigms within which the complex process of transformation could fruitfully be analyzed Democratic theory bargaining theory efficiency theory institutionalism all contribute to the understanding of the complex phenomena Key topics of the second part are among others policy aspects of privatization adjustment of fiscal system and policy industrial restructuring the different case of China The book illustrates that the first euphoria of planning the transition to markets was rather naive analytically and politically Transformation is not only an economic puzzle not even in the first place It is very much of a sociopolitical problem and has to be treated as such The book can be used as a reader or as background literature in corresponding course

Schamis, 2002

Compares the processes leading to market reform experiments and its political effects in Latin America and Europe

Government, Industry, and Political Economy Peter Barberis, Timothy May, 1993 This book presents a detailed analysis of contemporary industrial policy in Britain After an introduction to the nature of industrial policy a number of different views about the role of the state in relation to industry and the economy are examined A discussion of the major

characteristics of the UK's industrial structure follows concentrating on the most significant debates over the last 15 years. The parts played by political parties and the major organized interests in developing various industrial policies are dissected. There is a detailed examination of major areas of contemporary industrial policy including privatization, monopolies and mergers, regional policy, small business and local initiatives. The book concludes by posing the question: could policy makers have done better?
