**The Changing Legal Orders in Hong Kong and Mainland China: Essays on "One Country, Two Systems"** Albert H.Y. Chen, 2021 This collection of selected works by Professor Albert H Y Chen shows the contours of the author's scholarship as it developed over 35 years of his academic career from 1984 to the present The essays are divided into three sections which cover the three major domains of Professor Chen's research Part I covers the legal developments and controversies of One Country Two Systems since the Hong Kong interpretation on the right of abode in 1999 to the anti extradition movement of 2019 Part II shifts to focus on tradition and modernity in Chinese Law including China's Confucian and Legalist traditions and how the socialist legal system in China evolved and modernized in the era of reform and opening Part III examines the transplantation of Western thinking and constitutionalism to East Asia in modern times and discusses the achievements and failures of these efforts In conjunction with an introductory chapter that sets out the basic orientation and paradigm of these legal and constitutional studies and an epilogue that reflects on the main themes this collection exemplifies the author's important contributions to the field and provides insight into how the legal orders in Hong Kong and mainland China have changed over the course of Professor Chen's academic career *The Dynamics of Social Movements in Hong Kong* Stephen Wing Kai Chiu, Tai Lok Lui, 2000-01-01 Studies of Hong Kong society have long focused one sidedly upon economic prosperity and political stability Contributors to this volume redress this imbalance by taking a critical view of Hong Kong's political development from the perspectives of social conflict and collective action Instead of looking at Hong Kong from the top this volume documents the active role played by local actors from below political groups student activists trade unions women groups environmentalists and community organizers and their impact on social and political development in Hong Kong society in the context of political transition and democratization economic restructuring and an emergent local identity **The SAGE Handbook of Social Network Analysis** John Scott, Peter J. Carrington, 2011-10-07 This sparkling Handbook offers an unrivalled resource for those engaged in the cutting edge field of social network analysis Systematically it introduces readers to the key concepts substantive topics central methods and prime debates Among the specific areas covered are Network theory Interdisciplinary applications Online networks Corporate networks Lobbying networks Deviant networks Measuring devices Key Methodologies Software applications The result is a peerless resource for teachers and students which offers a critical survey of the origins basic issues and major debates The Handbook provides a one stop guide that will be used by readers for decades to come Hong Kong's Tortuous Democratization Ming Sing, 2004 This book raises interesting questions about the process of democratization in Hong Kong It asks why democracy has been so long delayed when Hong Kong's level of socio economic development has become so high It relates democratization in Hong Kong to wider studies of the democratization process elsewhere and it supplements the received wisdom that democracy was delayed because of colonial rule and by the opposition of China with new thinking for example that its quasi bureaucratic

authoritarian political structure vested power in bureaucrats who refused to have top down democratization a politically weak civil society and a non participant political culture that crippled bottom up democratization plus the division between pro democratic civil society and political society      *Politics and Government in Hong Kong* Ming Sing,2009 This book examines the government of Hong Kong since its handover to mainland China in 1997 focusing in particular on the anti government mass protests and mobilisations in the years since 2003 It argues that Hong Kong has been poorly governed since transferring to Chinese rule and that public frustration with governmental performance including anti subversion laws and slow democratisation has resulted in the regular and massive protests which have been rare in Hong Kong s past political development The book then assesses different explanations for Hong Kong s government problems including lack of social cohesion incomplete economic restructuring structural budgetary deficit severe social inequality intensifying cronyism and deficiencies within the political system itself It goes on to discuss the implications of poor governance for legislative elections civil society and constitutional development and considers the prospects for the future It argues that although in the short term the Hong Kong government has managed to maintain its popular support ratings in the longer run it is unlikely to be able to maintain its legitimacy in dealing with the fundamental challenges of government unless the current system is replaced by popular election of the government with appropriate institutional capacity and political powers

**Resources in Education** ,1979      **The Psychology of Legitimacy** John T. Jost,Brenda Major,2001-09-10 This book first published in 2001 provides a general approach to the psychological basis of social inequality      **Research in Education** ,1974      *Environmental Protest in Western Europe* Christopher Rootes,2003-12-11 The rise of environmentalism has been one of the more remarkable developments in the politics of western societies in recent decades However as environmental awareness has become more generalized the forms of expression of environmental concern have changed Established environmental movement organizations have become embedded in policy networks but in some countries there has been a resurgence of environmental radicalism New groups adopting innovative tactics have mounted spectacular and disruptive protests These developments pose interesting questions for social scientists and policy makers Has the institutionalization of established environmental organizations demobilized their supporters and reduced them to a passive credit card waving conscience constituency Has direct participation in environmental protest become the specialized activity of smaller numbers of people Has there been a decline in the total volume of environmental protest or is it merely that the forms of protest have changed Have the protest repertoires of established groups moderated over time or have they been stimulated by the emergence of more radical groups to adopt more challenging tactics Has environmental protest become more confrontational Do protests employ different repertoires of action according to the issues at stake How does the incidence of protest vary over time and from one country to another Is there evidence of a Europeanization of either the issues or the forms of environmental protest These are some of the questions this volume addresses Based upon an analysis

of the protest events reported in one quality newspaper in each of eight countries during the ten years 1988 to 1997 this is the first systematically comparative study of environmental protest in a representative cross section of EU member states It breaks entirely new ground in the study of environmental politics in Europe and is a major contribution to the study of protest events

**Pro-Democracy Contention in Hong Kong** Francis L. F. Lee, 2025-02-01 Elucidates the political dynamics that link the Umbrella Movement to the anti extradition protests and helps explain the key character of the latter movement Presenting an analytical account of the relational dynamics linking the 2014 Umbrella Movement and the 2019 anti extradition protests in Hong Kong Pro Democracy Contention in Hong Kong aims to explain not only the relationship between two spectacular protest campaigns but also why the anti extradition protests exhibited a high degree of internal solidarity and public sympathy toward confrontational and at times violent protest actions The analysis moves beyond the typical focus on the peaks of social mobilization to examine the contingent and dynamic evolution of the pro democracy movement in Hong Kong Drawing upon a range of research materials including in depth interviews with protesters and leading activists surveys of protesters conducted onsite population opinion surveys systematic analyses of media materials and examination of the verdicts of protest related court cases Francis L F Lee offers theoretical insights on various important issues in the study of social movements including among others the possibility of movement transformation during abeyance the relationship between protest events and elections the role of ideological brokers in movement dynamics and the nature of spontaneous protests Readers interested in Chinese and Hong Kong politics or interested in social movement studies and analyses of political dynamics in hybrid regimes will find value in Lee s analysis

*Collective Violence, Democracy and Protest Policing* David R Mansley, 2013-10-08 In this book David Mansley argues that the frequency with which violence intrudes on to the streets is related to both how society is governed and how it is policed With the help of an innovative methodology he quantifies and tests three variables collective violence democracy and protest policing using protests in Great Britain in 1999 2011 for his sampling frame The result is the design of new tools of measurement and a harvest of new data including previously unpublished details of banning orders and riot damages that enable us to reflect with the benefit of broad sociological perspective on the causes of contemporary violent events Mansley s explanation of the trends he identifies draws from the work of the best thinkers on violence especially Charles Tilly Thomas Hobbes and Norbert Elias He shows how the style of protest policing and the depth of democracy both of which function under the direction of the political economy are crucial to the state s credentials as the monopoly supplier of legitimate violence His discussion touches on such current topics as the institution of police commissioners the privatisation of policing duties and the decline in homicide This cultured study which includes an engaging review of the existing scholarship on violence is essential material for undergraduate and postgraduate students reading criminology sociology or political theory
