The Political Economy of Underdevelopment in the Global South Justin van der Merwe, Nicole Dodd, 2019-01-07 This book presents a new theory explaining underdevelopment in the global South and tests whether financial inputs the government business media GBM complex and spatiotemporal influences drive human development Despite the entrance of emerging powers and new forms of aid trade and investment international political economic practices still support well established systems of capital accumulation to the detriment of the global South Global asymmetrical accumulation is maintained by affective consent forming hegemonic practices and infrastructural uneven economic exchanges labours and by power networks The message for developing countries is that robust GBMs can facilitate human development and development is constrained by spatiotemporal limitations This work theorizes that aid and foreign direct investment should be viewed with caution and that in the global South these investments should not automatically be assumed to be drivers of development

nations influenced by the ebbs and flows of the global economy and by the international political system but also as actors directly influencing politics and economics It is only through an understanding of both the history and present place of Africa in global affairs that we can begin to assess the way forward for future development Development and

Cockcroft, Andre Gunder Frank, Dale L. Johnson, 1972 This book challenges all of the most commonly held ideas regarding underdevelopment The process of development say the

authors is not a matter of higher Gross National Products which to the contrary often serve to increase a country's long run underdevelopment. Meaningful development is a political as well as an economic process which improves the quality of life for the people of a country. The authors argue that underdevelopment far from being an original or natural condition of the countries of the so-called Third World is a condition imposed by the international expansion of capitalism. The authors go on to dispute some common assumptions regarding industrialization, economic aid, and the allegedly progressive nature of the international expansion of capitalism. The authors go on to dispute some common assumptions regarding industrialization, economic aid, and the allegedly progressive nature of native bourgeoisies. The theory of development and underdevelopment presented in this book is supported by case studies of Mexico, Venezuela, Chile, and other Latin American nations, but the implications extend to Asia, Africa, the Middle East, and the internal colonies of the United States.
