Political Reasoning And Cognition A Piagetian View:

Political Reasoning and Cognition Shawn Rosenberg, Dana Ward, Stephen Chilton, 1988 This work presents a new alternative approach to studying the formation of political ideologies and attitudes addressing a concern in political science that research in this area is at a crossroads The authors provide an epistemologically grounded critique on the literature of belief systems explaining why traditional approaches have reached the limits of usefulness Following the lead of such continental theorists such as Jurgen Habermas and Anthony Giddens who stress the importance of Jean Piaget to the development of a strong theoretical perspective in political psychology the authors develop a different epistemology theory and research strategy based on Piaget then apply it in two empirical studies of belief systems and finally present a third theoretical study of political culture and political development

Confucian Ethics of the Axial Age Heiner Roetz,1993-01-01 Confucian Ethics of the Axial Age describes the formative period of Chinese culture the last centuries of the Zhou dynasty as an early epoch of enlightenment It comprehensively reconstructs the ethical discourse as thought gradually became emancipated from tradition and institutions Rather than presenting a chronology of different thinkers and works this book discusses the systematic aspects of moral philosophies Based on original texts Roetz focuses on filial piety the conflict between the family and the state the legitimating of the political order the virtues of loyalty friendship and harmony concepts of justice the principle of humaneness and its different readings the Golden Rule the moral person the autonomous self motivation decision and conscience and various attempts to ground morality in religion human nature or reason These topics are arranged in such a way that the genetic structure and the logical development of the moral reasoning becomes apparent From this detached perspective conventional morality is either rejected or critically reestablished under the restraint of new abstract and universal norms This makes the Chinese developments part of the ancient worldwide movement of enlightenment of the axial age *The Governance of Online Expression in a Networked World* Helena Carrapico,Benjamin Farrand,2017-10-02 In recent years we have witnessed the mushrooming of pro democracy and protest movements not only in the Arab world but also within Europe and the Americas

Such movements have ranged from popular upheavals like in Tunisia and Egypt to the organization of large scale demonstrations against unpopular policies as in Spain Greece and Poland What connects these different events are not only their democratic aspirations but also their innovative forms of communication and organization through online means which are sometimes considered to be outside of the State s control At the same time however it has become more and more apparent that countries are attempting to increase their understanding of and control over their citizens actions in the digital sphere This involves striving to develop surveillance instruments control mechanisms and processes engineered to dominate the digital public sphere which necessitates the assistance and support of private actors such as Internet intermediaries Examples include the growing use of Internet surveillance technology with which online data traffic is analysed and the extensive monitoring of social networks Despite increased media attention academic debate on the ambivalence of these technologies mechanisms and techniques remains relatively limited as is discussion of the involvement of corporate actors The purpose of this edited volume is to reflect on how Internet related technologies mechanisms and techniques may be used as a means to enable expression but also to restrict speech manipulate public debate and govern global populaces This book was published as a special issue of the Journal of Information Technology and Politics [Australian Politics in a Digital Age](#) Peter John Chen,2013-02-01 The first comprehensive volume on the impact of digital media on Australian politics this book examines the way these technologies shape political communication alter key public and private institutions and serve as the new arena in which discursive and expressive political life is performed Publisher s description *Democracies in Transition* Russell Francis Farnen,2000 **Political Psychology** Kristen Renwick Monroe,2001-12 This edited book is an overview of political psychology with contributions by the leaders in the field Its goal is to define explore the key concepts methodologies research activities as well as the controversies future directions of the field **Research Handbook on Education and Democracy** Jan Germen Janmaat,Anne Bert Dijkstra,2025-05-14 This timely Research Handbook examines how the many facets of education can foster democratic competences It reviews state of the art research and identifies a number of under explored issues in the field highlighting the potential of educational reforms in improving democratic engagement across a wealth of demographics This title contains one or more Open Access chapters **Thinking about Political Psychology** James H. Kuklinski,2002-03-04 In this 2002 volume political psychologists take a hard look at political psychology They pose and then address the kinds of tough questions that those outside the field would be inclined to ask and those inside should be able to answer satisfactorily Not everyone will agree with the answers the authors provide and in some cases the best an author can do is offer well grounded speculations Nonetheless the chapters raise questions that will lead to an improved political psychology and will generate further discussion and research in the field The individual chapters are organised around four themes Part I tries to define political psychology and provides an overview of the field Part II raises questions about theory and empirical methods in political psychology Part III contains arguments ranging from the position that the

field is too heavily psychological to the view that it is not psychological enough Part IV considers how political psychologists might best connect individual level mental processes to aggregate outcomes
