Global Geopolitical Power and African Political and Economic Institutions When Elephants Fight describes the emergence and nature of the prevailing African political and economic institutions in two periods In the first most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites usually through one or no party military political systems inward oriented development policies and or state led and often state owned industrialization In the second period most countries adopted institutions that diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral systems more outward oriented trade policies and the privatization of many state owned or controlled sectors though significant political and economic power remains in their hands The choices made in each period were consistent with prevailing ideas on governance and development the self interests of political elites and the perceived availability of support or autonomy vis vis domestic regional and international sources of power at the time This book illustrates how these two region wide shifts in prevailing political and economic institutions and practices of Africa can be linked to two prior global geopolitical realignments the end of WWII with the ensuing American and Soviet led bipolar system and the end of the Cold War with American primacy Each

period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic regional and international forces material and intellectual all which were themselves greatly transformed in the wake of these two global geopolitical realignments *The Oxford Encyclopedia of African Thought* Abiola Irele, 2010 From St Augustine and early Ethiopian philosophers to the anti colonialist movements of Pan Africanism and Negritude this encyclopedia offers a comprehensive view of African thought covering the intellectual tradition both on the continent in its entirety and throughout the African Diaspora in the Americas and in Europe The term African thought has been interpreted in the broadest sense to embrace all those forms of discourse philosophy political thought religion literature important social movements that contribute to the formulation of a distinctive vision of the world determined by or derived from the African experience The Encyclopedia is a large scale work of 350 entries covering major topics involved in the development of African Thought including historical figures and important social movements producing a collection that is an essential resource for teaching an invaluable companion to independent research and a solid guide for further study **A Comparative Introduction to Political Science** Alan G.
